

Contents

List of Contributors	vii
Preface	xiii
Section 1 Factors Controlling Plant Cell Wall Patterning	1
1 The Biosynthesis and Function of Polysaccharide Components of the Plant Cell Wall	3
Ryusuke Yokoyama, Naoki Shinohara, Rin Asaoka, Hideki Narukawa and Kazuhiko Nishitani	
2 Regulation of Cell Wall Formation by Membrane Traffic	35
Clara Sánchez-Rodríguez and Staffan Persson	
3 A Blueprint for Cellulose Biosynthesis, Deposition, and Regulation in Plants	65
Ian S. Wallace and Chris R. Somerville	
4 Cortical Microtubule Array Organization and Plant Cell Morphogenesis	97
Sidney L. Shaw and Laura Vineyard	
5 Actin Filament Dynamics and their Role in Plant Cell Expansion	127
Jiejie Li, Ruthie Arieti and Christopher J. Staiger	
Section 2 Cellular Mechanisms Underlying Various Cell Shapes	163
6 The Regulation of Cell Shape Formation by ROP-dependent Auxin Signaling	165
Shingo Nagawa and Zhenbiao Yang	
7 Xylem Cell Wall Pattern Formation Regulated by Microtubule-associated Proteins and ROP GTPases	191
Yoshihisa Oda and Hiroo Fukuda	
8 ROP Signaling and the Cytoskeleton in Pollen Tube Growth	215
Lei Zhu and Ying Fu	

9	Phosphoinositide Signaling in Root Hair Tip Growth	239
	Hiroaki Kusano, Rumi Tominaga, Takuji Wada, Mariko Kato and Takashi Aoyama	
10	Arabidopsis Trichome Morphogenesis and the Role of Microtubules in Controlling Trichome Branch Formation	269
	M. David Marks	
11	Transfer Cells: Novel Cell Types with Unique Wall Ingrowth Architecture Designed for Optimized Nutrient Transport	287
	David W. McCurdy	
	Section 3 Developmental Regulations of Cell Shape	319
12	Regulation of Guard Cell Formation by Integration of Transcriptional and Signaling Regulation	321
	Chin-Min Kimmy Ho and Dominique C. Bergmann	
13	Transcriptional Regulation of Biosynthesis of Cell Wall Components during Xylem Differentiation	351
	Ruiqin Zhong and Zheng-Hua Ye	
14	Phloem Cell Development	379
	Raffael Lichtenberger, Kaori Furuta-Miyashima, Eva Hellmann and Ykä Helariutta	
	Index	401
