List of Contributors *xiii*

Preface *xvii*

About the Editors *xxi*

- 1 Effects of Organic Pollutants on Photosynthesis** **1**
Rupal Singh Tomar, Bhupendra Singh, and Anjana Jajoo
 - 1.1 Introduction to Organic Pollutants **1**
 - 1.2 Characteristics of the Organic Pollutants **3**
 - 1.3 Sources of Organic Pollutants **3**
 - 1.4 Uptake and Accumulation of Organic Pollutants in Plants **4**
 - 1.5 Effects of Organic Pollutants on Plant Growth **5**
 - 1.6 Effects of Organic Pollutants on Photosynthesis **7**
 - 1.6.1 Effects of Pesticides on the Light Reactions **7**
 - 1.6.2 Effects of Pesticides on the Dark Reactions **9**
 - 1.6.3 Effects of Antibiotics on the Light Reactions **11**
 - 1.6.4 Effects of Antibiotics on the Dark Reactions **13**
 - 1.6.5 Effects of Bisphenol A on the Light Reactions **13**
 - 1.6.6 Effects of Bisphenol A on the Dark Reactions **14**
 - 1.6.7 Effects of Polycyclic Aromatic Hydrocarbons on the Light Reactions **14**
 - 1.6.8 Effects of Polycyclic Aromatic Hydrocarbons on the Dark Reactions **16**
 - 1.7 Conclusion and Future Prospects **17**
 - References **18**
- 2 Cold Stress and Photosynthesis** **27**
Aditya Banerjee and Aryadeep Roychoudhury
 - 2.1 Introduction **27**
 - 2.2 Primary Targets of Cold Stress in Plants **27**
 - 2.3 Cold Stress Distorts the Chloroplast Membrane Integrity **28**
 - 2.4 Cold Stress Damages the Photosynthetic Apparatus **28**
 - 2.5 Cold Stress Affects Carbon Dioxide (CO₂) Fixation **31**
 - 2.6 Strategies to Ameliorate Cold Stress and Improve Photosynthesis **32**
 - 2.7 Conclusion and Future Perspectives **33**
 - Acknowledgements **33**
 - References **33**

3	High-Temperature Stress and Photosynthesis Under Pathological Impact	39
	<i>Murat Dikilitas, Eray Simsek, Sema Karakas, and Parvaiz Ahmad</i>	
3.1	Introduction	39
3.2	High-Temperature Stress on Crop Plants	41
3.3	High-Temperature Stress on Photosynthesis Mechanisms	43
3.4	Impact of Pathogens on Photosynthesis Mechanisms Under Temperature Stress	45
3.5	Genomic, Biochemical, and Physiological Approaches for Crop Plants Under Temperature and Pathogenic Stresses	51
3.6	Conclusions and Future Prospects	55
	References	55
4	Effect of Light Intensity on Photosynthesis	65
	<i>Rinukshi Wimalasekera</i>	
4.1	Introduction	65
4.2	Characteristics of Light	66
4.2.1	Photosynthetically Active Radiation (PAR)	66
4.3	Light Absorption and Pigments	67
4.3.1	Dissipation of Excess Light Energy	67
4.3.2	Photoinhibition	68
4.4	Light Absorption by Leaves	68
4.4.1	Light Absorption and the Anatomy, Morphology, and Biochemical Characteristics of Leaves	68
4.4.2	Light-Mediated Leaf Movement	69
4.4.3	Light Absorption by Sun and Shade Adapted Leaves	69
4.5	Light and Photosynthetic Responses	70
4.6	Conclusion and Future Prospects	70
	References	71
5	Regulation of Water Status, Chlorophyll Content, Sugar, and Photosynthesis in Maize Under Salinity by Mineral Mobilizing Bacteria	75
	<i>Yachana Jha</i>	
5.1	Introduction	75
5.2	Mineral Mobilizing Bacteria	76
5.3	Isolation and Identification of Mineral Mobilizing Bacteria	77
5.4	Mineral Mobilizing Bacteria Maintain the Photosynthetic Efficiency of Maize Under Salinity	78
5.5	Mineral Mobilizing Bacteria Maintain the Photosynthetic Efficiency of Plants by Regulating Chlorophyll Content	79
5.6	Mineral Mobilizing Bacteria Maintain the Photosynthetic Efficiency of Plants by Regulating Relative Water Content	80
5.7	Mineral Mobilizing Bacteria Maintain the Photosynthetic Efficiency of Plants by Regulating Stomatal Behavior	82
5.8	Mineral Mobilizing Bacteria Maintain Photosynthesis to Regulate Soluble Sugar by Altering Vascular Tissue	83
5.9	Mineral Mobilizing Bacteria Maintain the Photosynthetic Efficiency of Plants by Accumulating Various Osmoprotectants	84

5.10	Mineral Mobilizing Bacteria Maintain the Photosynthetic Efficiency of Plants by Regulating Sugar Biosynthesis	87
5.11	Mineral Mobilizing Bacteria Maintain the Photosynthetic Efficiency of Plants by Reducing Ethylene Biosynthesis	88
5.12	Mineral Mobilizing Bacteria Maintain the Photosynthetic Efficiency of Plants by Inducing Various Signaling Molecule	89
5.13	Conclusion	90
	References	90
6	Regulation of Photosynthesis Under Metal Stress	95
	<i>Mumtaz Khan, Neeha Nawaz, Iftekhar Ali, Muhammad Azam, Muhammad Rizwan, Parvaiz Ahmad, and Shafaqat Ali</i>	
6.1	Introduction	95
6.2	Effects of Metals on Photosynthesis	96
6.2.1	Reduction in CO ₂ Stomatal Conductance and Mesophyll Transport	96
6.2.2	Inhibition of Biosynthesis of Photosynthetic Pigments	97
6.2.3	Changes in Leaf Morphology and Chloroplast Ultrastructure	97
6.2.4	Induction of Reactive Oxygen Species	98
6.2.5	Metal-Induced Hormonal Changes	98
6.2.6	Alterations in Photosynthetic Enzymes	99
6.3	Mechanisms of Photosynthesis Regulation under Metal Stress	99
6.3.1	Cell Signaling and Growth Hormones	99
6.3.2	Avoiding and Scavenging Reactive Oxygen Species	100
6.3.3	Interconversion of Chlorophylls	101
6.3.4	Role of Alleviatory Agents in Photosynthesis Regulation	101
6.3.5	Photosynthesis Regulation Through Overexpression of Genes	102
6.4	Conclusions	102
	References	102
7	Heavy Metals and Photosynthesis: Recent Developments	107
	<i>Zahra Souri, Amanda A. Cardoso, Cristiane J. da-Silva, Letúzia M. de Oliveira, Biswanath Dari, Debjani Sihi, and Naser Karimi</i>	
7.1	Introduction	107
7.2	Heavy Metals and Hyperaccumulation	109
7.2.1	Characteristics of Hyperaccumulator Plants	110
7.2.2	Hyperaccumulation and Photosynthesis	112
7.3	Heavy Metals and Chloroplast Structure	113
7.4	Heavy Metals and Gas-Exchange	115
7.5	Heavy Metals and Photosynthetic Pigments	115
7.6	Heavy Metals and Photosystems (PSI and PSII)	117
7.7	Heavy Metals and Key Photosynthetic Enzymes	120
7.8	Heavy Metals and Antioxidant Defense Mechanism of the Photosynthetic System	121
7.9	Conclusion and Further Prospects	123
	References	125

8	Toward Understanding the Regulation of Photosynthesis under Abiotic Stresses: Recent Developments	135
	<i>Syed Sarfraz Hussain</i>	
8.1	Introduction: Abiotic Stresses, Photosynthesis and Plant Productivity	135
8.1.1	Impact of Abiotic Stress on the Photosynthetic System of Plants	137
8.1.2	Drought Stress	137
8.1.3	Salinity Stress	139
8.1.4	Cold Stress	142
8.1.5	Heat Stress	144
8.2	Overexpression of Photosynthesis Related Genes and Transcription Factors	145
8.3	Conclusions and Future Perspectives	146
	References	147
9	Current Understanding of the Regulatory Roles of miRNAs for Enhancing Photosynthesis in Plants Under Environmental Stresses	163
	<i>Syed Sarfraz Hussain, Meeshaw Hussain, Muhammad Irfan, and Bujun Shi</i>	
9.1	Introduction: Interaction Between miRNAs and Plant Growth/Functional Diversity of miRNAs and Their Impact in Plant Growth	163
9.2	miRNAs Involved in Photosynthesis and Other Downstream Biological Processes	165
9.3	Abiotic Stresses Drastically Affect Photosynthesis and Plant Productivity	166
9.4	Genome Wide miRNA Profiling Under Abiotic Stresses	168
9.5	Functional Characterization of miRNAs Associated with Photosynthesis	170
9.6	miRNAs and Shoot/Tiller Development	172
9.7	miRNAs in Root Development	173
9.8	miRNAs in Controlling Stomatal Density	175
9.9	miRNAs in Hormone Signaling	175
9.10	miRNAs in Controlling Nodule Development in Leguminous Crops	176
9.11	Conclusion and Future Perspective	177
	References	178
10	Mineral Mobilizing Bacteria Mediated Regulation of Secondary Metabolites for Proper Photosynthesis in Maize Under Stress	197
	<i>Yachana Jha</i>	
10.1	Introduction	197
10.2	Isolation and Inoculation of Mineral Mobilizing Bacteria	198
10.2.1	Mineral Mobilizing Bacteria Mediated Regulation of Nutrients for Secondary Metabolites Production and Photosynthesis	200
10.2.2	Mineral Mobilizing Bacteria Mediated Regulation of Chlorophyll Content for Secondary Metabolites Production and Photosynthesis	201
10.2.3	Mineral Mobilizing Bacteria Mediated Regulation of Carbon/Sugar Metabolites for Secondary Metabolites Production and Photosynthesis	203

10.2.4	Mineral Mobilizing Bacteria Mediated Regulation of Nitrogen Metabolites for Secondary Metabolites Production and Photosynthesis	206
10.2.5	Mineral Mobilizing Bacteria Mediated Regulation of Secondary Metabolites Production and Photosynthesis Under Biotic Stress	207
10.2.6	Mineral Mobilizing Bacteria Mediated Regulation of Secondary Metabolites Production and Photosynthesis Under Abiotic Stress	207
10.2.7	Mineral Mobilizing Bacteria Mediated Regulation of Gene Expression for Secondary Metabolites Production and Photosynthesis	208
10.3	Conclusion	210
	References	210
11	Role of Plant Hormones in Improving Photosynthesis	215
	<i>Belur Satyan Kumudini and Savita Veeranagouda Patil</i>	
11.1	Introduction	215
11.2	Phytohormones: Watchdogs of Plant Growth and Development	216
11.2.1	Auxins	216
11.2.2	Gibberellins or Gibberellic Acids	217
11.2.3	Cytokinins	217
11.2.4	Ethylene	218
11.2.5	Abscisic Acid	218
11.2.6	Jasmonic Acid	220
11.2.7	Salicylic Acid	220
11.2.8	Brassinosteroids	220
11.2.9	Strigolactones	221
11.3	Photosynthesis	221
11.3.1	Role of Plant Hormones in Photosynthesis	222
11.4	Phytohormones and Abiotic Stress Tolerance vis-à-vis Photosynthesis	223
11.4.1	Heavy Metals	223
11.4.2	Salinity	224
11.4.3	Drought	225
11.5	Deciphering the Role of Phytohormones in Perceiving Photosynthesis During Biotic Stress	225
11.6	Interplay Between the Phytohormones to Facilitate Photosynthesis Under Stress	227
11.7	Conclusion and Future Prospects	228
	Acknowledgments	228
	References	228
12	Promising Monitoring Techniques for Plant Science: Thermal and Chlorophyll Fluorescence Imaging	241
	<i>Aykut Saglam, Laury Chaerle, Dominique Van Der Straeten, and Roland Valcke</i>	
	Abbreviations	241
12.1	Introduction	241
12.2	Thermal Imaging	242
12.2.1	Plant Water Status and Drought Stress	243

12.2.2	Salt Stress	245
12.2.3	Herbicide Stress	245
12.2.4	Air Humidity and Air Pollutants	245
12.2.5	Ice Nucleation and Freezing	246
12.2.6	Plant-Pathogen Interactions	247
12.2.7	Herbivory Effects	249
12.3	Chlorophyll Fluorescence Imaging	249
12.3.1	Drought Stress	251
12.3.2	Light Stress	252
12.3.3	Herbicide Stress	252
12.3.4	Air Pollutants	254
12.3.5	Mineral Deficiency and Toxicity	255
12.3.6	Pathogen Effects	256
12.3.7	Herbivory Effects	258
12.4	Conclusions and Future Perspectives	259
	References	260
13	Introgression of C4 Pathway Gene(s) in C3 Plants to Improve Photosynthetic Carbon Assimilation for Crop Improvement: A Biotechnological Approach	267
	<i>Sonam Yadav and Avinash Mishra</i>	
13.1	Introduction	267
13.2	Carbon Assimilation	268
13.2.1	CO ₂ Assimilation in C3 Plants: Photorespiration a Major Constraint	268
13.2.2	CO ₂ Assimilation in C4 Plants: Efficient Photosynthesis	269
13.2.3	C3 vs. C4 Plants	271
13.3	Evolution of C4 Metabolism in Higher Plants	271
13.3.1	Environmental Imperatives/Obligations	272
13.3.2	Evolution of C4 Photosynthesis Gene(s)	272
13.4	Effect of Elevated CO ₂ on C3 and C4 Plants	273
13.5	Ectopic Expression of C4 Photosynthesis Genes in C3 Plants	274
13.5.1	Single Gene Introgression	274
13.5.2	Double Gene Introgression	275
13.6	Conclusion	275
	Acknowledgment	276
	References	276
14	Interaction of Photosynthesis, Productivity, and Environment	283
	<i>Ulduza Ahmad Gurbanova, Tofiq Idris Allahverdiyev, Hasan Garib Babayev, Shahnigar Mikayil Bayramov, and Irada Mammad Huseynova</i>	
14.1	Introduction	283
14.2	Plant Materials	286
14.3	Effect of Drought Stress on Some Physiological Traits, Yield, and Yield Components of Durum (<i>Triticum durum</i> Desf.) and Bread (<i>Triticum aestivum</i> L.) Wheat Genotypes	286

- 14.4 Subcellular Localization of the NADP-Malic Enzyme and NAD-Malic Enzyme Activity in the Leaves of the Wheat Genotypes Under Soil Drought Conditions 299
- 14.5 Physico-Chemical Parameters of NADP-Malic Enzyme and NAD-Malic Enzyme in the Leaves of the Barakatli 95 and Garagylchyg 2 Genotypes Under Soil Drought Conditions 302
- 14.6 Conclusion 310
- Acknowledgement 311
- References 311
