Section I Abiotic Stress Management and Its Impact on Plants

1. Effects of Different Abiotic Stresses on Primary Metabolism	3
<i>Belen Colavolpe, Fabiana Espasandin, Juan Manuel Vilas, Santiago Maiale, Pedro Sansberro, and Oscar A. Ruiz</i>	
2. Metabolic Adaptation and Allocation of Metabolites to Phloem Transport and Regulation Under Stress	21
<i>Kathryn Dumschott, Andrew Merchant, and Millicent Smith</i>	
3. Mechanism of Salt Stress Tolerance and Pathways in Crop Plants	27
<i>Manu Kumar and Mahipal Singh Kesawat</i>	
4. Recent Advances on the Modulatory Role of ATPases toward Salt Tolerance in Plants	45
<i>Soumya Mukherjee</i>	
5. Physiological and Phenological Responses of Crop Plants under Heat Stress	55
<i>Allah Ditta</i>	
6. Biochemical and Molecular Mechanisms of High-Temperature Stress in Crop Plants	65
<i>Gurpreet Kaur, Bavita Asthir, and Navtej S. Bains</i>	
7. Profiles of Antioxidant Isoenzymes and Physiological Behavior of Tomato Exposed to NaCl Stress and Treated with Salicylic Acid	73
<i>Salma Wasti, Nizar Dhaoui, Ibtissem Medyouni, Hajer Mimouni, Hela Ben Ahmed, and Abdellah Chalh</i>	
8. Toxicity of Heavy Metal and Its Mitigation Strategies Through Application of Nutrients, Hormones, and Metabolites	81
<i>Rachana Singh, Parul Parihar, Anita Singh, and Sheo Mohan Prasad</i>	
9. Regulation of Pesticide Stress on Metabolic Activities of Plant	99
<i>Santwana Tiwari, Anita Singh, and Sheo Mohan Prasad</i>	
10. Oxidative Stress and Its Management in Plants During Abiotic Stress	111
<i>Parammal Faseela, Asari Kandi Sinisha, Thuruthummel Thomas Dhanya Thomas, and Jos Thomas Puthur</i>	
11. Plant Genome Response Related to Phenylpropanoid Induction under Abiotic Stresses	127
<i>Ariel D. Arencibia</i>	
12. Metabolic Control of Seed Dormancy and Germination: New Approaches Based in Seed Shape Quantification in Desert Plants	137
<i>Emilio Cervantes, José Javier Martín Gómez, and Ezzeddine Saadaoui</i>	
13. Plant Ionomics: An Important Component of Functional Biology	147
<i>Anita Mann, Sangeeta Singh, Gurpreet, Ashwani Kumar, Pooja, Sujit Kumar, and Bhumesh Kumar</i>	

Section II Role of Major Plant Metabolites During Abiotic Stress Management

14. Role of Glutamate-Derived Amino Acids under Stress Conditions: The Case of Glutamine and Proline..... 157
Marco Biancucci, Roberto Mattioli, Adra Mouellef, Nadia Ykhlef, and Maurizio Trovato
15. Role of Glycinebetaine and Trehalose as Osmoregulators During Abiotic Stress Tolerance in Plants..... 171
Mona G. Dawood and Mohamed E. El-Awadi
16. Polyamine Metabolism and Abiotic Stress Tolerance in Plants 191
Rubén Alcázar and Antonio F. Tiburcio
17. Plant Glycine-Rich Proteins and Abiotic Stress Tolerance..... 203
Juan Francisco Jiménez-Bremont, Maria Azucena Ortega-Amaro, Itzell Eurídice Hernández-Sánchez, Alma Laura Rodríguez-Piña, and Israel Maruri-Lopez
18. Compatible Solutes and Abiotic Stress Tolerance in Plants 213
Vinay Kumar, Tushar Khare, Samrin Shaikh, and Shabir H. Wani
19. Protective Role of Indoleamines (Serotonin and Melatonin) During Abiotic Stress in Plants..... 221
Ramakrishna Akula, Sarvajeet Singh Gill, and Gokare A. Ravishankar
20. Flavonoid Accumulation as Adaptation Response in Plants during Abiotic Stresses 229
Rubal, Ashok Dhawan, and Vinay Kumar
21. The Role of Gamma Aminobutyric Acid (GABA) During Abiotic Stress in Plants 239
Paramita Bhattacharjee, Sasanka Chakraborti, Soumi Chakraborty, and Kaninika Paul

Section III Role of Specialized Proteins During Abiotic Stress Management

22. MicroRNAs: Emerging Roles in Abiotic Stresses and Metabolic Processes..... 251
Susana S. Araújo, Carolina Gomes, Jorge A.P. Pavia, Alma Balestrazzi, and Anca Macovei
23. Current Understanding of Regulation of GBF3 Under Abiotic and Biotic Stresses and Its Potential Role in Combined Stress Tolerance..... 267
Sandeep Kumar Dixit, Aarti Gupta, and Muthappa Senthil-Kumar
24. microRNAs: Key Modulators of Drought Stress Responses in Plants 273
A. Thilagavathy, Kavya Naik, and V.R. Devaraj
25. Proteomics of Salinity Stress: Opportunities and Challenges..... 285
Shweta Jha

Section IV Role of Signaling Molecules Under Abiotic Stress Management

26. Signaling Molecules and Their Involvement in Abiotic and Biotic Stress Response Crosstalk in Plants..... 295
V.R. Devaraj and Myrene Dsouza
27. Current Understanding of the Role of Jasmonic Acid during Photoinhibition in Plants..... 311
Ruqia Mushtaq, Sarvajeet Singh Gill, Shruti Kaushik, Anil K. Singh, Akula Ramakrishna, and Geetika Sirhindi
28. Current Scenario of NO (S-Nitrosylation) Signaling in Cold Stress..... 329
Yaiphabi Sougrakpam, Priyanka Babuta, and Renu Deswal
29. Physiological Roles of Brassinosteroids in Conferring Temperature and Salt Stress Tolerance in Plants 339
Geetika Sirhindi, Renu Bhardwaj, Manish Kumar, Sandeep Kumar, Neha Dogra, Harpreet Sekhon, Shruti Kaushik, and Isha Madaan

Section V Biotechnological Applications to Improve the Plant Metabolic Pathways Towards Better Adaptations

30. Genetic Engineering Approaches for Abiotic Stress Tolerance in Broccoli: Recent Progress.....	361
<i>Pankaj Kumar, Ajay Kumar Thakur, and Dinesh Kumar Srivastava</i>	
31. Impact of Abiotic Stresses on Metabolic Adaptation in Opium Poppy (<i>Papaver somniferum</i> L.).....	369
<i>Ankesh Pandey, Satya N. Jena, and Sudhir Shukla</i>	
32. In Vitro Selection and Genetic Engineering for Abiotic Stress Tolerant Plants and Underlying Mechanism	381
<i>Srinath Rao and H. Sandhya</i>	
33. Plant-Environment Interaction: Influence of Abiotic Stress on Plant Essential Oil Yield and Quality	391
<i>Marine Hussain, Barbi Gogoi, Babita Joshi, Bitupon Borah, Lucy Lalthafamkimi, and Brijmohan Singh Bhau</i>	
34. Differences in Adaptation to Water Stress in Stress Sensitive and Resistant Varieties of Kabuli and Desi Type Chickpea.....	403
<i>Nadia Fatnassi, Ralph Horres, Natasa Cerekovic, Angelo Santino, and Palmiro Poltronieri</i>	
Index.....	413
