
Contents

Chapter 1	The History of Pleurocarp Classification: Two Steps Forward, One Step Back.....	1
<i>William R. Buck</i>		
Chapter 2	The Phylogenetic Distribution of Pleurocarpous Mosses: Evidence from cpDNA Sequences.....	19
<i>Terry J. O'Brien</i>		
Chapter 3	Pleurocarpy in the Rhizogoniaceous Grade.....	41
<i>Neil E. Bell and Angela E. Newton</i>		
Chapter 4	Reevaluation of the Phylogeny of the Hypopterygiaceae (Bryophyta) Based on Morphological and Molecular Data.....	65
<i>Hans (J.D.) Kruijer and Rolf Blöcher</i>		
Chapter 5	Growth Patterns in <i>Calypstrochaeta</i> Desv. (Daltoniaceae).....	111
<i>Boon-Chuan Ho and Hans (J.D.) Kruijer</i>		
Chapter 6	Advances in Knowledge of the Brachytheciaceae (Bryophyta).....	117
<i>Sanna Huttunen, Anastasia A. Gardiner and Michael S. Ignatov</i>		
Chapter 7	Phylogenetic Relationships within the Moss Family Meteoriaceae in the Light of Different Datasets, Alignment and Analysis Methods.....	145
<i>Sanna Huttunen and Dietmar Quandt</i>		
Chapter 8	The Amblystegiaceae and Calliergonaceae.....	163
<i>Lars Hedenäs and Alain Vanderpoorten</i>		
Chapter 9	On the Relationships of Mosses of the Order Hypnales, with Special Reference to Taxa Traditionally Classified in the Leskeaceae.....	177
<i>Michael S. Ignatov, Anastasia A. Gardiner, Vera K. Bobrova, Irina A. Milyutina, Sanna Huttunen, and Alexey V. Troitsky</i>		
Chapter 10	Phylogeny of <i>Hygrohypnum</i> Lindb. Based on Molecular Data.....	215
<i>Gisela Oliván, Lars Hedenäs, and Angela E. Newton</i>		

Chapter 11 Morphological Characters and Their Use in Pleurocarpous Moss Systematics	227
<i>Lars Hedenäs</i>	
Chapter 12 Character Reduction and Peristome Morphology in Entodontaceae: Constraints on an Information Source	247
<i>E. M. Kungu, Royce Longton, and L. Bonner (deceased)</i>	
Chapter 13 Homologies of Stem Structures in Pleurocarpous Mosses, Especially of Pseudoparaphyllia and Similar Structures.....	269
<i>Michael S. Ignatov and Lars Hedenäs</i>	
Chapter 14 Branching Architecture in Pleurocarpous Mosses	287
<i>Angela E. Newton</i>	
Chapter 15 Sympodial and Monopodial Growth in Mosses: Examples from the Lembophyllaceae (Bryopsida)	309
<i>Ray Tangney</i>	
Chapter 16 Did Pleurocarpous Mosses Originate before the Cretaceous?.....	321
<i>Michael S. Ignatov and Dmitry E. Shcherbakov</i>	
Chapter 17 Dating the Diversification of the Pleurocarpous Mosses	337
<i>Angela E. Newton, Niklas Wikström, Neil Bell, Laura Lowe Forrest, and Michael S. Ignatov</i>	
Chapter 18 Phylogenetic and Morphological Studies within the Ptychomniales, with Emphasis on the Evolution of Dwarf Males	367
<i>Niklas Pedersen and Angela E. Newton</i>	
Chapter 19 Biogeography of Austral Pleurocarpous Mosses: Distribution Patterns in the Australasian Region	393
<i>Ray Tangney</i>	
Index	409
