Preface	v
Contributors	ix
CH. 1. Overview	
<i>Mark R. McLellan and John G. Day</i>	1
CH. 2. Virus Cryopreservation and Storage	
<i>Ernest A. Gould</i>	7
CH. 3. Freeze-Drying and Cryopreservation of Bacteria	
<i>Stephen F. Perry</i>	21
CH. 4. Freeze-Drying of Yeasts	
<i>Sugio Kawamura, Yukie Murakami, Yukie Miyamoto,</i> <i>and Kazuo Kimura</i>	31
CH. 5. Cryopreservation of Yeast Cultures	
<i>Chris J. Bond</i>	39
CH. 6. Cryopreservation and Freeze-Drying of Fungi	
<i>Jacqueline A. Kolkowski and David Smith</i>	49
CH. 7. Cryopreservation of Pathogenic and Nonpathogenic Free-Living Amoebae	
<i>Simon Kilvington</i>	63
CH. 8. Long-Term Cryopreservation of Thylakoid Membranes	
<i>Dirk K. Hincha and Jürgen M. Schmitt</i>	71
CH. 9. Cryopreservation of Algae	
<i>John G. Day and Mitzi M. DeVille</i>	81
CH. 10. Cryopreservation of Plant Protoplasts	
<i>Brian W. W. Grout</i>	91
CH. 11. A Two-Step or Equilibrium Freezing Procedure for the Cryopreservation of Plant Cell Suspensions	
<i>Elly W. M. Schrijnemakers and Frank Van Iren</i>	103
CH. 12. Vitrification of Plant Cell Suspensions	
<i>Poula J. Reinhoud, Atsuko Uragami, Akira Sakai,</i> <i>and Frank Van Iren</i>	113
CH. 13. Cryopreservation of Shoot-Tips and Meristems	
<i>Erica E. Benson</i>	121

CH. 14.	Cryopreservation of Seeds <i>Hugh W. Pritchard</i>	133
CH. 15.	Cryopreservation of the Sperm of the Pacific Oyster <i>Crassostrea gigas</i> <i>Iain R. B. McFadzen</i>	145
CH. 16.	Cryopreservation of Fish Spermatozoa <i>Krishen J. Rana</i>	151
CH. 17.	Cryopreservation of Avian Spermatozoa <i>Graham J. Wishart</i>	167
CH. 18.	Cryopreservation of Animal and Human Cell Lines <i>Christopher B. Morris</i>	179
CH. 19.	Cryopreservation of Semen from Domestic Livestock <i>Mark R. Curry</i>	189
CH. 20.	Cryopreservation of Mammalian Embryos: <i>Slow Cooling</i> <i>Jocelyn E. Hunter</i>	199
CH. 21.	Cryopreservation of Mammalian Embryos: <i>Vitrification</i> <i>Magosaburo Kasai</i>	211
CH. 22.	Cryopreservation of Human Gametes <i>Jocelyn E. Hunter</i>	221
CH. 23.	Cryopreservation of Human Red Blood Cells <i>Michael J. G. Thomas and Susan H. Bell</i>	235
