Introduction xxiii

1	Causes of Harmful Algal Blooms	1
	<i>Patricia M. Glibert and JoAnn M. Burkholder</i>	
1.1	Introduction	1
1.2	"Getting There": The Classic Perspective on Introduced Species and Links to Cultural Eutrophication	2
1.2.1	Introduced Species	2
1.2.2	Anthropogenically Introduced Nutrients	3
1.3	"Being There": Blooms and Why They Succeed	5
1.3.1	Nutrient-Related HAB	5
1.3.2	Resource Ratios, Nutrient Stoichiometry, and Optimal Nutrient Ratios	6
1.3.3	Diversity in Use of Forms of Nitrogen	9
1.3.4	Toxicity	10
1.3.5	Mixotrophy: Use of "Packaged" and Dissolved Particulate Nutrients	12
1.3.6	Other Adaptations	13
1.4	"Staying There": Links to Physical Structure and Climate	14
1.4.1	Physical Structure: Large-Scale and Small-Scale Natural Hydrological Features	14
1.4.2	Physical Dynamics: Anthropogenic Hydrological Changes	15
1.4.3	Reinforcing Feedbacks	16
1.4.3.1	Trophic Disruptions	16
1.4.3.2	Biogeochemical Alterations	17
1.4.4	Climate Change	18
1.5	Conclusions	20
	Acknowledgments	21
	References	21
2	Detection and Surveillance of Harmful Algal Bloom Species and Toxins	39
	<i>Gregory J. Doucette, Linda K. Medlin, Pearse McCarron, and Philipp Hess</i>	
2.1	Introduction	39
2.2	Organism Detection	41
2.2.1	Visual/Optical	41
2.2.1.1	Light Microscopy (LM)/Utermöhl's	41
2.2.1.2	Light Microscopy/Flow Cytometry	41
2.2.1.3	<i>In Vivo</i> Fluorometry	42
2.2.1.4	Spectral Absorbance/Spectroradiometry	43

2.2.2	Molecular	43
2.2.2.1	Whole Cell Format	44
2.2.2.2	Cell-Free Format	47
2.3	Toxin Detection	51
2.3.1	<i>In Vivo</i> Assays	53
2.3.1.1	Rat Bioassay	58
2.3.1.2	Mouse Bioassay	58
2.3.2	<i>In Vitro</i> Assays	59
2.3.2.1	Functional Assays	60
2.3.2.2	Structural Assays	66
2.3.2.3	Biosensors	71
2.3.3	Analytical Techniques	72
2.3.3.1	High-Performance Liquid Chromatography with Optical Detection (UV or FLD)	73
2.3.3.2	Liquid Chromatography–Mass Spectrometry (LC-MS) and Liquid Chromatography–Tandem Mass Spectrometry (LC-MS/MS)	75
2.3.3.3	Other Analytical Methods: Capillary Electrophoresis (CE), Matrix-Assisted Laser Desorption Ionization–Time of Flight (MALDI-TOF), and Laser Ablation Electrospray Ionization (LAESI)	78
2.3.3.4	Perspectives	79
2.4	Autonomous, <i>In Situ</i> Technologies	80
2.4.1	Environmental Sample Processor (McLane Research Laboratories)	81
2.4.2	Imaging Flow Cytobot (McLane Research Laboratories)	83
2.4.3	Optical Phytoplankton Discriminator (aka BreveBuster; Mote Marine Laboratory)	84
2.4.4	CytoBuoy (CytoBuoy b.v.)	85
2.4.5	SPATT Passive Samplers	86
2.5	Conclusions and Future Prospects	87
	Disclaimer	89
	References and Further Reading	89
3	Modeling Marine Harmful Algal Blooms: Current Status and Future Prospects	115
	Kevin J. Flynn and Dennis J. McGillicuddy, Jr.	
3.1	Introduction	115
3.2	Building Models to Describe Ecological Events	117
3.3	Limitations to What Models Can Do, and Why	119
3.3.1	Building Models	119
3.3.2	Model Complexity	119
3.3.3	The Need for Data	120
3.3.4	Validating Models	121
3.4	Modeling T-HAB and ED-HAB Events	121
3.5	How Good Are Current HAB Models?	122
3.6	Future Modeling of T-HAB and ED-HAB: Managing Expectations	128
3.7	Improving Our Capabilities	129
3.7.1	Changes in the Biological–Modeling Interface	129
	Acknowledgments	130
	References	130
4	Harmful Algal Blooms and Shellfish	135
	Leila Basti, Hélène Hégaret, and Sandra E. Shumway	
4.1	Introduction	135
4.2	Major Shellfish Poisonings	136
4.2.1	Paralytic Shellfish Poisoning (PSP)	136
4.2.2	Diarrhetic Shellfish Poisoning (DSP)	137
4.2.3	Neurotoxic Shellfish Poisoning (NSP)	138
4.2.4	Amnesic Shellfish Poisoning (ASP)	139

4.2.5	Azaspiracid Shellfish Poisoning (AZP)	139
4.3	Other Toxins: Pectenotoxins (PTX) and Yessotoxins (YTX)	140
4.4	Emerging Shellfish Poisonings	141
4.5	Toxin Uptake, Accumulation, and Depuration	142
4.6	Shellfish Contamination in North America	143
4.6.1	Bivalves	143
4.6.1.1	Paralytic Shellfish Contamination	143
4.6.1.2	Diarrhetic Shellfish Contamination	149
4.6.1.3	Neurotoxic Shellfish Contamination	150
4.6.1.4	Amnesic Shellfish Contamination	151
4.6.2	Gastropods	154
4.6.3	Crustaceans	162
4.7	Impacts on Shellfish	163
4.8	Conclusions and Perspectives	164
	References and Further Reading	167
5	Vulnerabilities of Marine Mammals to Harmful Algal Blooms	191
	<i>Margaret H. Broadwater, Frances M. Van Dolah, and Spencer E. Fire</i>	
5.1	Introduction	191
5.2	Overview of Algal Toxins	192
5.2.1	Brevetoxins	193
5.2.2	Ciguatoxins	199
5.2.3	Diarrhetic Shellfish Poisoning Toxins	200
5.2.4	Domoic Acid	201
5.2.5	Paralytic Shellfish Toxins	206
5.2.6	Other Algal and Cyanobacterial Toxins	209
5.3	Impacts of Algal Toxins Specific to Marine Mammals	210
5.3.1	The Effects of Toxin Exposure Depend on Animal Physiology and Behavior	210
5.3.2	Emerging Issues: Non-acute and Multiple Toxin Exposure	211
5.3.3	Prospects for Managing Impacts of HAB	211
5.4	Considerations for the Evaluation of HAB Toxins in Marine Mammals	212
5.4.1	Sampling Marine Mammals for HAB Toxin Analysis	213
5.4.2	Priority Needs for Investigating HAB Toxin Involvement in Marine Mammal Morbidity and Mortality	214
	Abbreviations	214
