

Contents

Preface	page vii
Acknowledgments	viii
Chapter 1 Introduction	
Utility of zebrafish as an animal model for study of oncogenesis and developmental defects	1
Fixation and histologic methods for microscopy of zebrafish	2
Chapter 2 Cross section and longitudinal section atlas	
Cross section atlas	5
Longitudinal section atlas	29
Chapter 3 Integument (skin)	
Epidermis	52
Dermis	54
Lateral line system	56
Chapter 4 Digestive system	
Oropharynx	58
Esophagus	60
Intestinal bulb	60
Mid intestine	60
Posterior intestine and anus	60
Chapter 5 Respiratory system	
Gills	68
Pseudobranch	71
Chapter 6 Circulatory system	
Heart	77
Arteries	77
Veins	77
Chapter 7 Liver and gallbladder	
Liver	80
Gallbladder	81

Chapter 8 Pancreas	86
Chapter 9 Endocrine organs	
Thyroid	90
Ultimobranchial gland	90
Pituitary gland	90
Parathyroid gland	92
Corpuscles of Stannius	92
Urophysis	94
Adrenal gland	94
Chapter 10 Kidney	
Glomerulus	98
Proximal and distal tubules	98
Large collecting duct	100
Urinary bladder	100
Chapter 11 Reproductive system	
Testes	102
Ovaries	105
Chapter 12 Sensory systems	
Olfactory sac	114
Eye	114
Ear	115
Lateral line system	115
Chapter 13 Central nervous system	
Telencephalon	122
Diencephalon	122
Mesencephalon	122
Metencephalon	122
Myelencephalon	124
Spinal cord	128
Chapter 14 Miscellaneous structures	
Spleen	130
Thymus	130
Gas bladder	130
Chapter 15 Musculoskeletal system	
Skeletal system	134
Fins	136
Muscular system	136
Index	144
