

CONTENTS

Preface		xi
Editors		xiii
Contributors		xv
Chapter 1	Introduction	1
	<i>John J. Reynolds, Roger J. A. Grand, and Martin R. Higgs</i>	
Chapter 2	DNA Replication and Cell Cycle Control	5
	<i>Sara Priego Moreno, Rebecca M. Jones, and Agnieszka Gambus</i>	
Chapter 3	DNA Replication Termination and Genomic Instability	21
	<i>Rebecca M. Jones, Sara Priego Moreno, and Agnieszka Gambus</i>	
Chapter 4	Mechanisms of DNA Damage Tolerance	37
	<i>Cyrus Vaziri and Anastasia Zlatanou</i>	
Chapter 5	The Repair of DNA Single-Strand Breaks and DNA Adducts: Mechanisms and Links to Human Disease	63
	<i>Alicja Winczura and John J. Reynolds</i>	
Chapter 6	Homologous Recombination at Replication Forks	93
	<i>Eva Petermann</i>	
Chapter 7	Mechanism of Double-Strand Break Repair by Non-Homologous End Joining	113
	<i>Michal Malewicz</i>	
Chapter 8	Protein Methylation and the DNA Damage Response	135
	<i>Martin R. Higgs and Clare Davies</i>	
Chapter 9	Ubiquitin, SUMO and the DNA Double-Strand Break Response	167
	<i>Ruth M. Densham, Alexander J. Garvin, and Joanna R. Morris</i>	
Chapter 10	Transcription in the Context of Genome Stability Maintenance	205
	<i>Marco Saponaro</i>	
Chapter 11	RNA Binding Proteins and the DNA Damage Response	223
	<i>Roger J. A. Grand</i>	

Chapter 12	DNA Replication and Inherited Human Disease	249
	<i>John J. Reynolds and Grant S. Stewart</i>	
Chapter 13	Ataxia Telangiectasia and Ataxia Telangiectasia-Like Disorders	291
	<i>A. Malcolm R. Taylor</i>	
Chapter 14	DNA Repair Mechanisms in Stem Cells and Implications during Ageing	307
	<i>Rachel Bayley and Paloma Garcia</i>	
Chapter 15	Targeting Replication Stress in Sporadic Tumours	329
	<i>Marwan Kwok and Tatjana Stankovic</i>	
Chapter 16	A Few of the Many Outstanding Questions	341
	<i>John J. Reynolds and Roger J. A. Grand</i>	
Index		343
