<i>Introduction: When Biospheres Collide</i>	<i>page 1</i>
Part I Approaches	11
1 History	13
Lunarians: The Great Moon Hoax/Satire (1835)	15
The Martians Are Coming! The Great Martian "Panic" (1938)	19
"A bit of 'scruff'": Pulsars and Little Green Men (1967)	23
Extraordinary Claims: Fossils from Mars? (1996)	26
The Lessons of History	35
2 Discovery	37
The Anatomy of Discovery	39
Eureka Denied: The Extended Nature of Discovery	39
The General Structure of Discovery	43
Scenarios for Alien Life Discovery	45
Direct Contact with Microbial Life: Contamination to Human Exploration	47
Indirect Contact with Microbial Life: Robotic Exploration to Biosignatures	49
Direct Contact with Intelligent Life: UFOs to Human Exploration	51
Indirect Contact with Intelligent Life: SETI, METI, and Artifacts	54
The Structure of Alien Life Discovery	59
Level 1 Structure: Prediscovery, Discovery, Postdiscovery	59
Level 2 Structure: History, Imagination, Analogy	62
3 Analogy	65
The Promise and Problems of Analogy	67
The Microbe Analogy: Discovering the Microcosmos	71

The Culture Contact Analogy: Direct Contact with Intelligence	76
The Transmission/Translation Analogy: Remote Contact with Intelligence	88
The Worldview Analogy: Copernicus, Darwin, Hubble	92
The Lessons of Analogy	96
Part II Critical Issues	97
4 Can We Transcend Anthropocentrism?	99
Life and Intelligence	101
Microbial Life: Scaffolding, Genetics, and Solvents, Oh My!	102
Complex Life: Chance and Necessity for Body Plans	105
Intelligent Life: What Is It?	110
Postbiological Intelligence: Taking Cultural Evolution Seriously	116
The Landscape of Life and Intelligence	123
Culture and Civilization	126
A Cultural Universe?	126
Civilizations in Space and Time	128
Technology and Communication	132
Does Technology Converge?	133
Can Humans Communicate with Aliens?	134
The Problem of Universals	137
5 Is Human Knowledge Universal?	141
On Human and Nonhuman Understanding	143
Philosophy of Knowledge: Is the Universe Real?	144
Mind and Body: From Embodied Mind to Astrocognition	151
Evolutionary Biology and Epistemology	154
Universal Science and Mathematics?	156
Is $2 + 2 = 4$ for Aliens?	157
The Orientation of Alien Science	159
The Conceptualization of Alien Science	163
Are the "Human Sciences" Universal?	166
The Contingency of the Human Sciences	166
Aspirations for Universality	168
Why Should We Care?	172
6 How Can We Envision Impact?	176
A Framework for Societal Impact	178
The Anatomy of Impact	178

Imagining Impact: Science Fiction and Alien Life	185
Direct Impacts: Face to Face with the Alien	185
Indirect Impacts: Coping with the Message	188
The Fate of Humanity	190
Deducing Impact: Between Imagination and Prediction	191
A Matter of Statistics?	192
A Gathering of Scholars	195
Attempts at Synthesis	201
The Significance of Detection	202
Where We Stand	203
Part III Impact!	207
7 Astroculture: Transforming Our Worldviews	209
A Hierarchy of Worldviews	210
Cosmological Worldviews: The Rise of the Biological Universe	212
From the Physical World to the Biological Universe	213
Forms of the Biological Universe	216
Impact of Astrobiological Worldviews on Culture	218
Theological Worldviews: The Rise of Astrotheology	220
History and Astrotheology: A Planet-Hopping Jesus?	221
Theological Reactions to Astrobiology	222
The View from Popular Culture	226
Astrotheology or Astrophilosophy? The Case of Cosmotheology	229
Cultural Worldviews: The Rise of Astroculture	230
The Impact of the Space Age: The Cosmic Connection	231
Captured by Aliens	236
The Gutenberg Effect and the Internet Revolution as Analogy	237
8 Astroethics: Interacting with Alien Life	240
The Moral Status of Alien Organisms	242
Where Does Ethics Come From?	242
What Do We Value?	245
What Is the Moral Status of Aliens?	248
On Good and Evil: Altruism in the Universe	249
A Spectrum of Possibilities	249
Evolutionary Ethics	251
How Should We Treat Alien Life?	257
Do Martian Microbes Have Rights?	257
Of Animals, Aliens, and Postbiologicals	260
Toward a Cosmocentric Ethic	263

9	Astropolicy: Preparing for Discovery	269
	Preparing for Discovery: Policies, Protocols, and Strategies	271
	Developing Policy for Astrobiology Impact	271
	Issues and Policy for Microbial Life Impact	275
	Issues and Policy for SETI and METI Impact: Who Speaks for Earth?	279
	Managing Discovery: Ten Stages Involving Scientists, Government, Media, and the Public	288
	Confirmation	288
	Announcement	289
	Assessment of Validity and Scientific Importance	290
	Assessment of Risk and Impact	291
	Government Involvement	292
	Role of the Media	292
	Public Reaction	293
	Public Education	293
	Further Scientific Research	294
	Informed Action	294
	Embracing Discovery: From Space Law to Metalaw	294
	Alien Microbes and Space Law	295
	Alien Intelligence and Metalaw	296
10	Summary and Conclusions: At Home in the Biological (or Postbiological) Universe	303
	Characterizing Discovery and Impact	304
	Preparing for Discovery	305
	Transforming Our Thinking	309
	Envoi	311
	Notes	313
	Bibliography	343
	Index	375
