

CONTENTS

CHAP.	PAGE
I. INTRODUCTION	1
II. METHODS OF WORKING	7
I. Discussion of Methods	7
1. Water cultures	7
2. Sand cultures	8
3. Soil cultures in pots	8
4. Field experiments	9
II. Details of Methods	10
III. EFFECT OF COPPER COMPOUNDS	15
I. Presence of Copper in Plants	15
II. Effect of Copper on the Growth of Higher Plants	17
1. Toxic effect	17
(a) Toxic action of copper compounds alone in water cultures	17
(b) Masking effect caused by addition of soluble substances to solutions of copper salts	20
(c) Effect of adding insoluble substances to solutions of copper salts	22
(d) Effect of copper on plant growth when present in soils	24
(e) Mode of action of copper on plants	25
2. Effect of copper on germination	27
(a) Seeds	27
(b) Spores and pollen grains	28
3. Does copper stimulate higher plants?	28
4. Action of copper on organs other than roots	30
III. Effect of Copper on Certain of the Lower Plants	33
Conclusion	35
IV. EFFECT OF ZINC COMPOUNDS	36
I. Presence of Zinc in Plants	36
II. Effect of Zinc on the Growth of Higher Plants	38
1. Toxic effect	38
(a) Toxic action of zinc salts alone in water cultures	38
(b) Effect of soluble zinc salts in the presence of nutrients	39
(c) Effect of zinc compounds on plant growth when they are present in soils	41
(d) Mode of action of zinc on plants	43

CHAP.	PAGE
2. Effect of zinc compounds on germination	43
3. Stimulation induced by zinc compounds	44
(a) Stimulation in water cultures	45
(b) Stimulation in sand cultures	46
(c) Increased growth in soil	46
4. Direct action of zinc salts on leaves.	47
III. Effect of Zinc on Certain of the Lower Plants	48
Conclusion	50
V. EFFECT OF ARSENIC COMPOUNDS	51
I. Presence of Arsenic in Plants	51
II. Effect of Arsenic on the Growth of Higher Plants	52
1. Toxic effect	52
(a) Toxic action of arsenic compounds in water cultures in the presence of nutrients	52
(b) Toxic effect of arsenic compounds in sand cultures	57
(c) Toxic effect of arsenic when applied to soil cultures	57
(d) Physiological considerations	58
2. Effect of arsenic compounds on germination	60
3. Do arsenic compounds stimulate higher plants?	61
III. Effect of Arsenic Compounds on Certain of the Lower Plants	61
1. Algae	61
2. Fungi	62
Conclusion	64
VI. EFFECT OF BORON COMPOUNDS	65
I. Presence of Boron in Plants	65
II. Effect of Boron on the Growth of Higher Plants.	67
1. Toxic effect	67
(a) Toxic action of boron compounds in water cultures.	67
(b) Toxic action of boron compounds in sand cultures	70
(c) Toxic action of boron compounds in soil experiments	70
2. Effect of boron compounds on germination	73
3. Does boron stimulate higher plants?	74
(a) Water cultures.	75
(b) Sand cultures	75
(c) Soil cultures	75
4. Rôle of boron in plant growth	77
III. Effect of Boron Compounds on Certain of the Lower Plants	81
Conclusion	83

CHAP.	PAGE
VII. EFFECT OF MANGANESE COMPOUNDS	84
I. Presence of Manganese in Plants.	84
II. Effect of Manganese on the Growth of Higher Plants.	88
1. Toxic effect	88
(a) Toxic action of manganese compounds in the presence of soluble nutrients	88
(b) Toxic action of manganese compounds in sand cultures	90
(c) Toxic action of manganese compounds in soil cultures	90
2. Effect of manganese compounds on germination	92
3. Does manganese stimulate higher plants?	93
(a) Stimulation in water cultures	93
(b) Stimulation in soil cultures	96
III. Effect of Manganese Compounds on Certain of the Lower Plants	100
IV. Physiological Considerations of Manganese Stimulation and Rôle of Manganese in Plants	101
Conclusion	103
VIII. CONCLUSIONS	104
BIBLIOGRAPHY	108
INDEX OF PLANT-NAMES	129
GENERAL INDEX	132
