

Contents

Preface, vii

HISTORICAL PERSPECTIVE

Odyssey of Auxin, 1

Steffen Abel and Athanasios Theologis

AUXIN SYNTHESIS AND TRANSPORT

Approaching Cellular and Molecular Resolution of Auxin Biosynthesis and Metabolism, 15

Jennifer Normanly

Auxin Transporters—Why So Many?, 33

Eva Zažímalová, Angus S. Murphy, Haibing Yang, Klára Hoyerová, and Petr Hošek

AUXIN PERCEPTION AND CELLULAR RESPONSES

Auxin Perception—Structural Insights, 47

Luz Irina Calderon-Villalobos, Xu Tan, Ning Zheng, and Mark Estelle

Cellular Responses to Auxin: Division versus Expansion, 63

Catherine Perrot-Rechenmann

AUXIN IN DEVELOPMENT

Modeling Auxin-regulated Development, 79

Pawel Krupinski and Henrik Jönsson

Auxin Control of Embryo Patterning, 93

Barbara Möller and Dolf Weijers

Auxin at the Shoot Apical Meristem, 107

Teva Vernoux, Fabrice Besnard, and Jan Traas

Auxin Control of Root Development, 121

Paul Overvoorde, Hidehiro Fukaki, and Tom Beeckman

Control of Leaf and Vein Development by Auxin, 137

Enrico Scarpella, Michalis Barkoulas, and Miltos Tsiantis

Contents

Distinct and Dynamic Auxin Activities During Reproductive Development, 155

Eva Sundberg and Lars Østergaard

Auxin and Monocot Development, 169

Paula McSteen

SIGNAL INTEGRATION

Do Trees Grow on Money? Auxin as the Currency of the Cellular Economy, 187

Jodi L. Stewart and Jennifer L. Nemhauser

Context, Specificity, and Self-Organization in Auxin Response, 201

Marta Del Bianco and Stefan Kepinski

Integration of Light and Auxin Signaling, 221

Karen J. Halliday, Jaime F. Martínez-García, and Eve-Marie Josse

Auxin and Plant-Microbe Interactions, 233

Stijn Spaepen and Jos Vanderleyden

Index, 247
