

TABLE OF CONTENTS

Preface.....	xi
Acknowledgments.....	xiii
Editors.....	xv

SECTION I: AMINO ACIDS, PEPTIDES, AND PROTEINS

Properties of Amino Acids.....	2
Data on the Naturally Occurring Amino Acids.....	6
Coefficients of Solubility Equations of Certain Amino Acids in Water.....	31
Heat Capacities, Absolute Entropies, and Entropies of Formation of Amino Acids and Related Compounds.....	32
Heat of Combustion, Enthalpy, and Free Energy of Formation of Amino Acids and Related Compounds.....	34
Solubilities of Amino Acids in Water at Various Temperatures.....	36
Heats of Solution of Amino Acids in Aqueous Solution at 25° C.....	37
Free Energies of Solution and Standard Free Energy of Formation of Amino Acids in Aqueous Solution at 25° C.....	39
Far Ultraviolet Absorption Spectra of Amino Acids.....	40
UV Absorption Characteristics of <i>N</i> -Acetyl Methyl Esters of the Aromatic Amino Acids, Cystine, and of <i>N</i> -Acetylcysteine.....	42
Numerical Values of the Absorbances of the Aromatic Amino Acids in Acid, Neutral, and Alkaline Solutions.....	43
Hydrophobicities of Amino Acids and Proteins.....	48
Partial Volumes of Amino Acids.....	63
Deamidation of Asparagine.....	66
Michael Reactions of Proteins.....	70
Molecular Weights of Proteins and Some Other Materials Including Sedimentation, Diffusion, and Frictional Coefficients and Partial Specific Volumes.....	74
Molar Absorptivity and $A_{1\text{cm}}^{1\%}$ Values for Proteins at Selected Wavelengths of the Ultraviolet and Visible Region.....	111
Temperature Coefficients of Apparent Partial Specific Volumes of Proteins Expressed in ml/g/deg (dV/dT).....	225
Protein pK Values.....	226
Intrinsic Viscosity of Proteins.....	230
Infrared Spectra of Proteins.....	232
Volume Changes for Some Macromolecule Association Reactions.....	233
Assay of Solution Protein Concentration.....	234
Spectrophotometric Determination of Protein Concentration in the Short-Wavelength Ultraviolet.....	239

SECTION II: ENZYMES

Turnover of Enzymes in Tissues.....	242
Molecular Turnover of Cytochromes in Animals.....	246
Matrix Metalloproteinases.....	247
Proteases in the Interstitial Space.....	259
Enzymes in Synthetic Organic Chemistry.....	267
Therapeutic Enzymes.....	278
Protease Inhibitors and Protease Inhibitor Cocktails.....	282

SECTION III: LIPIDOMICS AND LIPIDOMES

Evolution of the Classification and Nomenclature of Lipids.....	296
A Brief Glossary for Lipidomics.....	297
A Comprehensive Classification System for Lipids.....	298
Properties of Fatty Acids and Their Methyl Esters.....	322
Densities, Specific Volumes, and Temperature Coefficients of Fatty Acids from C ₈ to C ₁₂	324
Composition and Properties of Common Oils and Fats.....	325
Spectral Properties of Fatty Acids.....	329
IR Active Bands of Phosphatidylethanolamines (PE).....	336
Concentration of Some Fatty Acids in Human Blood, Blood Plasma or Blood Serum.....	340
Some Unusual Fatty Acid Structures.....	346

SECTION IV: VITAMINS AND COENZYMES

Properties of Vitamins.....	352
Biological Characteristics of Vitamins.....	362
Vitamins.....	365
Vitamin Names Discarded.....	373

SECTION V: NUCLEIC ACIDS

Some Definitions for Nucleic Acids	376
UV Spectral Characteristics and Acidic Dissociation Constants of 280 Alkyl Bases, Nucleosides, and Nucleotides	380
Ultraviolet Absorbance of Oligonucleotides Containing 2'-O-Methylpentose Residues	387
Spectrophotometric Constants of Ribonucleotides	388
Purines, Pyrimidines, Nucleosides, and Nucleotides: Physical Constants and Spectral Properties	391
Chemical Modification of Nucleic Acids	479
Polymerase Chain Reaction	492
Gene Editing	495

SECTION VI: GLYCOSCIENCE

Nomenclature of Carbohydrates	500
Chemical Modification of Carbohydrates	507
Some Properties of Glycosaminoglycans	516
Sugar Mimetics	522
Intrinsic Viscosity of Polysaccharides	525

SECTION VII: CHEMICAL BIOLOGY AND DRUG DESIGN

Unnatural Amino Acids for Incorporation into Proteins	530
Structures and Symbols for Synthetic Amino Acids Incorporated into Synthetic Polypeptides	532
Properties of the α -Keto Acid Analogs of Amino Acids	540
α,β -Unsaturated Amino Acids	542
Amino Acid Antagonists	543
Particle Diameter	549
Weights of Cells and Cell Constituents	550
Click Chemistry	551
A Listing of Log P Values, Water Solubility, and Molecular Weight for Some Selected Chemicals	555

SECTION VIII: PHYSICAL AND CHEMICAL DATA

IUBMB-IUPAC Joint Commission on Biochemical Nomenclature (JCBN) Recommendations for Nomenclature and Tables in Biochemical Thermodynamics	560
Standard Transformed Gibbs Energies of Formation for Biochemical Reactants	572
Enthalpy, Entropy, and Free Energy Values for Biochemical Redox Reactions	575
Oxidation-Reduction Potentials, Absorbance Bands, and Molar Absorbance of Compounds Used in Biochemical Studies	576
Calorimetric ΔH Values Accompanying Conformational Changes of Macromolecules in Solution	583
Free Energies of Hydrolysis and Decarboxylation	594
Deci-Normal Solutions of Oxidation and Reduction Reagents	598
Guidelines for Potentiometric Measurements in Suspensions Part A—The Suspension Effect	599
Ionization Constants of Acids and Bases	606
Guidelines for NMR Measurements for Determination of High and Low pK_a Values	647
Measurement and Interpretation of Electrokinetic Phenomena	654
Measurement of pH Definition, Standards, and Procedures	682
General Comments on Buffers	699
List of Buffers	701
Brønsted Acidities	713
Buffer Solutions	714
Amine Buffers Useful for Biological Research	718
Preparation of Buffers for Use in Enzyme Studies	719
Indicators for Volumetric Work and pH Determinations	723
Acid and Base Indicators	725
Specific Gravity of Liquids	729
Properties of Some Solvents	733
Chemicals Commonly Used in Biochemistry and Molecular Biology and their Properties	737
Common Detergents Used in Biochemical Research	797
Some Properties of Detergents and Surfactants Used in Biochemistry and Molecular Biology	799
Some Biological Stains and Dyes	806
Mordant Dyes	829
Metal Chelating Agents	832
Metallomics: Guidelines for Terminology and Critical Evaluation of Analytical Chemistry Approaches (IUPAC Technical Report)	840
Water	847
General Information on Spectroscopy	849
Plastics	851

Chemical and Physical Properties of Various Commercial Plastics.....	857
Chemical Resistance of Plastics.....	858
Generic Source-Based Nomenclature for Polymers.....	860
Definitions of Terms Relating to Reactions of Polymers and to Functional Polymeric Materials.....	866
Definitions of Terms Related to Polymer Blends, Composites, and Multiphase Polymeric Materials.....	874
Terminology for Biorelated Polymers and Applications (IUPAC Recommendations 2012).....	885
Intrinsic Viscosity of Poly(ethylene glycol).....	901
International Union of Pure and Applied Chemistry.....	903
Organic Name Reactions Useful in Biochemistry and Molecular Biology.....	917
Brief Guide to the Nomenclature of Inorganic Chemistry.....	944
Properties of Fluorescent Probes Commonly Used for Membrane Studies.....	951
Chromatography.....	953
Blotting Technologies.....	971
Oxidation of Thiols.....	973
Partial Volumes for Some Selected Compounds.....	976
Appendix: Abbreviations and Acronyms.....	979
Index.....	993
