preface.....	xiii
acknowledgments	xv
about the author.....	xvii
1 general approaches for critical care	1
overview	1
obtaining a clinical history and medical records.....	3
body condition scoring.....	5
relocation for physical examinations.....	6
monitoring critically ill rodents.....	6
pain recognition and assessments	11
supportive care for surgical procedures	12
supplemental heat provision	17
drug therapy	18
Routes of Drug and Fluid Administration.....	18
references	21
2 critical care management for laboratory mice	25
introduction	25
overall assessments.....	25
general medical approaches to physical examination and health assessments	26
Physical Examination	27
Body Condition Scoring	29
Clinical Assessments of Ill Health and Pain in Mice	29
Monitoring Frequency	31
Objective Scoring Systems	31

veterinary care measures	33
Administration of Fluids	33
Blood Sampling	35
Body Temperature Monitoring.....	38
Endotracheal Intubation	40
Injections and Oral Administration.....	41
Urine Sampling.....	42
abnormal, critical, and emergent conditions	44
Abdominal Swelling	44
Abscessation.....	45
Cage Flooding with Subsequent Hypothermia	47
Cannibalization	49
Conjunctivitis	50
Cross Fostering of Neonates/Mouse Pups.....	51
Dystocia.....	52
Fight Wounds	56
Fractures/Orthopedic Problems	57
Hemorrhage	59
Moribund, Weak, or Paralyzed Condition	59
Mortality (Sudden Death)	61
Ocular Lesions.....	62
Perineal Swelling	64
Poor Body Condition	66
Rectal Prolapse	68
Respiratory Distress	69
Seizures.....	71
Trauma.....	74
Ulcerative Dermatitis	76
Vaginal or Uterine Prolapse.....	84
research-related medical issues	85
Ascites Production	85
Experimental Autoimmune Encephalomyelitis Mouse Models	87
Hemophilic Mouse Models.....	88
Obese Mouse Models.....	88
Opportunistic Infections in Immunodeficient Mouse Models	90
Radiation Exposure	91
Streptozotocin Induction for Diabetic Models	94
Tumor Burden in Mouse Models.....	94
Urogenital Disease in Mouse Models	98

euthanasia	99
references	99
3 critical care management for laboratory rats	113
introduction	113
overall assessments	114
general medical approaches to physical examination and health assessments	114
Physical Examination	114
Body Condition Scoring	117
Clinical Assessments of Ill Health and Pain in Rats	117
Monitoring Frequency	119
Objective Scoring Systems	119
veterinary care measures	120
Administration of Fluids	120
Blood Sampling	122
Body Temperature Monitoring	125
Bone Marrow Access	125
Endotracheal Intubation	125
Injections and Oral Administration	128
Urine Sampling	129
abnormal, critical, and emergent conditions	131
Burns	132
Catheter Infections	133
Malocclusion (Incisors) and Caries	134
Moribund/Weak/Paralyzed	135
Ocular Lesions Secondary to Anesthesia	137
Poor Body Condition	137
Ringtail	139
Ulcerative Dermatitis	139
Urolithiasis	141
research-related medical issues	142
Arthritis Models	142
Cranial Implant Maintenance	143
Incontinence Secondary to Spinal Cord Injury Models	145
Middle Cerebral Artery Occlusion in Rat Models of Stroke	145
Obese and Diabetic Rat Models	146
Opportunistic Infections in Immunodeficient Rat Models	147
Pododermatitis	147

Spontaneously Hypertensive Rat Models	148
Tumor Burden in Rat Models	148
euthanasia	150
references	151
4 special considerations for critical care management	
in laboratory rodents	159
introduction	159
aging animal model considerations	160
blood loss considerations	162
chronic indwelling device considerations	163
depilatory cream considerations	163
equipment considerations for rodent surgery	
and emergency procedures	164
euthanasia considerations	165
experimental autoimmune encephalomyelitis	
and demyelinating disease model considerations	168
EAE Scoring	168
Animal Care	169
fasting considerations	170
fluid therapy considerations	171
Crystalloids	172
Colloids	173
food and fluid regulation procedures	173
humane or "clinical" endpoint considerations	175
nutritional therapy considerations	178
perioperative care considerations	181
regulatory considerations	186
restraint collar considerations	187
tracheostomy considerations	188
tumor development and monitoring considerations	189
Evaluating Tumor Growth	190
Tumor Ulceration	191
Multiple Tumors	191
Ascites Produced by Tumors	191
wound management considerations	192
references	193
5 resources and additional information	199
introduction	199
organizations	199

American Association for Laboratory Animal Medicine (AALAS)	199
American College of Laboratory Animal Medicine (ACLAM)	200
American Society of Laboratory Animal Practitioners (ASLAP)	200
Institute for Laboratory Animal Research (ILAR).....	201
publications.....	201
Books	201
Periodicals	203
electronic resources.....	203
AALAS Learning Library	203
Animal Care Training Services (ACTS).....	204
AVMA Guidelines for the Euthanasia of Animals: 2013 Edition	204
CompMed™ listserv	204
Drug Enforcement Agency (DEA), Office of Diversion Control	205
IACUC-Forum listserv	205
International Council for Laboratory Animal Science (ICLAS).....	205
International Mouse Strain Resource (IMSR).....	207
Mouse Genome Database	207
National Institutes of Health Office of Research Infrastructure Programs (ORIP): Rodent Resources.....	208
Office of Laboratory Animal Welfare.....	208
Pubmed	208
Rat Genome Database.....	209
TechLink listserv	209
Veterinary Bioscience Institute (VBI).....	209
Veterinary Emergency and Critical Care Society (VECCS)	210
Veterinary Information Network (VIN)	210
commercial resources.....	210
ALN Buyer's Guide	210
Lab Animal Buyer's Guide	211
appendix A: glossary of acronyms and terms.....	213
appendix B: suggested medical supplies for rodent critical care	215
appendix C: rodent formulary	217
Index	235
