Preface	page ix
1 The Framework	1
What Is Behavior?	1
What Do We Want to Know about Behavior?	8
The Relation of Cause and Function	16
The Functional Study of Behavior	21
2 Structure of Behavior: Actions, Perceptions, Representations, Behavior Systems	23
Motor Mechanisms: Actions	23
Perceptual Mechanisms: Perceptions	28
Central Mechanisms: Representations	35
Central Mechanisms: Comparator Mechanisms, Oscillators	36
Central Coordinating Mechanisms: Behavior Systems	38
Relation of Behavior Systems to Other Structural Concepts	44
3 Motivation: Immediate Causes of Behavior	59
Some Motivational Issues	60
Causal Factors	65
Causal Factors Controlling Some Specific Behavior Systems	71
Mechanisms of Behavioral Change	81
A Case Study: Incubation and Brooding in Hens	84

	Interactions among Behavior Systems	88
	Theories of Motivation	97
4	Motivational Consequences of Behavior: Emotion, Homeostasis, Expectancies, Orientation, Rhythms	101
	Human Emotion	102
	Non-human Emotion	107
	A Comparison of Behavioral Categories	110
	Feedback Mechanisms and Homeostasis	111
	Expectancies	116
	Orientation	118
	Biological Rhythms and other Timing Mechanisms	126
5	Ontogeny of Structure: Development of Behavior Systems	133
	The 'Gustofacial Reflex': A Prefunctionally Developed System	134
	Development of Perceptual Mechanisms	136
	Development of Motor Mechanisms	145
	Development of Connections between Central and Motor Mechanisms	151
	Development of Connections between Perceptual and Central Mechanisms	154
	Development of Connections among Perceptual, Central, and Motor Mechanisms	159
	Development of Interactions among Behavior Systems	167
	Two Special Behavior Systems: Human Language and Circadian System	169
6	Ontogeny of Structure: Some Principles of Development	177
	Genetic and Environmental Interaction in Development	178
	Development of the Nervous System	183
	Development of Behavior Mechanisms	185
	General Issues in Development: Modularity, Constraints, Processes	187
	The Role of Early Social Experience	195
	Conclusions	197
	Some Functional Considerations	199

7	Causes and Consequences of Development: Reinforcement, Learning, Memory, Thinking	205
	Reinforcement	205
	Learning	212
	Memory	230
	Thinking	233
8	Phylogeny of Structure: Evolution of Behavior	242
	Evolution Is History	243
	Evolution of Motor Mechanisms	243
	Evolution of Perceptual Mechanisms	249
	Evolution of Central Mechanisms	251
	Domestication (Artificial Selection)	254
	Cultural Transmission and Evolution	255
	Mechanisms of Evolution: A Brief Excursion into Evolutionary Biology	263
9	Phylogenetic Consequences: Survival Value (Current Fitness)	273
	The Concept of Fitness	275
	Foraging and Feeding	276
	Defense	283
	Reproduction	287
	When Fitnesses Collide	294
10	Phylogenetic Consequences: Adaptations and Historical Origins	298
	The Concept of Adaptation	299
	Adaptive Radiation	309
	Sexual Selection	312
	Inclusive Fitness, Kin Selection, and Cooperation	316
	Exaptations and Constraints on Evolution	316
	Animal Personality and Individual Variation	318
	Evolutionary Perspectives on Human Behavior	320
	Postscript: Cause and Function Again	323
	Afterword	325
	References	327
	Name Index	363
	Subject Index	368
