Preface	page ix
Acknowledgements	xi
1 What is an animal?	1
2 Before there were animals	13
3 How to make a fossil	25
4 The Cambrian explosion	35
5 How to make a species	45
6 Jellyfish and their kin	56
7 How to make a tree	67
8 The enigmatic urbilaterian	77
9 Animal symmetry and heads	85
10 A plethora of worms	94
11 Trends in animal complexity	104
12 Where the octopus is king	113
13 How to make an animal	123
14 Exoskeletons galore	135
15 Extinction	146
16 Mouth first, mouth second	156
17 Comparing embryos	166
18 Larvae, mouthparts and moulting	177
19 The animal toolkit	187
20 Vertebrate origins and evolution	201
21 From water to land to water	212
22 Variation and inheritance	222
23 Evolutionary novelties	232

24	Human origins and evolution	241
25	Animal plasticity	251
26	The nature of adaptation	262
27	The direction of evolution	274
28	Animal extremophiles	285
29	Extraterrestrial animals?	295
30	The ghost in the machine	305
	Appendix	319
	References	324
