

CONTENTS IN BRIEF

INTRODUCTION

INTRODUCTION

- 1 Invitation to Biology

UNIT I PRINCIPLES OF CELLULAR LIFE

- 2 Life's Chemical Basis
- 3 Molecules of Life
- 4 Cell Structure and Function
- 5 Ground Rules of Metabolism
- 6 Where It Starts—Photosynthesis
- 7 How Cells Release Chemical Energy

UNIT II GENETICS

- 8 DNA Structure and Function
- 9 From DNA to Protein
- 10 Gene Control
- 11 How Cells Reproduce
- 12 Meiosis and Sexual Reproduction
- 13 Observing Patterns in Inherited Traits
- 14 Chromosomes and Human Inheritance
- 15 Studying and Manipulating Genomes

UNIT III PRINCIPLES OF EVOLUTION

- 16 Evidence of Evolution
- 17 Processes of Evolution
- 18 Organizing Information About Species
- 19 Life's Origin and Early Evolution

UNIT IV EVOLUTION AND BIODIVERSITY

- 20 Viruses, Bacteria, and Archaea
- 21 Protists—The Simplest Eukaryotes
- 22 The Land Plants
- 23 Fungi
- 24 Animal Evolution—The Invertebrates
- 25 Animal Evolution—The Chordates
- 26 Human Evolution

UNIT V HOW PLANTS WORK

- 27 Plant Tissues
- 28 Plant Nutrition and Transport
- 29 Life Cycles of Flowering Plants
- 30 Communication Strategies in Plants

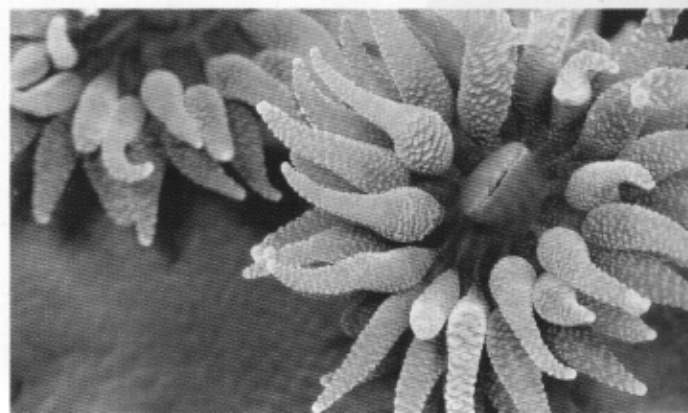

UNIT VI HOW ANIMALS WORK

- 31 Animal Tissues and Organ Systems
- 32 Neural Control
- 33 Sensory Perception
- 34 Endocrine Control
- 35 Structural Support and Movement
- 36 Circulation
- 37 Immunity
- 38 Respiration
- 39 Digestion and Nutrition
- 40 Maintaining the Internal Environment
- 41 Animal Reproductive Systems
- 42 Animal Development
- 43 Animal Behavior

UNIT VII PRINCIPLES OF ECOLOGY

- 44 Population Ecology
- 45 Community Ecology
- 46 Ecosystems
- 47 The Biosphere
- 48 Human Impacts on the Biosphere

DETAILED CONTENTS

INTRODUCTION

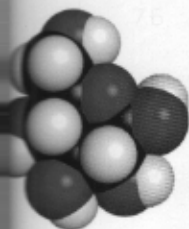

1 Invitation to Biology

- 1.1 The Secret Life of Earth 3
- 1.2 Life Is More Than the Sum of Its Parts 4
- 1.3 How Living Things Are Alike 6
 - Organisms Require Energy and Nutrients 6
 - Organisms Sense and Respond to Change 6
 - Organisms Use DNA 7
- 1.4 How Living Things Differ 8
- 1.5 Organizing Information About Species 10
 - A Rose by Any Other Name ... 10
- 1.6 The Science of Nature 12
 - Thinking About Thinking 12
 - How Science Works 12
- 1.7 Examples of Experiments in Biology 14
 - Potato Chips and Stomachaches 14
 - Butterflies and Birds 14
- 1.8 Analyzing Experimental Results 16
 - Sampling Error 16
 - Bias in Interpreting Results 17
- 1.9 The Nature of Science 18
 - The Limits of Science 18
- The Secret Life of Earth (revisited) 19

UNIT I PRINCIPLES OF CELLULAR LIFE

2 Life's Chemical Basis

- 2.1 Mercury Rising 23
- 2.2 Start With Atoms 24
 - Isotopes and Radioisotopes 25
- 2.3 Why Electrons Matter 26
 - About Vacancies 27
- 2.4 Chemical Bonds: From Atoms to Molecules 28
 - Ionic Bonds 28
 - Covalent Bonds 29
- 2.5 Hydrogen Bonds and Water 30

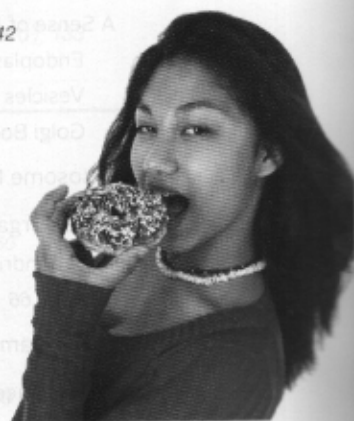

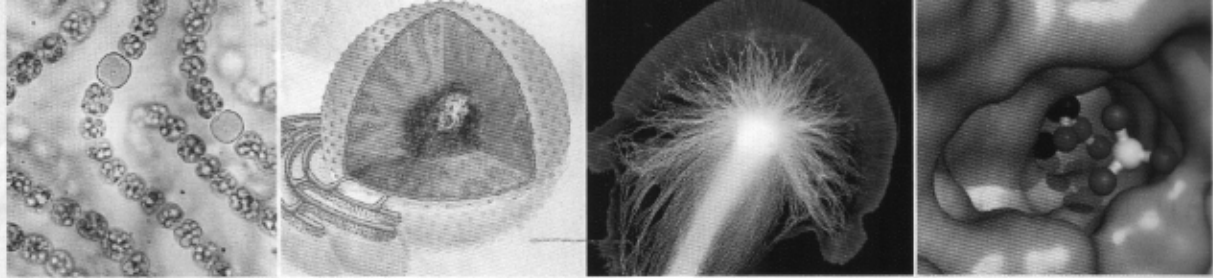

- Hydrogen Bonding 30
- Water's Special Properties 30
 - Water Has Cohesion 30
 - Water Stabilizes Temperature 30
 - Water Is an Excellent Solvent 31

- 2.6 Acids and Bases 32
 - Mercury Rising (revisited) 33

3 Molecules of Life

- 3.1 Fear of Frying 37
- 3.2 Organic Molecules 38
 - Carbon—The Stuff of Life 38
 - Representing Structures of Organic Molecules 38
- 3.3 Molecules of Life—From Structure to Function 40
 - What Cells Do to Organic Compounds 40
 - Functional Groups 40
- 3.4 Carbohydrates 42
 - Carbohydrates in Biological Systems 42
 - Simple Sugars 42
 - Short-Chain Carbohydrates 42
 - Complex Carbohydrates 42
- 3.5 Greasy, Oily—Must Be Lipids 44
 - Lipids in Biological Systems 44
 - Fats 44
 - Phospholipids 45
 - Waxes 45
 - Steroids 45
- 3.6 Proteins—Diversity in Structure and Function 46
 - From Structure to Function 46
 - Amino Acids 46
 - Peptide Bonds 46

The Structure–Function Relationship 46

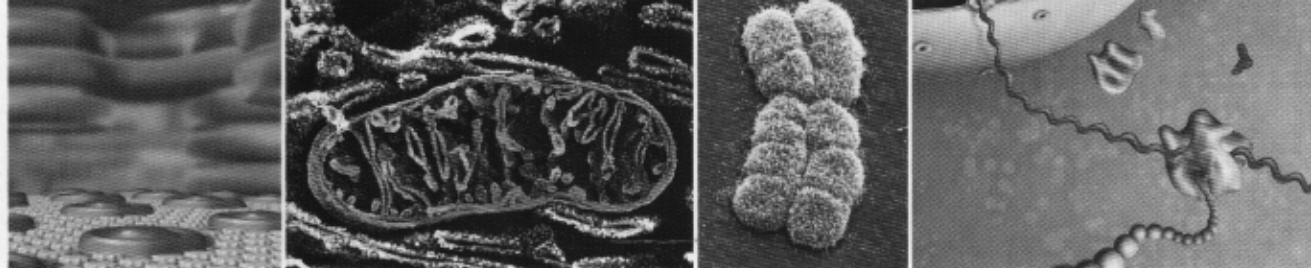

- 3.7 Why Is Protein Structure So Important? 48
- 3.8 Nucleic Acids 49
- Fear of Frying (revisited) 49

4 Cell Structure and Function

- 4.1 Food for Thought 53
- 4.2 Cell Structure 54
 - Components of All Cells 54
 - Plasma Membrane 54
 - Cytoplasm 54
 - DNA 54
 - Constraints on Cell Size 54
 - Cell Theory 55
- 4.3 How Do We See Cells? 56
- 4.4 Introducing “Prokaryotes” 58
 - Biofilms 59
- 4.5 Introducing Eukaryotic Cells 60
- 4.6 The Nucleus 62
 - The Nuclear Envelope 62
 - The Nucleolus 63
 - The DNA 63
- 4.7 The Endomembrane System 64
 - A Sense of Interacting Vessels 64
 - Endoplasmic Reticulum 64
 - Vesicles 64
 - Golgi Bodies 65
- 4.8 Lysosome Malfunction 66
- 4.9 Other Organelles 66
 - Mitochondria 66
 - Plastids 66
- 4.10 The Dynamic Cytoskeleton 68
- 4.11 Cell Surface Specializations 70
 - Matrixes Between and Around Cells 70
 - Cell Junctions 71
- 4.12 The Nature of Life 72
 - Food for Thought (revisited) 73

5 Ground Rules of Metabolism

- 5.1 A Toast to Alcohol Dehydrogenase 77
- 5.2 Energy in the World of Life 78
 - Energy Disperses 78
 - Energy’s One-Way Flow 78
- 5.3 Energy in the Molecules of Life 80
 - Chemical Bond Energy 80
 - Why Earth Does Not Go Up in Flames 80
 - Energy In, Energy Out 81
- 5.4 How Enzymes Work 82
 - The Need For Speed 82
 - The Transition State 82
 - Helping Substrates Get Together 82
 - Orienting Substrates in Positions That Favor Reaction 82
 - Inducing a Fit Between Enzyme and Substrate 82
 - Shutting Out Water Molecules 83
 - Effects of Temperature, pH, and Salinity 83
- 5.5 Metabolism—Organized, Enzyme–Mediated Reactions 84
 - Types of Metabolic Pathways 84
 - Controls Over Metabolism 84
 - Redox Reactions 85
- 5.6 Cofactors in Metabolic Pathways 86
 - ATP—A Special Coenzyme 87
- 5.7 A Closer Look at Cell Membranes 88
 - Membrane Lipids 88
 - Membrane Proteins 88
- 5.8 Diffusion and Membranes 90
 - Size 90
 - Temperature 90
 - Concentration 90
 - Charge 90
 - Pressure 90
 - Semipermeable Membranes 90
 - Turgor 91
- 5.9 Membrane Transport Mechanisms 92
 - Passive Transport 92
 - Active Transport 92
- 5.10 Membrane Trafficking 94
 - Endocytosis and Exocytosis 94

Membrane Cycling 95

■ A Toast to Alcohol Dehydrogenase (revisited) 96

6 Where It Starts—Photosynthesis

6.1 Biofuels 101

6.2 Sunlight as an Energy Source 102
Pigments: The Rainbow Catchers 102

6.3 Exploring the Rainbow 104

6.4 Overview of Photosynthesis 105

6.5 Light-Dependent Reactions 106
The Noncyclic Pathway 106
The Cyclic Pathway 107

6.6 Energy Flow in Photosynthesis 108

6.7 Light-Independent Reactions 109

6.8 Adaptations: Different Carbon-Fixing Pathways 110
Photorespiration 110
C4 Plants 111
CAM Plants 111

■ Biofuels (revisited) 112

7 How Cells Release Chemical Energy

7.1 Mighty Mitochondria 117

7.2 Overview of Carbohydrate Breakdown Pathways 118
Aerobic Respiration 118
Anaerobic Fermentation Pathways 118

7.3 Glycolysis—Glucose Breakdown Starts 120

7.4 Second Stage of Aerobic Respiration 122
The Krebs Cycle 122

7.5 Aerobic Respiration's Big Energy Payoff 124

7.6 Fermentation 126
Two Fermentation Pathways 126
Alcoholic Fermentation 126
Lactate Fermentation 126

7.7 Alternative Energy Sources in Food 128
Energy From Dietary Molecules 128

Complex Carbohydrates 129

Fats 129

Proteins 129

■ Mighty Mitochondria (revisited) 129

UNIT II Genetics

8 DNA Structure and Function

8.1 A Hero Dog's Golden Clones 133

8.2 Eukaryotic Chromosomes 134
Chromosome Number 134
Autosomes and Sex Chromosomes 135

8.3 The Discovery of DNA's Function 136
Confirmation of DNA's Function 137

8.4 The Discovery of DNA's Structure 138
DNA's Base-Pair Sequence 139

8.5 DNA Replication 140
A Host of Participants 140

8.6 Mutations: Cause and Effect 142
DNA Repair Mechanisms 142
Environmental Causes of Mutations 142
The Short Story of Rosalind Franklin 143

8.7 Animal Cloning 144

■ A Hero Dog's Golden Clones (revisited) 133

9 From DNA to Protein

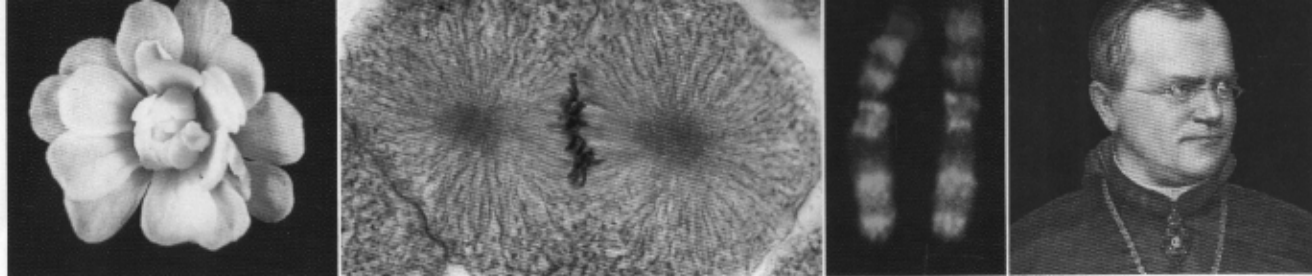

9.1 The Aptly Acronymed RIPs 149

9.2 DNA, RNA, and Gene Expression 150
Converting a Gene to an RNA 150
Converting mRNA to Protein 150

9.3 Transcription: DNA to RNA 152
Post Transcriptional Modifications 153

9.4 RNA and the Genetic Code 154
mRNA—The Messenger 154
rRNA and tRNA—The Translators 155

9.5 Translation: RNA to Protein 156

9.6 Mutated Genes and Their Protein Products 158

- The Aptly Acronymed RIPs (revisited) 160

10 Gene Control

10.1 Between You and Eternity 163

10.2 Switching Genes On and Off 164

Gene Controls 164

Transcription 164

mRNA Processing 165

mRNA Transport 165

Translational Control 165

Post-Translational Modification 165

10.3 Master Genes 166

Homeotic Genes 166

10.4 Examples of Gene Control in Eukaryotes 168

X Chromosome Inactivation 168

Male Sex Determination in Humans 168

Flower Formation 169

10.5 Examples of Gene Control in Prokaryotes 170

The Lac Operon 170

Lactose Intolerance 171

Riboswitches 171

10.6 Epigenetics 172

Heritable Methylations 172

- Between You and Eternity (revisited) 173

11 How Cells Reproduce

11.1 Henrietta's Immortal Cells 177

11.2 Multiplication by Division 178

The Life of a Cell 178

Chromosomes During Division 179

Controls Over the Cell Cycle 179

11.3 A Closer Look at Mitosis 180

11.4 Cytokinesis: Division of Cytoplasm 182

11.5 Marking Time With Telomeres 183

11.6 When Mitosis Becomes Pathological 184

Cancer 184

- Henrietta's Immortal Cells (revisited) 186

12 Meiosis and Sexual Reproduction

12.1 Why Sex? 189

12.2 Meiosis Halves the Chromosome Number 190

Introducing Alleles 190

What Meiosis Does 190

12.3 Visual Tour of Meiosis 192

12.4 How Meiosis Introduces Variations in Traits 194

Crossing Over in Prophase I 194

Chromosome Segregation 194

12.5 From Gametes to Offspring 196

Gamete Formation in Plants 196

Gamete Formation in Animals 196

Fertilization 196

12.6 Mitosis and Meiosis—An Ancestral Connection? 198

- Why Sex? (revisited) 200

13 Observing Patterns in Inherited Traits

13.1 Menacing Mucus 203

13.2 Mendel, Pea Plants, and Inheritance Patterns 204

Mendel's Experimental Approach 204

Inheritance in Modern Terms 205

13.3 Mendel's Law of Segregation 206

13.4 Mendel's Law of Independent Assortment 208

The Contribution of Crossovers 209

13.5 Beyond Simple Dominance 210

Codominance 210

Incomplete Dominance 210

Epistasis and Pleiotropy 211

13.6 Nature and Nurture 212

Examples of Environmental Effects on Phenotype 211

Seasonal Changes in Coat Color 212

Effect of Altitude on Yarrow 212

Alternative Phenotypes in Water Fleas 213

Mood Disorders in Humans 213

13.7 Complex Variations in Traits 214

Continuous Variation 214

Regarding the Unexpected Phenotype 215

- Menacing Mucus (revisited) 215

14 Chromosomes and Human Inheritance

- 14.1 Shades of Skin 219
- 14.2 Human Chromosomes 220
 - Types of Genetic Variation 220
- 14.3 Examples of Autosomal Inheritance Patterns 222
 - The Autosomal Dominant Pattern 222
 - Achondroplasia 222
 - Huntington's Disease 222
 - Hutchinson–Gilford Progeria 223
 - The Autosomal Recessive Pattern 223
 - Albinism 223
 - Tay–Sachs Disease 223
- 14.4 Examples of X-Linked Inheritance Patterns 224
 - The X-Linked Recessive Pattern 224
 - Red–Green Color Blindness 224
 - Duchenne Muscular Dystrophy 225
 - Hemophilia A 225
- 14.5 Heritable Changes in Chromosome Structure 226
 - Types of Chromosome Changes 226
 - Duplication 226
 - Deletion 226
 - Inversion 226
 - Translocation 226
 - Chromosome Changes in Evolution 227
- 14.6 Heritable Changes in Chromosome Number 228
 - Autosomal Change and Down Syndrome 228
 - Change in the Sex Chromosome Number 228
 - Female Sex Chromosome Abnormalities 228
 - Male Sex Chromosome Abnormalities 229
- 14.7 Genetic Screening 230
 - Prenatal Diagnosis 230
 - Preimplantation Diagnosis 231
- Shades of Skin (revisited) 232

15 Studying and Manipulating Genomes

- 15.1 Personal DNA Testing 235
- 15.2 Cloning DNA 236
 - Cutting and Pasting DNA 236
 - cDNA Cloning 237

- 15.3 Isolating Genes 238
 - DNA Libraries 238
 - PCR 238
- 15.4 DNA Sequencing 240
 - Technique 240
 - The Human Genome Project 241
- 15.5 Genomics 242
 - DNA Profiling 242
- 15.6 Genetic Engineering 244
- 15.7 Designer Plants 244
- 15.8 Biotech Barnyards 246
 - Knockouts and Organ Factories 246
- 15.9 Safety Issues 247
- 15.10 Genetically Modified Humans 248
 - Getting Better 248
 - Getting Worse 248
 - Getting Perfect 248
 - Getting There 249
- Personal DNA Testing (revisited) 249

- Appendix I Amino Acids
- Appendix II How to Read A Journal Article
- Appendix III Answers to Self-Quizzes and Genetics Problems
- Appendix IV Periodic Table of the Elements
- Appendix V Closer Look at Some Major Metabolic Pathways
- Appendix VI A Plain English Map of the Human Chromosomes
- Appendix VIII Units of Measure
