

Contents at a Glance

Introduction	1
Part 1: The Lowdown on Genetics: Just the Basics	7
CHAPTER 1: Welcome to Genetics: What's What and Who's Who	9
CHAPTER 2: Basic Cell Biology	21
CHAPTER 3: Visualize Peas: Discovering the Laws of Inheritance	41
CHAPTER 4: Law Enforcement: Mendel's Laws Applied to Complex Traits	57
Part 2: DNA: The Genetic Material	73
CHAPTER 5: DNA: The Basis of Life	75
CHAPTER 6: Chromosomes: The Big Picture	91
CHAPTER 7: Replication: A Copy Machine for DNA	105
CHAPTER 8: DNA Sequencing: Decoding the Genome	123
CHAPTER 9: RNA: DNA's Close Cousin	137
CHAPTER 10: Translating the Genetic Code	151
CHAPTER 11: Gene Expression: What a Cute Pair of Genes	165
Part 3: Genetics and Your Health	181
CHAPTER 12: When Things Go Wrong: Changes in DNA Sequence	183
CHAPTER 13: Chromosome Disorders: It's All a Numbers Game	199
CHAPTER 14: Taking a Closer Look at the Genetics of Cancer	217
CHAPTER 15: Genetic Counseling, Risk Assessment, and Genetic Testing	235
CHAPTER 16: Treating Genetic Disorders and Using Genetics to Tailor Treatment	255
Part 4: Genetics and Your World	269
CHAPTER 17: Tracing Human History and the Future of the Planet	271
CHAPTER 18: Solving Mysteries Using DNA	287
CHAPTER 19: Genetic Makeovers: Using Genetic Engineering to Change the Genome	307
CHAPTER 20: Giving Ethical Considerations Their Due	327
Part 5: The Part of Tens	339
CHAPTER 21: Ten Defining Events in Genetics	341
CHAPTER 22: Ten Hot Issues in Genetics	349
Glossary	359
Index	365

Table of Contents

INTRODUCTION	1
About This Book	1
Conventions Used in This Book	2
Foolish Assumptions	2
How This Book Is Organized	3
Part 1: The Lowdown on Genetics: Just the Basics	3
Part 2: DNA: The Genetic Material	3
Part 3: Genetics and Your Health	3
Part 4: Genetics and Your World	3
Part 5: The Part of Tens	4
Icons Used in This Book	4
Beyond This Book	4
Where to Go from Here	5
 PART 1: THE LOWDOWN ON GENETICS: JUST THE BASICS	 7
CHAPTER 1: Welcome to Genetics: What's What and Who's Who	9
What Is Genetics?	9
Classical genetics: Transmitting traits from generation to generation	10
Molecular genetics: DNA and the chemistry of genes	11
Population genetics: Genetics of groups	12
Quantitative genetics: Getting a handle on heredity	13
Genetics as a Career	13
Exploring a genetics lab	14
Sorting through jobs in genetics	15
 CHAPTER 2: Basic Cell Biology	 21
Looking Around Your Cell	22
Cells without a nucleus	22
Cells with a nucleus	23
What's in a nucleus?	25
Examining the basics of chromosomes	25
So Where Are My Genes?	27

Mitosis: Splitting Up	29
Step 1: Time to grow	30
Step 2: Divvyng up the chromosomes	31
Step 3: The big divide	33
Meiosis: Making Cells for Reproduction	34
Meiosis I	35
Meiosis II	37
Mommy, where did I come from?	38
 CHAPTER 3: Visualize Peas: Discovering the	
Laws of Inheritance	41
Gardening with Gregor Mendel	42
Speaking the Language of Inheritance	44
Simplifying Inheritance	45
Establishing dominance	45
Segregating alleles	47
Declaring independence	48
Finding Unknown Alleles	50
Applying Basic Probability to the Likelihood of Inheritance	50
Solving Simple Genetics Problems	52
Deciphering a monohybrid cross	53
Tackling a dihybrid cross	53
 CHAPTER 4: Law Enforcement: Mendel's Laws Applied	
to Complex Traits	57
Dominant Alleles Rule . . . Sometimes	58
Wimping out with incomplete dominance	58
Keeping it fair with codominance	59
Dawdling with incomplete penetrance	60
Alleles Causing Complications	61
More than two alleles	61
Lethal alleles	63
Making Life More Complicated	63
When genes interact	63
Genes in hiding	65
Genes linked together	66
One gene with many phenotypes	69
Uncovering More Exceptions to Mendel's Laws	70
Epigenetics	70
Genomic imprinting	70
Anticipation	71
Environmental effects	72

PART 2: DNA: THE GENETIC MATERIAL	73
CHAPTER 5: DNA: The Basis of Life	75
Chemical Ingredients of DNA.....	76
Covering the bases.....	76
Adding a spoonful of sugar and a little phosphate.....	78
Assembling the Double Helix: The Structure of DNA.....	79
Starting with one: Weaving a single strand.....	79
Doubling up: Adding the second strand.....	81
Examining Different Varieties of DNA.....	85
Nuclear DNA.....	85
Mitochondrial DNA.....	85
Chloroplast DNA.....	86
Digging into the History of DNA.....	87
Discovering DNA.....	87
Obeying Chargaff's rules.....	88
Hard feelings and the helix: Franklin, Wilkins, Watson, and Crick.....	88
CHAPTER 6: Chromosomes: The Big Picture	91
Deconstructing the Double Helix.....	92
Anatomy of a Chromosome.....	93
Two Chromosomes Are Better than One (or Three).....	95
Sex Chromosomes: Is It a Boy or Girl?.....	96
Sex determination in humans.....	97
Sex determination in other organisms.....	101
CHAPTER 7: Replication: A Copy Machine for DNA	105
Unzipped: Creating the Pattern for More DNA.....	106
How DNA Copies Itself.....	109
Meeting the replication crew.....	110
Splitting the helix.....	113
Priming the pump.....	115
Leading and lagging.....	115
Joining all the pieces.....	117
Proofreading replication.....	117
Replication in Eukaryotes.....	118
Pulling up short: Telomeres.....	118
Finishing the job.....	120
How Circular DNAs Replicate.....	120
Theta.....	121
Rolling circle.....	121
D-loop.....	122

CHAPTER 8:	DNA Sequencing: Decoding the Genome	123
	Sequencing: Reading the Language of DNA	124
	Identifying the players in DNA sequencing	124
	Finding the message in sequencing results	127
	Newer, cheaper, faster	127
	Sequencing Your Way to the Human Genome	129
	The Human Genome Project	130
	Trying on a Few Genomes	132
	The yeast genome	134
	The elegant roundworm genome	134
	The chicken genome	135
CHAPTER 9:	RNA: DNA's Close Cousin	137
	You Already Know a Lot about RNA	137
	Using a slightly different sugar	138
	Meeting a new base: Uracil	139
	Stranded!	140
	Transcription: Copying DNA's Message into RNA's Language	141
	Getting ready to transcribe	142
	Initiation	146
	Elongation	147
	Termination	147
	Post-transcription Processing	148
	Adding cap and tail	148
	Editing the message	149
CHAPTER 10:	Translating the Genetic Code	151
	Discovering the Good in a Degenerate	152
	Considering the combinations	153
	Framed! Reading the code	154
	Not quite universal	155
	Meeting the Translating Team	155
	Taking the Translation Trip	156
	Initiation	156
	Elongation	159
	Termination	160
	Proteins Are Precious Polypeptides	162
	Recognizing radical groups	162
	Giving the protein its shape	162

CHAPTER 11: Gene Expression: What a Cute Pair of Genes	165
Getting Your Genes Under Control	166
To Be Expressed or Not To Be Expressed?	166
Regulating Gene Expression: A Time and Place for Everything	168
Controlling Transcription Before It Starts	169
Regulation of Gene Transcription: Flipping the Switch	170
Sequences controlling genes	170
Proteins controlling transcription	172
Hormones controlling transcription	173
Retroactive Control: Things That Happen after Transcription	174
Nip and tuck: RNA splicing	175
Shut up! mRNA silencing	175
mRNA expiration dates	177
Gene Control Lost in Translation	177
Modifying where translation occurs	177
Modifying when translation occurs	178
Modifying the protein shape	179
Prokaryotic Gene Expression	179
Bacterial gene organization	179
Bacterial gene expression	180

PART 3: GENETICS AND YOUR HEALTH 181

CHAPTER 12: When Things Go Wrong: Changes in DNA Sequence	183
Heritable or Not Heritable?	184
Facing the Consequences of Sequence Variants	184
Sorting Out Terminology	185
The phenotypic effect of a DNA sequence change	185
The type of DNA sequence change	186
What Causes Sequence Variants?	189
Spontaneous sequence variants	190
Induced sequence variants	194
Evaluating Options for DNA Repair	198
CHAPTER 13: Chromosome Disorders: It's All a Numbers Game	199
Chromosome Numbers: No More and No Less	200
Aneuploidy: Extra or missing chromosomes	200
Aneuploidy of the Autosomal Chromosomes	202
When chromosomes go missing	202
When too many chromosomes are left in	202

Aneuploidy of the Sex Chromosomes	205
Extra Xs	205
Extra Ys	206
Monosomy X	206
Exploring Variations in Chromosome Structure	206
Duplications	207
Deletions	208
Inversions	208
Translocations	209
Reciprocal translocations	209
Robertsonian translocations	210
Other things that go awry with chromosomes	211
How Chromosomes Are Studied	212
Big enough to see	212
Too small for the naked eye	214
Non-Invasive Prenatal Testing for Aneuploidy	215
CHAPTER 14: Taking a Closer Look at the Genetics of Cancer	217
Defining Cancer	218
Benign growths: Not always so harmless	218
Malignancies: Seriously scary results	219
Metastasis: Cancer on the move	220
Recognizing Cancer as a DNA Disease	221
Exploring the cell cycle and cancer	222
Demystifying chromosome abnormalities	228
Breaking Down the Types of Cancers	229
Hereditary Breast Cancer	231
Hereditary colorectal cancer	232
CHAPTER 15: Genetic Counseling, Risk Assessment, and Genetic Testing	235
Getting to Know Genetic Counselors	236
Building and Analyzing a Family Tree	237
Autosomal Inheritance: No Differences Among the Sexes	240
Autosomal dominant traits and disorders	240
Autosomal recessive traits and disorders	241
Found on Sex Chromosomes: Sex-linked Inheritance	244
X-linked recessive traits	245
X-linked dominant traits	247
Y-linked traits	248
Sex-limited traits	249
Sex-influenced traits	249

Testing for Genetic Disorders	249
Diagnostic testing	251
Prenatal diagnosis	251
Carrier testing	252
Predictive and susceptibility testing	252
Preimplantation genetic diagnosis	253
Pharmacogenetic testing	254
CHAPTER 16: Treating Genetic Disorders and Using Genetics to Tailor Treatment.....	255
Alleviating Genetic Disease through Gene Therapy	256
Inserting Healthy Genes into the Picture	256
Finding Vehicles to Get Genes to Work	259
Viruses that join right in	260
Viruses that are a little standoffish	261
Progress on the Gene Therapy Front	261
Utilizing Genetic Information for Precision Medicine	263
Pharmacogenetics (and pharmacogenomics)	263
Cytochrome P450 and drug metabolism	264
Decreasing the risk of side effects of treatment	266
Increasing the effectiveness of treatment	266
PART 4: GENETICS AND YOUR WORLD	269
CHAPTER 17: Tracing Human History and the Future of the Planet.....	271
Genetic Variation Is Everywhere	272
Allele frequencies	272
Genotype frequencies	274
Breaking Down the Hardy-Weinberg Law of Population Genetics	275
Relating alleles to genotypes	275
Violating the law	277
Mapping the Gene Pool	279
One big happy family	279
Ancestry testing	280
Uncovering the secret social lives of animals	281
Changing Forms over Time: The Genetics of Evolution	282
Genetic variation is key	283
Where new species come from	283
Growing the evolutionary tree	284

CHAPTER 18: Solving Mysteries Using DNA	287
Rooting through Your DNA to Find Your Identity	288
Investigating the Scene: Where's the DNA?	290
Collecting biological evidence	290
Moving to the lab	292
Employing DNA to Catch Criminals (And Free the Innocent)	297
Matching the evidence to the bad guy	297
Taking a second look at guilty verdicts	299
It's All Relative: Finding Family	300
Paternity testing	300
Relatedness testing	302
CHAPTER 19: Genetic Makeovers: Using Genetic Engineering to Change the Genome	307
Genetically Modified Organisms Are Everywhere	308
Old Genes in New Places	309
Following the transgenesis process	311
Making a transgene using recombinant DNA technology	311
Modifying the gene to reside in its new home	313
Looking at the GMO Menagerie	313
Transgenic animals	313
Transgenic insects	316
Transgenic bacteria	316
Transgenic plants	318
Getting new genes into the plant	318
Exploring commercial applications	319
Weighing points of contention	320
Changing the Blueprint: Gene Editing	321
CRISPR-Cas9 gene editing	323
Germline versus somatic gene editing	325
Discussing the ethics of gene editing	325
CHAPTER 20: Giving Ethical Considerations Their Due	327
Profiling Genetic Discrimination	327
Ordering Up Designer Babies	329
Ethical Issues Surrounding Genetic Testing	330
Informed Consent	331
Patient Autonomy	333
Privacy and Confidentiality	334
Incidental Findings	335
Direct-to-Consumer Testing	336
Practicing Safe Genetic Treatments	337
Genetic Property Rights	338

PART 5: THE PART OF TENS	339
CHAPTER 21: Ten Defining Events in Genetics	341
The Publication of Darwin's "The Origin of Species".....	341
The Rediscovery of Mendel's Work.....	342
DNA Transformation.....	343
The Discovery of Jumping Genes	344
The Birth of DNA Sequencing	345
The Invention of PCR.....	345
The Development of Recombinant DNA Technology.....	346
The Invention of DNA Fingerprinting	347
The Birth of Developmental Genetics	347
The Work of Francis Collins and the Human Genome Project	348
CHAPTER 22: Ten Hot Issues in Genetics	349
Direct-to-Consumer Genetic Testing	349
Whole Exome Sequencing	350
Whole Genome Sequencing.....	352
Stem Cell Research	352
The ENCODE Project	353
Proteomics	354
Gene Chips	355
Evolution of Antibiotic Resistance.....	356
Circumventing Mother Nature	356
Genetics from Afar	357
GLOSSARY	359
INDEX	365
