
Contents

Chapter 1

Chemical Synthesis of Oligonucleotides: From Dream to Automation1

Richard T. Pon

Chapter 2

Artificial Hybridization Probes71

Salvatore A. E. Marras

Chapter 3

Peptide Nucleic Acid (PNA): A DNA Mimic with a Pseudopeptide Backbone91

Frederik Beck and Peter E. Nielsen

Chapter 4

Synthetic DNA Used in Amplification Reactions115

Lisa S. Kelly

Chapter 5

Artificial Nucleic Acids and Genome Profiling161

Lilia M. Ganova-Raeva

Chapter 6

Site-Directed Mutagenesis199

John I. Glass and Beverly A. Heinz

Chapter 7

Mimotopes: An Overview225

Renu Tuteja

Chapter 8

Artificial Genes for Chimeric Virus-Like Particles249

Paul Pumpens and Elmars Grens

Chapter 9

DNA Vaccines329

*Sang Won Han, Jane Zveiter de Moraes, Célio Lopes Silva, Roger Chammas,
and Maurício Martins Rodrigues*

Chapter 10

Toward Designer Diagnostic Antigens363

Joy Chih-Wei Chang

Chapter 11

Recombinant Antibodies385

Ramón Montañó and Flor H. Pujol

Index411
