

Contents

Preface vii

Introduction xi

1. Origin and Radiation of the Classes of Poikilothermous Vertebrates	
<i>Nicholas Hotton III</i>	1
2. Vertebrate Olfaction	
<i>Don Tucker and James C. Smith</i>	25
3. The Vertebrate Eye	
<i>Mitchell Glickstein</i>	53
4. Some Comments on Visual Acuity and Its Relation to Eye Structure	
<i>Mark A. Berkley</i>	73
5. Origin and Evolution of the Ear of Vertebrates	
<i>Ernest Glen Wever</i>	89
6. Comparative Hearing Function in the Vertebrates	
<i>W. C. Stebbins</i>	107
7. Neurology of Anamniotic Vertebrates	
<i>Sven O. E. Ebbesson and R. Glenn Northcutt</i>	115
8. The Forebrain of Reptiles and Mammals	
<i>Ford F. Ebner</i>	147
9. Vertebrate Learning: Common Processes	
<i>M. E. Bitterman and William T. Woodard</i>	169

10. Vertebrate Learning: Evolutionary Divergences	
<i>Kenneth H. Brookshire</i>	191
11. Issues in the Comparative Psychology of Learning	
<i>M. E. Bitterman</i>	217
12. Later Mammal Radiations	
<i>Leonard B. Radinsky</i>	227
13. Comments on Radinsky's "Later Mammal Radiations"	
<i>Malcolm C. McKenna</i>	245
14. Brain Evolution in Mammals: A Review of Concepts, Problems, and Methods	
<i>Wally Welker</i>	251
15. Comparative Anatomy of the Tetrapod Spinal Cord: Dorsal Root Connections	
<i>J. M. Petras</i>	345
16. Primate Radiations and the Origin of Hominoids	
<i>Elwyn L. Simons</i>	383
17. Brain Evolution in the Order Primates	
<i>C. B. G. Campbell</i>	393
18. Tool Use in Mammals	
<i>J. M. Warren</i>	407
19. Primate Social Behavior: Pattern and Process	
<i>William A. Mason</i>	425
Author Index	457
Subject Index	474
