<i>Preface</i>	page xvii
Part I Introduction	1
1 Introducing the Paradox	3
1.1 Fermi and His Paradox	3
1.1.1 The Paradox, in Brief	3
1.1.2 Fermi's Paradox Is Not His, and It Isn't a Paradox	4
1.2 Drake and His Equation	7
1.3 The Great Filter	11
2 Fact A – The Great Silence	15
2.1 Radio SETI	21
2.1.1 The Water Hole	21
2.1.2 Doppler Drift	24
2.1.3 Radio Frequency Interference	24
2.1.4 Single-Dish Radio Astronomy	25
2.1.5 Multi-Dish Radio Interferometry	27
2.1.6 A History of Radio SETI observations	30
2.2 Optical SETI	30
2.2.1 Artefact SETI	35
2.2.2 A History of Optical SETI Observations	37
3 Classifying Scenarios and Solutions to the Paradox	38
3.1 Contact Scenarios and the Rio Scale	38
3.2 The Three Classes of Civilisation – the Kardashev Scale	40
3.3 The Three Classes of Solutions to Fermi's Paradox	43
3.3.1 Rare Earth (R) Solutions	43
3.3.2 Uncommunicative (U) Solutions	44

3.3.3	Catastrophic (C) Solutions	44
3.3.4	Hard and Soft Solutions	44
Part II	Rare Earth Solutions	45
4	Habitable Worlds Are Rare	47
4.1	Worlds Are Not Rare	47
4.1.1	The First Exoplanets – Pulsar Timing	47
4.1.2	The Radial Velocity Method	48
4.1.3	Transit Detection	53
4.1.4	Gravitational Microlensing	56
4.1.5	Direct Imaging	61
4.1.6	Detecting Life on Exoplanets	64
4.1.7	The Exoplanet Population	68
4.2	Habitable Zones	71
4.2.1	Circumstellar Habitable Zones	71
4.2.2	Galactic Habitable Zones	75
4.3	The Earth as a Habitable Planet	84
4.4	Good and Bad Planetary Neighbours	87
4.4.1	Milankovitch Cycles	87
4.4.2	Planetary Neighbours as Asteroid Shields	89
4.5	Does the Earth Need the Moon To Be Habitable?	91
4.5.1	What Influence Does the Moon Have on Earth's Habitability?	91
4.5.2	What If the Moon Never Existed?	93
4.5.3	Are Large Moons Common in Terrestrial Planet Formation?	95
5	Life Is Rare	98
5.1	What Is Life?	98
5.2	The Origins of Life	100
5.2.1	Oparin-Haldane Theory and the Miller-Urey Experiments	101
5.2.2	'Vents' Theories	103
5.2.3	'Pools' Theories	104
5.2.4	Multiple Origins of Life?	104
5.3	The Major Evolutionary Transitions in Terrestrial Organisms	104
5.3.1	Free-Floating Self-Replicating Molecules to Molecules in Compartments	105
5.3.2	Independent Replicators to Chromosomes	105

5.3.3	Cyanobacteria to Photosynthesis	109
5.3.4	Prokaryotes to Eukaryotes	111
5.3.5	Single-Cell to Multicellular Organisms	112
5.3.6	Asexual Reproduction to Sexual Reproduction	115
5.3.7	The Brain	119
5.3.8	Solitary Individuals to Social Units	121
5.3.9	Social Units to Civilisation	125
5.3.10	Biology to Post-Biology?	125
6	Intelligence Is Rare	127
6.1	The Evolutionist Argument against Intelligence	127
6.2	What Is Intelligence?	129
6.3	How Did Humans Become Intelligent?	130
6.3.1	Why Be Intelligent at All?	135
6.4	What Is the Role of Language?	136
6.4.1	The Origin of Human Language	136
6.4.2	Possible Biological Origins of Language	139
6.4.3	What Can We Say About the Language of ETIs?	141
6.4.4	Non-Human Communication	141
6.5	What Is the Role of Art?	145
6.6	What Is the Role of Science and Mathematics?	149
6.7	What Is the Role of Political Structures?	150
Part III	Catastrophist Solutions	153
7	Doomsday Arguments	155
7.1	The Carter-Leslie Argument	155
7.2	Gott's Argument	157
8	Death by Impact	159
8.1	Asteroids	159
8.2	Comets	160
8.3	The Risk of Impact on Earth	161
8.4	The Consequences of Impact	164
8.5	Impact as an Existential Risk to ETIs	166
9	Death by Terrestrial Disaster	169
9.1	Supervolcanism	169
9.2	Magnetic Field Collapse	173

10	Death by Star	179
10.1	Stellar Activity	179
10.1.1	Solar Winds	181
10.1.2	Flares and Coronal Mass Ejections	181
10.1.3	Earth's Protection from Stellar Activity	184
10.2	Stellar Evolution	184
10.3	Death by Stellar Evolution	190
10.4	Death by Red Giant	191
10.5	Death by Supernova	194
10.5.1	Type Ia (White Dwarf Nova)	194
10.5.2	Type II Supernovae (Core-Collapse)	196
10.6	Close Stellar Encounters	198
11	Death on a Galactic Scale?	201
11.1	Active Galactic Nuclei	201
11.2	Gamma Ray Bursts	204
11.3	Terrestrial Atmospheric Responses to Very High-Energy Events	206
11.3.1	UV Radiation	206
11.3.2	Gamma and X-Rays	207
11.3.3	Cosmic Rays	207
11.3.4	Muons and Other Secondary Particles	208
11.3.5	The Role of Heliospheric Screening	208
11.3.6	Mitigation against High-Energy Radiation Events	209
12	Death by Unsustainable Growth	212
13	Death by Self-Induced Environmental Change	218
13.1	Atmospheric Damage	218
13.2	Destruction of the Land Environment	221
13.3	Destruction of the Ocean Environment	222
13.4	Destruction of the Biosphere	223
13.5	Destruction of the Space Environment (Kessler Syndrome)	224
14	Self-Destruction at the Nanoscale	228
14.1	Genetic Engineering	228
14.2	Nanotechnology, Nanomachines and 'Grey Goo'	230
14.3	Estimates of Existential Risk from Nanoscale Manipulation	231
15	Artificial Intelligence and the Singularity	234
15.1	The Turing Machine	235
15.2	A Brief History of AI Techniques	236

15.2.1	Logic-Driven AI: Symbolic Approaches	236
15.2.2	Biologically Motivated Approaches	239
15.2.3	Data-Driven Approaches	241
15.3	The Turing Test	242
15.4	Is the Singularity Inevitable?	243
15.5	Controls on AI	245
15.6	Is Strong AI Likely?	246
16	War	248
16.1	The Origins of Human Warfare	249
16.2	Is Violence Innate to Humans?	250
16.3	Nuclear War and Weapons of Mass Destruction	251
16.4	Is War Inevitable amongst Intelligent Civilisations?	253
17	Societal Collapse	254
17.1	Common Causes of Societal Collapse	255
17.2	Intellectual Collapse	258
Part IV	Uncommunicative Solutions	259
18	Intelligent Life Is New	261
18.1	Carter's Argument against SETI	261
18.2	Global Regulation Mechanisms and the Phase Transition Solution	262
19	Exploration Is Imperfect	265
19.1	Percolation Theory Models	265
19.2	Exploration of Realistic Star Fields	267
19.3	Human Designs for Interstellar Probes	270
19.3.1	Chemical Rockets	271
19.3.2	External Nuclear Pulse Propulsion	271
19.3.3	Internal Nuclear Pulse Propulsion	272
19.3.4	Antimatter Drive	273
19.3.5	The Interstellar Ramjet	274
19.3.6	Light Sails	275
19.3.7	Gravitational Assists	278
19.3.8	Relativistic Effects	279
20	Probe Exploration Is Dangerous	282
20.1	The Self-Replicating Probe	282
20.2	Can Probes Self-Replicate without Evolving?	284
20.3	Predators and Prey	285

21	The Aliens Are Quiet	291
21.1	They Communicate at a Different Frequency	291
21.2	They Communicate Using a Different Method	296
21.2.1	Neutrinos	296
21.2.2	Gravitational Waves	298
21.3	We Do Not Understand Them	304
21.4	They Do Not Communicate	306
21.4.1	Arguments in Favour of METI	306
21.4.2	Arguments against METI	313
21.4.3	Can the METI Debate Be Resolved?	316
22	They Live Too Far Away	317
22.1	The Feasibility of Crewed Interstellar Travel	318
22.2	The Feasibility of Reliable Interstellar Communication Networks	322
23	The Zoo/Interdict Hypothesis	326
24	The Simulation Hypothesis	330
24.1	How Much Computing Power Is Needed?	332
24.2	Where Could We Get It From?	334
24.2.1	The Matrioshka Brain	335
24.3	Arguments against the Simulation Hypothesis	336
25	They Are Already Here	338
25.1	Bracewell or 'Lurker' Probes	338
25.2	Unidentified Flying Objects and Accounts of Alien Abduction	342
26	They Were Here Long Ago	346
26.1	The 'Ancient Astronaut' Hypothesis	347
Part V	Conclusions	351
27	Solving Fermi's Paradox	353
27.1	The Future of Fact A	353
27.1.1	Current and Future Radio/Optical SETI Missions	353
27.1.2	Gravitational Waves and SETI	355
27.1.3	Neutrino SETI	355
27.1.4	Transit SETI	356
27.2	Future Attempts at Interstellar Missions	358
27.3	Theoretical and Numerical Advances	360

27.3.1 Numerical Modelling of Civilisation Growth, Evolution and Interaction	361
27.3.2 Characterising Observables of Intelligence in Astrophysical Data	364
27.4 Can the Paradox Be Solved?	367
<i>Appendix A</i> A Database of Solutions to Fermi's Paradox	370
A.1 Rare Earth Solutions	370
A.2 Catastrophist Solutions	372
A.3 Uncommunicative Solutions	373
<i>References</i>	375
<i>Index</i>	411
