

Contents

Preface

xii

1	Solution Chemistry of Iron	1
1.1	Iron Chemistry	1
1.2	Interactions of Iron with Dioxygen and Chemistry of Oxygen Free Radicals	2
1.3	Hydrolysis of Iron Salts	5
1.4	Formation and Characterisation of Ferrihydrite	7
1.5	Ageing of Amorphous Ferrihydrite to more Crystalline Products	10
1.6	Biom mineralisation	11
1.7	Magnetite Biom mineralisation by Magnetotactic Bacteria	13
1.7.1	Biogenesis of the Magnetosome Membrane	15
1.7.2	Protein Sorting	15
1.7.3	Chain Formation	16
1.7.4	Biom mineralisation	16
1.7.5	A Model for Magnetosome Formation	17
	References	18
2	The Essential Role of Iron in Biology	22
2.1	Introduction: Iron an Essential Element in Biology	22
2.2	Physical Techniques for the Study of Iron in Biological Systems	25
2.3	Classes of Iron Proteins	29
2.4	Haemoproteins	29
2.4.1	Oxygen Carriers	30
2.4.2	Activators of Molecular Oxygen	34
2.4.3	Electron Transport Proteins	38
2.5	Iron-Sulphur Proteins	41
2.6	Non-haem, Non-Fe-S Proteins	48
2.6.1	Mononuclear Non-haem Iron Enzymes	48
2.6.1.1	Extradiol-cleaving Catechol Dioxygenases	49
2.6.1.2	Rieske Oxygenases	49
2.6.1.3	α -Ketoglutarate-dependent Enzymes	52
2.6.1.4	Pterin-dependent Hydroxylases	54
2.6.1.5	Miscellaneous Enzymes	55
2.6.2	Dinuclear Non-haem Iron Proteins	55
2.6.3	Proteins of Iron Storage, Transport and Metabolism	61
2.7	The Dark Side of Iron: ROS, RNS and NTBI	62
2.7.1	ROS and RNS	63
2.7.2	NTBI and LPI	64
	References	64

3	Microbial Iron Uptake	71
3.1	Introduction	71
3.2	Iron Uptake from Siderophores	74
3.2.1	Siderophores	74
3.2.2	Iron Transport across the Outer Membrane in Gram-negative Bacteria	78
3.2.3	Transport across the Periplasm and Cytoplasmic Membrane in Gram-negative Bacteria	86
3.2.4	Iron Uptake by Gram-positive Bacteria	92
3.3	Fe ²⁺ Transport Systems	93
3.4	Iron Release from Siderophores in the Cytoplasm	97
3.5	Intracellular Iron Metabolism	98
3.6	Control of Gene Expression by Iron	101
	References	108
4	Iron Acquisition by Pathogens	120
4.1	Introduction	120
4.2	Host Defence Mechanisms, Nutritional Immunity	121
4.3	Pathogenicity and PAIs	123
4.4	Pathogen-specific Iron Uptake Systems	125
4.4.1	Siderophores Associated with Virulence	125
4.4.2	Transferrin/lactoferrin Iron Uptake	126
4.4.3	Haem Iron Uptake	133
4.4.4	Ferrous Iron Uptake	138
4.4.5	Ferric Citrate Uptake by <i>Bacillus cereus</i>	141
4.5	Role of Fur and Fur Homologues in Virulence	141
4.6	Role of Pathogen ECF Sigma Factors	141
4.7	Fungal Pathogens	143
	References	146
5	Iron Uptake by Plants and Fungi	155
5.1	Iron Uptake by Plants	155
5.1.1	Introduction	155
5.1.2	Genome Sequencing	157
5.1.2.1	Quantitative Trait Loci	158
5.1.3	Iron Acquisition by the Roots of Plants	160
5.1.3.1	Non-graminaceous Plants	161
5.1.3.2	Graminaceous Plants	164
5.1.4	Long-distance Iron Transport	166
5.2	Iron Metabolism and Homeostasis in Plants	169
5.2.1	New Tools in Plant Research	169
5.2.2	Intracellular Iron Metabolism	170
5.2.3	Plant Iron Homeostasis	171
5.2.4	Diurnal Regulation of Iron Homeostasis	176
5.3	Iron Uptake, Metabolism and Homeostasis in Fungi	178
5.3.1	Introduction	178
5.3.2	High- and Low-affinity Iron Uptake Pathways	179
5.3.3	Siderophore-mediated Iron Uptake	184

5.3.4	Intracellular Iron Metabolism	185
5.3.5	Iron Homeostasis	186
	References	190
6	Cellular Iron Uptake and Export in Mammals	205
6.1	The Transferrins	205
6.1.1	Introduction	205
6.1.2	The Transferrin Family	206
6.1.3	Structure of Transferrins	211
6.1.4	Transferrin Iron Binding	215
6.1.5	Binding of other Metals by Transferrin	218
6.2	Cellular Iron Uptake	219
6.2.1	The Transferrin Receptors	219
6.2.2	The Transferrin to Cell Cycle and Iron Release	222
6.2.3	Iron Uptake from other Sources	228
6.3	Cellular Iron Export	230
	References	236
7	Mammalian Iron Metabolism and Dietary Iron Absorption	247
7.1	An Overview of Mammalian Iron Metabolism	247
7.1.1	Introduction	247
7.1.2	The Way Different Cells Handle Iron	249
7.2	Mammalian Iron Absorption	251
7.2.1	Introduction	251
7.2.2	The Intestinal Mucosa	252
7.2.3	Sources of Dietary Iron	253
7.2.4	Iron Loss and Effects on Uptake	255
7.3	Molecular Mechanisms of Mucosal Iron Absorption	256
7.3.1	Iron Uptake at the Apical Pole	256
7.3.2	Iron Transit Through and Storage in Enterocytes	259
7.3.3	Iron Efflux across the Basolateral Membrane	259
7.3.4	Regulation of Iron Uptake by the Enterocyte	261
	References	261
8	Intracellular Iron Utilisation	265
8.1	Intracellular Iron Pools	265
8.1.1	Introduction	265
8.1.2	The Cytosolic Labile Iron Pool (LIP)	266
8.1.3	Distribution of Iron in the Cytosol	268
8.1.4	Other Intracellular Iron Pools	269
8.2	Mitochondrial Iron Metabolism	271
8.2.1	Mitochondrial Iron Uptake and Storage	271
8.2.2	Mitochondrial Fe-S Protein Biogenesis	271
8.2.3	Maturation of Cytosolic and Nuclear Fe-S Proteins	275
8.2.4	Haem Biosynthesis	283
8.3	Haem Oxygenase	287
8.3.1	Structure and Catalytic Cycle	287
8.3.2	Activation of Haem Oxygenase 1 (HO-1)	292
	References	292

9	Iron Storage Proteins	300
9.1	Introduction	300
9.2	The Ferritin Superfamily and Haemosiderins	301
9.2.1	The Ferritin Superfamily	301
9.2.2	Structure of Vertebrate and Invertebrate Ferritins	304
9.2.3	Plant and Bacterial Ferritins	308
9.2.4	Dps Proteins and Rubrerythrins	313
9.2.5	The Mineral Core	319
9.2.6	Haemosiderins	319
9.3	Iron Uptake and Release from Ferritin	320
9.3.1	Iron Uptake in Ferritins	320
9.3.1.1	Entry of Fe(II) into the Protein Shell	321
9.3.1.2	Oxidation of Fe ²⁺ by Ferroxidase Sites	323
9.3.1.3	Mineralisation of the Iron Core	325
9.3.2	Iron Uptake in Dps Proteins	333
9.3.3	Iron Release from Ferritin	333
9.4	Biotechnological Applications of Ferritins	335
	References	336
10	Cellular and Systemic Iron Homeostasis	346
10.1	Cellular Iron Homeostasis	346
10.1.1	Translational Control of Protein Synthesis	346
10.1.2	The IRE/IRP System	347
10.1.3	The IREs—Distribution and Structure	348
10.1.4	Structural Features of IRP1 and 2	351
10.1.5	The IRE/IRP System Revisited – Iron Controls Iron	353
10.1.6	Metabolic Consequences of Mutations in IREs	357
10.2	Systemic Iron Homeostasis	357
10.2.1	Introduction	357
10.2.2	Hepcidin, the Key Player	358
10.2.3	Factors which Regulate Hepcidin Synthesis	360
10.2.3.1	Iron Availability	361
10.2.3.2	Inflammatory Stimuli	364
10.2.3.3	Erythropoietic Demand	364
10.2.3.4	Hypoxia	365
10.2.3.5	Endocrine Signals	366
10.3	Integration of Iron Homeostatic Systems	367
	References	367
11	Iron Deficiency, Iron Overload and Therapy	376
11.1	Iron-deficiency Anaemia (IDA)	376
11.1.1	Introduction – The Size of the Problem	376
11.1.2	Causes of IDA	378
11.1.3	Clinical Stages and Diagnosis of IDA	380
11.1.4	Therapeutic Approaches	383
11.1.5	Anaemia of Chronic Disease (ACD), Iron Refractory IDA (IRIDA) and Anaemia of Chronic Kidney Disease (CKD)	384

11.2	Hereditary Iron Overload	386
11.2.1	Introduction	386
11.2.2	Hereditary Haemochromatosis (HH)	386
11.2.3	Causes of HH	387
11.2.4	Types of Haemochromatosis	388
11.2.4.1	HFE-related (Type 1) Haemochromatosis	388
11.2.4.2	Juvenile (Type 2) Haemochromatosis	390
11.2.4.3	TfR2-related (Type 3) Haemochromatosis	390
11.2.4.4	Ferroportin Disease	390
11.2.5	Therapy of Hereditary Haemochromatosis	391
11.3	Acquired Iron Overload	395
11.3.1	Introduction – Causes of Acquired Iron Overload	395
11.3.2	Mechanisms of Iron Toxicity	397
11.3.3	Evaluation of Iron Overload	398
11.3.4	Chelation Therapy for Acquired Iron Overload	400
11.3.5	Other Therapeutic Approaches	405
	References	406
12	Iron and Immunity	418
12.1	Introduction	418
12.1.1	Innate Immunity	419
12.2	The Key Role of Macrophages	422
12.2.1	Overview	422
12.2.2	Macrophage Phenotypes	425
12.2.3	Microglia	426
12.3	Effect of Iron Status on Phagocytic Cell Function	429
12.3.1	Iron Deficiency	429
12.3.2	Iron Overload	430
12.4	Effect of Phagocytic Cell Function on Iron Metabolism	431
12.4.1	The IRE–Iron Regulatory Protein (IRP) System	431
12.5	Effector Molecules of the Innate Immune System	433
12.5.1	Toll-like Receptors	433
12.5.2	NF- κ B	433
12.5.3	Hypoxia-Inducible Factor 1 (HIF 1)	434
12.5.4	Haem Oxygenase	435
12.5.5	DMT1, Nramp1	437
12.6	Adaptive Immunity	437
12.6.1	CD8 ⁺ Lymphocytes and Cytotoxicity	438
12.6.2	CD4 ⁺ Lymphocytes	438
12.7	Immune Function and other Factors	438
12.7.1	Iron Supplementation and Immune Function	438
12.7.2	Immune Function in the Elderly Population	439
12.7.3	Iron Overload and Immune Function	439
12.7.4	Thalassaemia	440
12.8	Concluding Remarks	440
	References	440

13	Iron and Oxidative Stress	444
13.1	Oxidative Stress	444
13.1.1	Introduction – Milestones in the History of Life	444
13.1.2	Reactive Oxygen Species (ROS) and Reactive Nitrogen Species (RNS)	447
13.1.3	Cellular Defence Mechanisms Against Oxidative Stress	450
13.1.4	Role of ROS and RNS in Cell Signalling	460
13.1.5	ROS, RNS and Oxidative Damage	466
	References	476
14	Interactions between Iron and other Metals	482
14.1	Introduction	482
14.2	Iron Interactions with Essential Metals	483
14.2.1	Copper	483
14.2.1.1	Introduction	483
14.2.1.2	Copper Acquisition and Metabolism	485
14.2.1.3	Copper Chaperones	486
14.2.1.4	Iron–Copper Interactions	487
14.2.2	Zinc	494
14.2.2.1	Introduction	494
14.2.2.2	Iron–Zinc Interactions	496
14.2.3	Cobalt	497
14.2.3.1	Introduction	497
14.2.3.2	Iron–Cobalt Interactions	498
14.2.4	Manganese	500
14.2.4.1	Iron–Manganese Interactions	500
14.2.5	Calcium	501
14.2.5.1	Iron–Calcium Interactions	501
14.3	Iron Interactions with Toxic Metals	502
14.3.1	Lead	502
14.3.2	Cadmium	503
14.3.3	Aluminium	505
	References	507
15	Iron Homeostasis and Neurodegeneration	516
15.1	Introduction	516
15.2	Brain Iron	517
15.2.1	Brain Iron Homeostasis	517
15.2.2	Aging and Brain Iron Content	518
15.3	Iron and Neurodegeneration	522
15.3.1	Introduction	522
15.3.2	Adverse Effects of Iron in Neurodegeneration	522
15.3.2.1	Toxicity of ROS and RNS	522
15.3.2.2	Iron and Mitochondrial Function	523
15.3.2.3	Protein Aggregation	523
15.4	Neurodegeneration with Brain Iron Accumulation	524
15.4.1	Aceruloplasminaemia	524
15.4.2	Neuroferritinopathy	526
15.4.3	Other NBIA's	528

15.5 Other Monogenic Neurodegenerative Diseases	530
15.5.1 Huntington's Disease	530
15.5.2 Friedreich's Ataxia	532
15.6 Neurodegeneration Involving Multiple Genes	533
15.6.1 Parkinson's Disease (PD)	533
15.6.2 Alzheimer's Disease (AD)	535
15.6.3 Multiple Sclerosis (MS)	537
15.7 Intracerebral Haemorrhage	538
References	539
Concluding Remarks	544
Index	547
