<i>About the Editor</i>	xi
<i>Notes on Contributors</i>	xiii
<i>Preface</i>	xix
Part I Anthropological Genetics in Context	1
1 History and Evolution of Anthropological Genetics <i>Michael H. Crawford</i>	3
2 The Ethics of Genetic Ancestry Testing <i>Nanibaa' A. Garrison and Jessica D. Bardill</i>	17
3 Community-Oriented Research and the Future of Anthropological Genetics <i>Ripan S. Malhi</i>	37
Part II Macroevolution and Phylogenetics	45
4 Calibrating the Clock <i>Murray P. Cox</i>	47
5 Primate Genomics and Phylogenetics <i>Christopher A. Schmitt and Omer Gokcumen</i>	57
6 The Neanderthal and Denisovan Genomes <i>Sloan R. Williams</i>	69
7 Evaluating Correspondence in Phenotypic Variation, Genetic Diversity, Geography, and Environmental Factors <i>Noreen von Cramon-Taubadel</i>	89

- 8 Simulating Human Demographic Processes and Patterns
of Genetic Variation 107
Aida T. Miró-Herrans

**Part III Microevolution: Colonization, Dispersal,
and Differentiation 121**

- 9 Human Population Structure and History 123
John H. Relethford
- 10 Regional Patterns of Variation: Concepts and Applications 137
Graciela S. Cabana
- 11 Genetic Variation and the Colonization of Eurasia 151
Toomas Kivisild
- 12 *Homo sapiens* Dispersal and the Peopling of the Americas 165
Rafael Bisso-Machado and Nelson Jurandi Rosa Fagundes
- 13 Ancient DNA and Bioarcheology 187
Jennifer A. Raff

**Part IV Human Adaptation: Natural Selection
and Physiological Variation 199**

- 14 Tempo of Recent Human Evolution 201
Michael D. Weight and Henry C. Harpending
- 15 Natural Selection and Adaptation to Extreme Environments:
High Latitudes and Altitudes 219
Abigail W. Bigham
- 16 Sensory Polymorphisms and Dietary Adaptation 233
Carrie C. Veilleux
- 17 The Evolution of the Human Pigmentation Phenotype 251
Heather L. Norton
- 18 Anthropological Genetics and Growth and Development 267
Bradford Towne, Ellen W. Demerath, and Stefan A. Czerwinski
- 19 Epigenetics and Human Variation 293
Amy L. Non and Zaneta M. Thayer

Part V Anthropology, Genetics, and the Evolution of Health and Disease	309
20 The Primate Immune System: A Survey of Innate and Acquired Immune Genes	311
<i>Leslie A. Knapp and Nicole S. Torosin</i>	
21 Genetics, Evolutionary Medicine, and the Evolution of Human Pathogens	327
<i>Amanda VanSteelandt and Anne C. Stone</i>	
<i>References</i>	343
<i>Index</i>	445

Denis H. O'Rourke, PhD, is Assistant Professor of Anthropology at the University of Texas, USA, and Visiting Professor at the University of Utah, USA. He has used a variety of morphological, genetic, and genomic data to reconstruct human populations, focusing particularly on the North American Arctic, and is involved in the excavation and analysis of burials in the Western Hemisphere. He teaches the genetics, anthropology, and paleo-ecological records. He is also part of a project in using the DNA to reveal and promotion of ethical practices in human remains. He is the editor of *Human Biology: An Evolutionary and Molecular Perspective* (Wiley Blackwell, 2012), an associate editor of *The American Journal of Human Biology* (Wiley Blackwell, 2012), and has published numerous articles and book chapters on topics in human evolution and genetics.
