

CONTENTS

Preface	ix
Foreword Peter F. Sale	xi
List of contributors	xiii

PART I BASIC ECOLOGY

1	Sensory biology and navigation behavior of reef fish larvae Jelle Atema, Gabriele Gerlach, and Claire B. Paris	3
2	Mission impossible: unlocking the secrets of coral reef fish dispersal Geoffrey P. Jones	16
3	Recruitment of coral reef fishes: linkages across stages Su Sponaugle	28
4	Competition in reef fishes Graham E. Forrester	34
5	Predation: piscivory and the ecology of coral reef fishes Mark A. Hixon	41

PART II PATTERNS AND PROCESSES

6	The evolution of fishes on coral reefs: fossils, phylogenies, and functions David R. Bellwood, Christopher H.R. Goatley, Peter F. Cowman, and Orpha Bellwood	55
7	Phylogeography of coral reef fishes Jeff A. Eble, Brian W. Bowen, and Giacomo Bernardi	64
8	How many coral reef fish species are there? Cryptic diversity and the new molecular taxonomy Benjamin C. Victor	76
9	Large-scale patterns and processes in reef fish richness Camilo Mora	88
10	Patterns and processes in geographic range size in coral reef fishes Benjamin I. Ruttenberg and Sarah E. Lester	97

- 11 Patterns and processes in reef fish body size
Michel Kulbicki, Valeriano Parravicini, and David Mouillot
- 12 Multi-scale patterns and processes in reef fish abundance
M. Aaron MacNeil and Sean R. Connolly

PART III HUMAN FINGERPRINTS

- 13 Effects of climate change on coral reef fishes
Morgan S. Pratchett, Shaun K. Wilson, and Philip L. Munday
- 14 Effects of fishing on the fishes and habitat of coral reefs
Edward E. DeMartini and Jennifer E. Smith
- 15 Effects of sedimentation, eutrophication, and chemical pollution on coral reef fishes
Amelia S. Wenger, Katharina E. Fabricius, Geoffrey P. Jones, and Jon E. Brodie
- 16 Impacts of invasive species on coral reef fishes
Isabelle M. Côté and John F. Bruno
- 17 Cashing in on coral reefs: the implications of exporting reef fishes
Yvonne Sadovy de Mitcheson and Xueying Yin

PART IV CONSERVATION

- 18 Resilience in reef fish communities
Tim McClanahan
- 19 Phase shifts and coral reef fishes
Nicholas A.J. Graham
- 20 Extinction risk in reef fishes
Loren McClenahan
- 21 A perspective on the management of coral reef fisheries
Alan M. Friedlander
- 22 Linkages between social systems and coral reefs
Joshua E. Cinner and John N. Kittinger

PART V DEBATES AND PARADIGM SHIFTS

- 23 Is dispersal of larval reef fishes passive?
Jeffrey M. Leis
- 24 Density dependence and independence and the population dynamics of coral reef fishes
Nick Tolimieri

25	Equilibrial versus non-equilibrial dynamics in coral reef fishes Mark A. Steele	232
26	Cryptic density dependence: integrating supply-side ecology with population regulation Jeffrey S. Shima and Craig W. Osenberg	236
27	Priority effects Myra J. Shulman	242
28	Inverted trophic pyramids Stuart A. Sandin and Brian J. Zgliczynski	247
29	Shifting baselines in coral reef fishes Enric Sala	252
30	Pluralism explains diversity in the Coral Triangle Paul H. Barber and Christopher P. Meyer	258
31	Reef fish biogeographical regions John C. Briggs	264
32	Size and sex change Robert R. Warner	267
33	Quantifying reef fishes: bias in observational approaches Paolo Usseglio	270
34	Seascape ecology of fishes on coral reefs Simon J. Pittman and Andrew D. Olds	274
35	The future for coral reef fishes Peter F. Sale	283
36	Perpetual struggle for conservation in a crowded world and the needed paradigm shift for easing ultimate burdens Camilo Mora	289
