Foreword by Jane Goodall	xi
Preface	xv
1. Science, Common Sense, and the Common Sense of Science	3
Science and the compartmentalization of common sense	3
The common sense of science	9
Can common sense ever correct science?	14
Conclusion	21
2. Animal Consciousness as an Object of Study	25
Compartmentalization and animal consciousness in scientific ideology	25
Is anthropomorphism a fallacy?	26
Common sense and animal consciousness	31
Animal consciousness and Darwinian science	33
The work of George Romanes	35
The anecdotal method	36
Anecdote versus laboratory experimentation	40
Romanes's principles	43
Romanes's method applied	47
3. Aspects of Change in Science and Philosophy	53
How does science change?—the orthodox view	53
An alternative approach to scientific change	55
The philosophical and valuational bases for scientific change	58

Relevance of this view to the science of animal consciousness: some preliminary remarks	64
The rise of positivism	68
Positivism, behaviorism, and consciousness	69
4. The Tortuous Path from Romanes to Watson	75
Lloyd Morgan and his Canon	75
Loeb's mechanism	80
H. S. Jennings	84
Titchener's introspective psychology	91
Thorndike	93
Watson and behaviorism	97
Why did behaviorism triumph?	101
5. Animal Pain: The Ideology Cashed Out, 1	109
The common sense of science and the rejection of value questions	109
Ideology and incoherence	114
The case of pain	115
Moral consequences	119
Avoiding incoherence—the physicalization of pain and stress	124
Reprise: philosophy, value, and the neglect of consciousness	129
Ideology and human pain	131
6. Animal Pain: The Ideology Cashed Out, 2	135
Arguments for the insignificance of animal pain	135
The claim that animals lack concepts	136
The Wittgenstein version	140
Pain and the intellectual limitations of animals	143
Anthropomorphism and animal pain	145
Why do such arguments thrive?	146
Logical behaviorism and the ascription of pain to animals	147
Variability of pain experience in humans and animals	149
The scientific incoherence of denying pain in animals	152
The alleged unobservability of mental states	154
Mental states as a perceptual category	157

Morality and the perception of mental states	160
Application of this theory to animals	161
7. Morality and Animal Pain: The Reappropriation of Common Sense	165
The rise of social concern about the morality of animal use	165
Moral concern and its impact on science	168
Law and local project review as a factor in moral change in the United States	175
British legislation	179
Law and policy in Canada and Australia	183
The new moral attitudes and the study of pain	184
Ideology crumbling: the subjective acknowledged	189
Subjective mental states as explanatory: the case of stress	194
How ignoring mental states may jeopardize research	199
8. Consciousness Lost	203
Consciousness under behaviorism	203
European approaches to animal psychology: ethology	206
Lorenz and consciousness	210
Vestiges of consciousness: America and Britain	213
Tolman's purposive behaviorism	214
McDougall's unabashed mentalism	215
Vestiges of consciousness: Europe	218
Köhler and Gestalt psychology	218
The idealistic tradition—Buytendijk and von Uexküll	222
9. Consciousness Regained: Psychology	229
Internal critiques of behaviorism	229
Attacks on learning theory	233
Chomsky's critique of behaviorism	234
Cyril Burt's defense of consciousness	236
The work of R. B. Joynton	239
Ernest Hilgard and the return of consciousness	240
The cognitive turn	242
Animal consciousness regained: the study of primate communication	244
Animal consciousness in the psychological literature	245

10. Consciousness Regained: Ethology and Beyond	249
The work of Donald Griffin	249
Social concern with farm animals as a factor in reinstating consciousness	252
The work of Marian Dawkins and other farm-animal ethologists	254
Other ethological advances in the farm-animal area	257
New methods for studying animal consciousness:	
Herrnstein and Gallup	259
A new approach to studying animal consciousness	262
The study of animal consciousness in mainstream science	263
Convincing the skeptics: A thought experiment	265
Conclusion	266
11. <i>The Unheeded Cry Revisited</i>	271
I	271
II	275
III	281
IV	286
V	288
Epilogue	291
Notes	297
Bibliography	311
Index	323
