

Contents

Preface, vii

Bacterial Chromosome Organization and Segregation, 1

Esteban Toro and Lucy Shapiro

Synchronization of Chromosome Dynamics and Cell Division in Bacteria, 17

Martin Thanbichler

The Structure and Function of Bacterial Actin Homologs, 33

Joshua W. Shaevitz and Zemer Gitai

Protein Subcellular Localization in Bacteria, 51

David Z. Rudner and Richard Losick

Poles Apart: Prokaryotic Polar Organelles and Their Spatial Regulation, 65

Clare L. Kirkpatrick and Patrick H. Viollier

The Bacterial Cell Envelope, 79

Thomas J. Silhavy, Daniel Kahne, and Suzanne Walker

Cell Biology of Prokaryotic Organelles, 95

Dorothee Murat, Meghan Byrne, and Arash Komeili

Bacterial Nanomachines: The Flagellum and Type III Injectisome, 113

Marc Erhardt, Keiichi Namba, and Kelly T. Hughes

Membrane-associated DNA Transport Machines, 135

Briana Burton and David Dubnau

Myxobacteria, Polarity, and Multicellular Morphogenesis, 155

Dale Kaiser, Mark Robinson, and Lee Kroos

Cyanobacterial Heterocysts, 181

Krithika Kumar, Rodrigo A. Mella-Herrera, and James W. Golden

Biofilms, 201

Daniel López, Hera Vlamakis, and Roberto Kolter

Electron Cryotomography, 213

Elitza I. Tocheva, Zhuo Li, and Grant J. Jensen

Contents

Single-Molecule and Superresolution Imaging in Live Bacteria Cells, 233

Julie S. Biteen and W.E. Moerner

Automated Quantitative Live Cell Fluorescence Microscopy, 247

Michael Fero and Kit Pogliano

Index, 259
