<i>Preface</i>	<i>ix</i>
<i>Acknowledgments</i>	<i>xi</i>
PART I AN INTRODUCTION TO STEM CELLS 1	
1 The essential principles of stem cell science...3	
1.1 The defining properties of a stem cell.....3	
1.2 The necessity for stem cells.....9	
1.3 The control of stem cell function is complex and varied 11	
1.4 The therapeutic and economic Potential of stem cells 13	
1.5 Summary 15	
Further reading 15	
2 Stem cell identification, isolation, and characterization 17	
2.1 Identification of stem cells 17	
2.2 Isolation of stem cells 25	
2.3 Characterization of stem cells.....30	
2.4 Summary 41	
Further reading 42	
PART II STEM CELL POTENCY AND CONTROL 43	
3 Embryonic stem cells, cloning, and pluripotency45	
3.1 Pluripotent cells derived from vertebrate embryos 46	
3.2 Pluripotent cells derived by cloning59	
3.3 Pluripotent cells from non-mammalian species.....63	
3.4 Summary65	
Further reading65	
4 Controlling stem cells: Receipt and interpretation of external cues67	
4.1 Signal transduction pathways utilized by stem cells69	
4.2 How the stem cell machinery responds to signal inputs85	
4.3 Summary 90	
Further reading91	
5 Cell plasticity, reprogramming, and induced pluripotent stem cells.....93	
5.1 Reversibility of the differentiated state of adult cells93	
5.2 Reprogramming adult cells to become pluripotent stem cells97	
5.3 Stem cell plasticity and lineage reprogramming revisited105	
5.4 Summary 108	
Further reading 109	
6 The stem cell niche 111	
6.1 Stem cells have a defined environment 111	
6.2 Architecture of stem cell niches: Similarities across the animal and plant kingdoms 113	
6.3 How does the niche contact and communicate with stem cells? 116	

6.4	Changes in the stem cell niche can contribute to tissue failure during aging	120	9.3	Cell heterogeneity and the niche have effects on clinically relevant aspects of hematopoietic stem cell behavior.....	182
6.5	The role of stem cell niches in malignancy.....	123	9.4	Stem cells supporting blood cells in invertebrates	187
6.6	Targeting stem cell niches as a therapeutic option.....	125	9.5	Summary	191
6.7	Summary	127		Further reading	192
	Further reading	127			
PART III STEM CELLS ACROSS THE ANIMAL AND PLANT KINGDOMS		129			
7	Regeneration in animals: The evolution of stem cells	131	10	Musculo-skeletal and dental stem cells in mammals	193
7.1	The nature of regeneration	131	10.1	The fundamental components of the mammalian skeleton, dentition, and musculature.....	193
7.2	Animals that regenerate using stem cells	134	10.2	Mesenchymal stem cells	196
7.3	Regeneration of animal structures that do not require stem cells	142	10.3	Dental stem cells	203
7.4	Regeneration in vertebrates is not restricted to limbs	147	10.4	Skeletal muscle stem cells	205
7.5	Summary	150	10.5	Summary	214
	Further reading	150		Further reading	215
8	Plant stem cells.....	151	11	Stem cells in endoderm-derived organs....	217
8.1	The nature of stem cells in plants.....	151	11.1	Gastrointestinal tract lining stem cells	217
8.2	The regulation of plant stem cells	159	11.2	Gastrointestinal tract associated organ stem cells	228
8.3	Regeneration in plants and its link to stem cells.....	163	11.3	Stem cells in the respiratory tract	233
8.4	Similarities and differences between plant and animal stem cells.....	167	11.4	Summary	237
8.5	Summary	168		Further reading	238
	Further reading	169	12	Stem cells underpinning the generation of germ cells.....	239
PART IV STEM CELLS IN SPECIALIZED ADULT ANIMAL TISSUES		171	12.1	Stem cells throughout the reproductive cycle	239
9	Hematopoietic stem cells	173	12.2	Mechanisms that regulate germ stem cells	253
9.1	Evolutionary diversification of blood cells and their stem cells	173	12.3	Summary	258
9.2	Mammalian hematopoietic stem cells	175		Further reading	259
			13	Stem cells in the cardiovascular system.....	261
			13.1	Circulatory systems in complex animals.....	261
			13.2	Stem cells in the vasculature.....	263
			13.3	Stem cells in the heart.....	269
			13.4	Summary	276
				Further reading	277

14 Stem cells in the nervous and sensory systems.....	279	17.1 The unmet need in medicine that can benefit from the application of stem cells.....	343
14.1 Nervous systems in animals.....	279	17.2 Modeling disease using stem cell derived cells.....	345
14.2 Stem cells in the central nervous system.....	282	17.3 Making use of an individual's resident cells for repair and regeneration.....	349
14.3 Stem cells supporting the sensory organs in the peripheral nervous system.....	288	17.4 Using externally sourced stem cells in regenerative medicine.....	351
14.4 Summary.....	298	17.5 Tissue engineering.....	356
Further reading.....	299	17.6 Progress, failures, and prospects in stem cell-based regenerative medicine.....	360
15 Stem cells in the skin, its appendages, and other epithelial tissues.....	301	17.7 Summary.....	366
15.1 Epithelia: The frontier tissues of the body.....	301	Further reading.....	366
15.2 Stem cells in the skin.....	303	18 Stem cells in biomedicine: Stem cells in aging and cancer.....	369
15.3 The corneal epithelium.....	314	18.1 The role of stem cells in tissue aging.....	370
15.4 Stem cells in the epithelia of the gastrointestinal tract.....	317	18.2 The role of stem cells in cancer.....	382
15.5 Stem cells in mammary glands.....	318	18.3 Summary.....	391
15.6 Summary.....	321	Further reading.....	391
Further reading.....	322	19 Stem cell applications in domesticated and wild animals and in horticulture.....	393
16 Atypical stem cells that enable and modulate immune system function.....	323	19.1 Animal health, agricultural productivity, and biomedical advancement involving animals ...	393
16.1 Effector cells of the immune system.....	323	19.2 Species conservation.....	403
16.2 Hematopoietic stem cell-independent myeloid cells in the innate immune response.....	324	19.3 Horticultural development.....	405
16.3 Memory cells of the adaptive immune response have stem cell properties.....	328	19.4 Summary.....	408
16.4 Stem cells in the primary and secondary lymphoid organs.....	331	Further reading.....	409
16.5 The immune modulatory function of mesenchymal stem cells.....	334	20 Stem cells and society: A philosophical, ethical, and economical view.....	411
16.6 Summary.....	338	20.1 Philosophical and moral perspectives.....	411
Further reading.....	339	20.2 Exploiting stem cells.....	420
PART V BIOMEDICAL AND ECONOMIC APPLICATIONS OF STEM CELLS.....	341	20.3 The economic perspective.....	425
		20.4 Summary.....	428
		Further reading.....	430
17 Stem cells in biomedicine: Disease modeling and tissue repair.....	343	Glossary.....	431
		Index.....	437
