

Contents

1	The Beginnings of Biomimetics	1
1.1	Early Attempts at Biomimicry: The Influence of Birds on the Development of Aircraft	3
1.2	The Fathers of Modern Biomimetics: Percy Shaw and George de Mestral	4
	Relevant Innovations Described in Other Chapters	6
	Note	6
	Suggested Reading	7
2	Transport, Motion, and Energy	9
2.1	Birds and Bullet Trains	9
2.2	More Owl-Inspired Noise Reduction	13
2.3	Humpback Whales and Wind Turbines	14
2.4	Fish Shoals and Wind Farms	16
2.5	Liquid Movement in Nature: The Importance of Spirals	17
2.6	A Tree-Inspired Wind Turbine	20
2.7	More Fishy Developments	22
2.8	A Fishy Failure: The Boxfish Car	22
2.9	Fuel Efficiency Inspired by Sharks	24
2.10	Using Biology to Counteract Biofouling	25
2.11	The New Generation of Ornithopters	28
	Relevant Innovations Described in Other Chapters	30
	Note	30
	Suggested Reading	30
3	Colour and Light	31
3.1	Photonic Biomimicry	36
3.2	Structure Can Influence Light Output	38
3.3	Cephalopods and Camouflage	39
3.4	Photonic Cooling	43
3.5	Biomimetic Antireflective Coatings	46
3.6	A Novel Glass Inspired by Spiders	47
	Relevant Innovations Described in Other Chapters	49
	Suggested Reading	49
4	The Built Environment	51
4.1	Cooling Buildings the Termite Way	51
4.2	Functional Structures Inspired by Nature	55
4.3	Self-Cleaning Surfaces	59

- 4.4 Self-Healing Concrete 63
- 4.5 New Building Materials 64
- 4.6 A Sunshade Modelled on Trees 65
- 4.7 Solar Ivy 66
- 4.8 The Future: Fully Responsive Buildings 67
- Relevant Innovations Described in Other Chapters 68
- Note 68
- Suggested Reading 68

5 Smart Materials 71

- 5.1 Self-Cleaning Materials 71
 - 5.1.1 Reducing Bacterial Growth Without Disinfectants 71
 - 5.1.2 Pitcher Plants and Non-stick Surfaces 74
- 5.2 Novel Adhesives 76
 - 5.2.1 Novel Glues Inspired by Marine Animals 76
 - 5.2.2 Hierarchical Steels Modelled on Byssal Threads 78
 - 5.2.3 Glues from Terrestrial Slugs 79
 - 5.2.4 Gecko-Inspired Dry Adhesives 81
- 5.3 Self-Healing Materials 83
- 5.4 Novel Textiles 85
 - 5.4.1 Smart Textiles that Respond to their Surroundings 85
 - 5.4.2 A Polar Bear-Inspired Material for Heat Insulation 86
 - 5.4.3 Safety Helmets Inspired by Woodpeckers 86
 - Relevant Material in Other Chapters 87
 - Note 87
 - Suggested Reading 88

6 Smart Devices 91

- 6.1 Burrowing Robots Based on Razor Clams 91
- 6.2 Novel Sensors 92
 - 6.2.1 Bioinspired Underwater Pressure Sensors 92
 - 6.2.2 Crack-Based Strain Sensors 93
 - 6.2.3 Ice Plants and Actuators 94
- 6.3 Passive Water Collection 96
 - 6.3.1 Inspiration from the Namib Desert Beetle 96
 - 6.3.2 Collecting Water with Spiders' Webs 98
 - 6.3.3 Cactus-Inspired Water Collection 100
- 6.4 Insects and Origami 100
- 6.5 Mosquito Bites and Injection Needles 103
- Suggested Reading 104

7 The Influence of Biology on Computer Science 107

- 7.1 Genetic Algorithms 108
- 7.2 Swarm Intelligence 110
- 7.3 Human Swarming 112
- Suggested Reading 113

8 The Future of Biomimetics 115

- Suggested Reading 116
