Introduction	xiii
Part 1: Genomics	1
1 Exploring Genomics Research in the Context of Some Underutilized Legumes—A Review	3
<i>Patrush Lepcha, Pittala Ranjith Kumar and N. Sathyanarayana</i>	
1.1 Introduction	3
1.2 Velvet Bean [<i>Mucuna pruriens</i> (L.) DC. var. <i>utilis</i> (Wall. ex Wight)] Baker ex Burck	4
1.3 <i>Psophocarpus tetragonolobus</i> (L.) DC.	7
1.4 <i>Vigna umbellata</i> (Thunb.) Ohwiet. Ohashi	8
1.5 <i>Lablab purpureus</i> (L.) Sweet	9
1.6 Avenues for Future Research	10
1.7 Conclusions	12
Acknowledgments	•12
References	12
2 Overview of Insecticidal Genes Used in Crop Improvement Program	19
<i>Neeraj Kumar Dubey, Prashant Kumar Singh, Satyendra Kumar Yadav and Kunwar Deelip Singh</i>	
2.1 Introduction	19
2.2 Insect-Resistant Transgenic Model Plant	21
2.3 Insect-Resistant Transgenic Dicot Plants	27
2.4 Insect-Resistant Transgenic Monocot Plants	34
2.5 Working Principle of Insecticidal Genes Used in Transgenic Plant Preparation	39
2.6 Discussion	41
References	42

3	Advances in Crop Improvement: Use of miRNA Technologies for Crop Improvement	55
	<i>Clarissa Challam, N. Nandhakumar and Hemant Balasaheb Kardile</i>	
3.1	Introduction	56
3.2	Discovery of miRNAs	56
3.3	Evolution and Organization of Plant miRNAs	57
3.4	Identification of Plant miRNAs	58
3.5	miRNA vs. siRNA	59
3.6	Biogenesis of miRNAs and Their Regulatory Action in Plants	60
3.7	Application of miRNA for Crop Improvement	61
3.8	Concluding Remarks	62
	References	70
4	Gene Discovery by Forward Genetic Approach in the Era of High-Throughput Sequencing	75
	<i>Vivek Thakur and Samart Wanchana</i>	
4.1	Introduction	75
4.2	Mutagens Differ for Type and Density of Induced Mutations	76
4.3	High-Throughput Sequencing is Getting Better and Cheaper	77
4.4	Mapping-by-Sequencing	77
4.5	Different Mapping Populations for Specific Need	81
4.6	Effect of Mutagen Type on Mapping	83
4.7	Effect of Bulk Size and Sequencing Coverage on Mapping	83
4.8	Challenges in Variant Calling	85
4.9	Cases Where Genome Sequence is either Unavailable or Highly Diverged	85
4.10	Bioinformatics Tools for Mapping-by-Sequencing Analysis	86
	Acknowledgments	87
	References	87
5	Functional Genomics of Thermotolerant Plants	91
	<i>Nagendra Nath Das</i>	
5.1	Introduction	91
5.2	Functional Genomics in Plants	93
5.3	Thermotolerant Plants	94
5.4	Studies on Functional Genomics of Thermotolerant Plants	98
5.5	Concluding Remarks	99
	Abbreviations	100
	References	100

Part 2: Metabolomics 105

6 A Workflow in Single Cell-Type Metabolomics: From Data Pre-Processing and Statistical Analysis to Biological Insights 107

Biswapriya B. Misra

6.1	Introduction	108
6.2	Methods and Data	109
6.2.1	Source of Data	109
6.2.2	Processing of Raw Mass Spectrometry Data	109
6.2.3	Statistical Analyses	109
6.2.4	Pathway Enrichment and Clustering Analysis	110
6.3	Results	110
6.3.1	Design of the Study and Data Analysis	110
6.3.2	The Guard Cell Metabolomics Dataset	110
6.3.3	Multivariate Analysis for Insights into Data Pre-Processing	113
6.3.4	Effect of Data Normalization Methods	119
6.4	Discussion	122
6.5	Conclusion	124
	Conflicts of Interest	124
	Acknowledgment	125
	References	125

7 Metabolite Profiling and Metabolomics of Plant Systems Using ^1H NMR and GC-MS 129

Manu Shree, Maneesh Lingwan and Shyam K. Masakapalli

7.1	Introduction	129
7.2	Materials and Methods	131
7.2.1	^1H NMR-Based Metabolite Profiling of Plant Samples	132
7.2.1.1	Metabolite Extraction	132
7.2.1.2	^1H NMR Spectroscopy	132
7.2.1.3	Qualitative and Quantitative Analysis of NMR Signals	134
7.2.2	Gas Chromatography–Mass Spectroscopy (GC-MS) Based Metabolite Profiling	134
7.2.2.1	Sample Preparation	134
7.2.2.2	GC-MS Data Acquisition	135
7.2.2.3	GC-MS Data Pretreatment and Metabolite Profiling	136
7.2.2.4	Validation of Identified Metabolites	136
7.2.3	Multivariate Data Analysis	137

7.3	Selected Applications of Metabolomics and Metabolite Profiling	139
	Acknowledgments	140
	Competing Interests	140
	References	140
8	OMICS-Based Approaches for Elucidation of Picrosides Biosynthesis in <i>Picrorhiza kurroa</i>	145
	Varun Kumar	
8.1	Introduction	146
8.2	Cross-Talk of Picrosides Biosynthesis Among Different Tissues of <i>P. kurroa</i>	148
8.3	Strategies Used for the Elucidation of Picrosides Biosynthetic Route in <i>P. kurroa</i>	148
8.3.1	Retro-Biosynthetic Approach	149
8.3.2	<i>In Vitro</i> Feeding of Different Precursors and Inhibitors	149
8.3.3	Metabolomics of Natural Variant Chemotypes of <i>P. kurroa</i>	150
8.4	Strategies Used for Shortlisting Key/Candidate Genes Involved in Picrosides Biosynthesis	151
8.4.1	Comparative Genomics	151
8.4.2	Differential Next-Generation Sequencing (NGS) Transcriptomes and Expression Levels of Pathway Genes Vis-à-Vis Picrosides Content	152
8.5	Complete Architecture of Picrosides Biosynthetic Pathway	153
8.6	Challenges and Future Perspectives	161
	Abbreviations	162
	References	163
9	Relevance of Poly-Omics in System Biology Studies of Industrial Crops	167
	Nagendra Nath Das	
9.1	Introduction	167
9.2	System Biology of Crops	169
9.3	Industrial Crops	171
9.4	Poly-Omics Application in System Biology Studies of Industrial Crops	176
9.5	Concluding Remarks	177
	Abbreviations	177
	References	178

Part 3: Bioinformatics 183**10 Emerging Advances in Computational Omics Tools for Systems Analysis of Gramineae Family Grass Species and Their Abiotic Stress Responsive Functions 185**

*Pandiyan Muthuramalingam, Rajendran Jeyasri,
Dhamodharan Kalaiyarasi, Subramani Pandian,
Subramanian Radhesh Krishnan, Lakkakula Satish,
Shunmugiah Karutha Pandian and Manikandan Ramesh*

10.1 Introduction 186**10.2 Gramineae Family Grass Species 187****10.2.1 *Oryza sativa* 187****10.2.2 *Setaria italica* 187****10.2.3 *Sorghum bicolor* 188****10.2.4 *Zea mays* 188****10.3 Abiotic Stress 188****10.4 Emerging Sequencing Technologies 198****10.4.1 NGS-Based Genomic and RNA Sequencing 199****10.4.2 Transcriptome Analysis Based on NGS 200****10.4.3 High-Throughput Omics Layers 201****10.5 Omics Resource in Poaceae Species 202****10.6 Role of Functional Omics in Dissecting the Stress Physiology of Gramineae Members 203****10.7 Systems Analysis in Gramineae Plant Species 204****10.8 Nutritional Omics of Gramineae Species 205****10.9 Future Prospects 205****10.10 Conclusion 206****Acknowledgments 207****References 207****11 OMIC Technologies in Bioethanol Production: An Indian Context 217**

Pulkit A. Srivastava and Ragothaman M. Yennamalli

11.1 Introduction 217**11.2 Indian Scenario 219****11.3 Cellulolytic Enzymes Producing Bacterial Strains Isolated from India 220****11.3.1 *Bacillus* Genus of Lignocellulolytic Degrading Enzymes 222****11.3.2 *Bhargavaea cecembensis* 222****11.3.3 *Streptomyces* Genus for Hydrolytic Enzymes 230**

11.4 Biomass Sources Native to India	230
11.4.1 <i>Albizia lucida</i> (Moj)	230
11.4.2 <i>Areca catechu</i> (Betel Nut)	231
11.4.3 <i>Arundo donax</i> (Giant Reed)	231
11.4.4 <i>Pennisetum purpureum</i> (Napier Grass)	231
11.4.5 <i>Brassica</i> Family of Biomass Crops	231
11.4.6 <i>Cajanus cajan</i> (Pigeon Pea)/ <i>Cenchrus americanus</i> (Pearl Millet)/ <i>Corchorus capsularis</i> (Jute)/ <i>Lens culinaris</i> (Lentil)/ <i>Saccharum officinarum</i> (Sugarcane)/ <i>Triticum</i> sp. (Wheat)/ <i>Zea mays</i> (Maize)	232
11.4.7 <i>Medicago sativa</i> (Alfalfa)	232
11.4.8 <i>Manihot esculenta</i> (Cassava)/ <i>Salix viminalis</i> (Basket Willow)/ <i>Setaria italica</i> (Foxtail Millet)/ <i>Setaria viridis</i> (Green Foxtail)	232
11.4.9 <i>Vetiveria zizanioides</i> (Vetiver or Khas)	232
11.4.10 Millets and <i>Sorghum bicolor</i> (Sorghum)	233
11.5 Omics Data and Its Application to Bioethanol Production	233
11.6 Conclusion	239
References	239

Part 4: Advances in Crop Improvement: Emerging Technologies 245

12 Genome Editing: New Breeding Technologies in Plants	247
<i>Kalyani M. Barbadikar, Supriya B. Aglawe, Satendra K. Mangrauthia, M. Sheshu Madhav and S.P. Jeevan Kumar</i>	
12.1 Introduction: Genome Editing	248
12.2 GE: The Basics	249
12.2.1 Nonhomologous End-Joining (NHEJ)	250
12.2.2 Homology Directed Repair (HR)	251
12.3 Engineered Nucleases: The Key Players in GE	251
12.3.1 Meganucleases	251
12.3.2 Zinc-Finger Nucleases	256
12.3.3 Transcription Activator-Like Effector Nucleases	257
12.3.4 CRISPR/Cas System: The Forerunner	258
12.4 Targeted Mutations and Practical Considerations	259
12.4.1 Targeted Mutations	259
12.4.2 Steps Involved	260
12.4.2.1 Selection of Target Sequence	261
12.4.2.2 Designing Nucleases	262

12.4.2.3 Transformation	263
12.4.2.4 Screening for Mutation	264
12.5 New Era: CRISPR/Cas9	264
12.5.1 Vector Construction	264
12.5.2 Delivery Methods	266
12.5.3 CRISPR/Cas Variants	266
12.5.3.1 SpCas9 Nickases (nSpCas9)	266
12.5.3.2 Cas9 Variant without Endonuclease Activity	266
12.5.3.3 FokI Fused Catalytically Inactive Cas9	267
12.5.3.4 Naturally Available and Engineered Cas9 Variants with Altered PAM	268
12.5.3.5 Cas9 Variants for Increased On-Target Effect	268
12.5.3.6 CRISPR/Cpf1	268
12.6 GE for Improving Economic Traits	269
12.6.1 Development of Next-Generation Smart Climate Resilient Crops	271
12.6.2 Breaking Yield Incompatibility Barriers and Hybrid Breeding	271
12.6.3 Creating New Variation through Engineered QTLs	271
12.6.4 Transcriptional Regulation	272
12.6.5 GE for Noncoding RNA, microRNA	272
12.6.6 Epigenetic Modifications	273
12.6.7 Gene Dosage Effect	273
12.7 Biosafety of GE Plants	273
12.8 What's Next: Prospects	276
References	276
13 Regulation of Gene Expression by Global Methylation Pattern in Plants Development	287
<i>Vrijesh Kumar Yadav, Krishan Mohan Rai, Nishant Kumar and Vikash Kumar Yadav</i>	
13.1 Introduction	288
13.2 Nucleic Acid Methylation Targets in the Genome	289
13.3 Nucleic Acid Methyl Transferase (DNMTase)	290
13.4 Genomic DNA Methylation and Expression Pattern	291
13.5 Pattern of DNA Methylation in Early Plant Life	292
13.6 DNA Methylation Pattern in Mushroom	293
13.7 Methylation Pattern in Tumor	294
13.8 DNA Methylation Analysis Approaches	294
13.8.1 Locus-Specific DNA Methylation	295
13.8.2 Genome-Wide and Global DNA Methylation	295

13.8.3 Whole Genome Sequence Analysis by Bioinformatics	
Analysis	296
References	297
14 High-Throughput Phenotyping: Potential Tool for Genomics	303
<i>Kalyani M. Barbadikar, Divya Balakrishnan, C. Gireesh, Hemant Kardile, Tejas C. Bosamia and Ankita Mishra</i>	
14.1 Introduction	304
14.2 Relation of Phenotype, Genotype, and Environment	304
14.3 Features of HTP	306
14.4 HTP Pipeline and Platforms	310
14.5 Controlled Environment-Based Phenotyping	311
14.6 Field-Based High-Throughput Plant Phenotyping (Fb-HTPP)	311
14.7 Applications of HTP	313
14.7.1 Marker-Assisted Selection and QTL Detection	314
14.7.2 Forward and Reverse Genetics	315
14.7.3 New Breeding Techniques	315
14.7.3.1 Envirotyping	315
14.8 Conclusion and Future Thrust	316
