Introduction	1
1 Biological Natural Kind Essentialism: Definitions and Desiderata	4
1.1 <i>The Philosophical Theory of Natural Kinds</i>	4
1.2 <i>Natural Kind Essentialism</i>	8
1.3 <i>Aristotelian Biological Natural Kind Essentialism</i>	12
1.4 <i>Toward a Neo-Aristotelian Biological Natural Kind Essentialism</i>	15
2 Essence and Explanation: Natural Kinds in the Taxonomic Tree	22
2.1 <i>A Natural Taxonomy of Kinds</i>	23
2.2 <i>Natural Kinds and the Species Concept</i>	24
2.3 <i>Two Taxon Questions</i>	28
2.4 <i>Type, Telos, and Taxon</i>	32
3 Powerfully Directed Development: A Dispositional Analysis of Ontogenesis	38
3.1 <i>Dispositions and the Dynamics of Dependence</i>	39
3.2 <i>The Causal Mechanisms of Morphology</i>	44
3.3 <i>Development, Dispositionally</i>	51
4 Ontogenetic Causal Primacy: The Fount and Flow of Information	67
4.1 <i>The Case Against Primacy I: Polygeny and Pragmatism</i>	68

vi Contents

4.2	<i>The Case Against Primacy II: Pleiotropy and Plasticity</i>	73
4.3	<i>Primus Inter Pares: Causal Relevance vs. Causal Responsibility</i>	76
4.4	<i>Parity and Pragmatism Revisited</i>	83
4.5	<i>A More Complex Teleology: Mapping Out Morphospace</i>	87
5	The Essence of Natural Kinds: Unity in Diversity	97
5.1	<i>The No Such Set Objection: Phenotypic and Genotypic Diversity</i>	98
5.2	<i>Essence and the Effects of Essence</i>	102
5.3	<i>The Form of What Matters</i>	108
6	An Evolutionary Ontology: Priority, Modality, and the Natural State	118
6.1	<i>The Natural State Model: Being, Backwards</i>	119
6.2	<i>Evolutionary Ontology: A Tale of Two Syntheses</i>	122
6.3	<i>The Nature of Essence</i>	127
	Conclusion	136
