

Contents in brief

Preface

About the companion website

PART I THE NATURE OF VIRUSES

- Chapter 1 Towards a definition of a virus
- Chapter 2 The structure of virus particles
- Chapter 3 Classification of viruses
- Chapter 4 The evolution of viruses
- Chapter 5 Techniques for studying viruses

PART II VIRUS GROWTH IN CELLS

- Chapter 6 The process of infection: I. Virus attachment and entry into cells
- Chapter 7 The process of infection: IIA. The replication of viral DNA
- Chapter 8 The process of infection: IIB. Genome replication in RNA viruses
- Chapter 9 The process of infection: IIC. The replication of RNA viruses with a DNA intermediate and vice versa
- Chapter 10 The process of infection: IIIA. Gene expression in DNA viruses and reverse-transcribing viruses
- Chapter 11 The process of infection: IIIB. Gene expression and its regulation in RNA viruses
- Chapter 12 The process of infection: IV. The assembly of viruses

PART III VIRUS INTERACTIONS WITH THE WHOLE ORGANISM

- Chapter 13 Innate and intrinsic immunity
- Chapter 14 The adaptive immune response
- Chapter 15 Interactions between animal viruses and cells
- Chapter 16 Animal virus-host interactions
- Chapter 17 Mechanisms in virus latency
- Chapter 18 Transmission of viruses

PART IV VIRUSES AND HUMAN DISEASE

- Chapter 19 Human viral disease: an overview
- Chapter 20 Influenza virus infection
- Chapter 21 HIV and AIDS

293

295

309

327

Chapter 22	Viral hepatitis	347
Chapter 23	Vector-borne infections	362
Chapter 24	Exotic and emerging viral infections	376
Chapter 25	Carcinogenesis and tumour viruses	388
Chapter 26	Vaccines and immunotherapy: the prevention of virus diseases	409
Chapter 27	Antiviral therapy	431
Chapter 28	Prion diseases	443

PART V VIROLOGY – THE WIDER CONTEXT 459

Chapter 29	The economic impact of viruses	461
Chapter 30	Recombinant viruses: making viruses work for us	472
Chapter 31	Viruses: shaping the planet	484
