List of contributors, ix

Preface, xiii

Section A: Physiology of plant respiration and involvement of alternative oxidase

- 1 Integrating classical and alternative respiratory pathways, 3
Kapuganti Jagadis Gupta, Bhagyalakshmi Neelwarne and Luis A.J. Mur
- 2 Non-coupled pathways of plant mitochondrial electron transport and the maintenance of photorespiratory flux, 21
Abir U. Igamberdiev and Natalia V. Bykova
- 3 Taxonomic distribution of alternative oxidase in plants, 43
Allison E. McDonald
- 4 Alternative pathways and phosphate and nitrogen nutrition, 53
Anna M. Rychter and Bożena Szal
- 5 Structural elucidation of the alternative oxidase reveals insights into the catalytic cycle and regulation of activity, 75
Catherine Elliott, Mary S. Albury, Luke Young, Ben May and Anthony L. Moore
- 6 The role of alternative respiratory proteins in nitric oxide metabolism by plant mitochondria, 95
Ione Salgado and Halley Caixeta Oliveira
- 7 Control of mitochondrial metabolism through functional and spatial integration of mitochondria, 115
Samir Sharma
- 8 Modes of electron transport chain function during stress: Does alternative oxidase respiration aid in balancing cellular energy metabolism during drought stress and recovery?, 157
Greg C. Vanlerberghe, Jia Wang, Marina Cvetkovska and Keshav Dahal
- 9 Regulation of cytochrome and alternative pathways under light and osmotic stress, 185
Padmanabh Dwivedi
- 10 Alternative respiratory pathway in ripening fruits, 201
Bhagyalakshmi Neelwarne

11 Respiratory pathways in bulky tissues and storage organs, 221*Wu-Sheng Liang***Section B: From AOX diversity to functional marker development***Birgit Arnholdt-Schmitt*

Introduction, 235

12 Exploring AOX gene diversity, 239**12.1 Natural AOX gene diversity, 241***Hélia G. Cardoso, Amaia Nogales, António Miguel Frederico, Jan T. Svensson, Elisete Santos Macedo, Vera Valadas and Birgit Arnholdt-Schmitt***12.2 AOX gene diversity in *Arabidopsis* ecotypes, 255***José Hélio Costa and Jan T. Svensson***12.3 Artificial intelligence for the detection of AOX functional markers, 261***Paulo Quaresma, Teresa Gonçalves, Salvador Abreu, José Hélio Costa, Kaveh Mashayekhi, Birgit Arnholdt-Schmitt and Jan T. Svensson***12.4 Evolution of AOX genes across kingdoms and the challenge of classification, 267***Allison E. McDonald, José Hélio Costa, Tânia Nobre, Dirce Fernandes de Melo and Birgit Arnholdt-Schmitt***13 Towards exploitation of AOX gene diversity in plant breeding, 273****13.1 Functional marker development from AOX genes requires deep phenotyping and individualized diagnosis, 275***Amaia Nogales, Carlos Noceda, Carla Ragonezi, Hélia G. Cardoso, Maria Doroteia Campos, Antonio Miguel Frederico, Debabrata Sircar, Sarma Rajeev Kumar, Alexios Polidoros, Augusto Peixe and Birgit Arnholdt-Schmitt***13.2 AOX gene diversity can affect DNA methylation and genome organization relevant for functional marker development, 281***Carlos Noceda, Jan T. Svensson, Amaia Nogales and Birgit Arnholdt-Schmitt***13.3 Gene technology applied for AOX functionality studies, 287***Sarma Rajeev Kumar and Ramalingam Sathishkumar***14 AOX goes risk: A way to application, 299****14.1 AOX diversity studies stimulate novel tool development for phenotyping: calorimetry, 301***Birgit Arnholdt-Schmitt, Lee D. Hansen, Amaia Nogales and Luz Muñoz-Sanhueza*

- 14.2 AOX gene diversity in arbuscular mycorrhizal fungi (AMF) products: a special challenge, 305**
Louis Mercy, Jan T. Svensson, Eva Lucic, Hélia G. Cardoso, Amaia Nogales, Matthias Döring, Jens Jurgeleit, Caroline Schneider and Birgit Arnholdt-Schmitt
- 14.3 Can AOX gene diversity mark herbal tea quality? A proposal, 311**
Michail Orfanoudakis, Evangelia Sinapidou and Birgit Arnholdt-Schmitt
- 14.4 AOX in parasitic nematodes: a matter of lifestyle?, 315**
Vera Valadas, Margarida Espada, Tânia Nobre, Manuel Mota and Birgit Arnholdt-Schmitt
- 14.5 Bacterial AOX: a provocative lack of interest!, 319**
Cláudia Vicente, José Hélio Costa and Birgit Arnholdt-Schmitt
- General conclusion, 323
- References, 325

Section C: Protocols

- 15 Technical protocol for mitochondria isolation for different studies, 347**
Renate Horn
- 16 Simultaneous isolation of root and leaf mitochondria from *Arabidopsis*, 359**
Kapuganti Jagadis Gupta and Ralph Ewald
- Index, 367

Maria Doroteia Campos

EU Marie-Curie Chair, ICAAM,
 Universidade de Évora, Évora, Portugal

Hélia G. Cardoso

EU Marie-Curie Chair, ICAAM,
 Universidade de Évora, Évora, Portugal

José Hélio Costa

Department of Biochemistry and
 Molecular Biology, Federal University
 of Ceará, Fortaleza, Ceará, Brazil

Marina Cvetkovska

Department of Biological Sciences
 and Department of Cell and Systems
 Biology, University of Toronto

Catherine Ellison

Biochemistry and Molecular Biology,
 School of Life Sciences, University of
 Sussex, Falmer, Brighton,
 East Sussex, UK

Margarida Espada

Nematah-ICAAM, Departamento de
 Biologia, Universidade de Évora,
 Évora, Portugal

Ralph Ewald

Institut für Biochemie/Haftung,
 Abteilung Pflanzenphysiologie,
 Universität Rostock, Rostock,
 Germany
