

Contents

<i>Preface</i>	iii
1. An Index of Non-Lichenized Fungi Recorded in the Vicinity of Syowa Station, East Antarctica <i>Masaharu Tsuji</i>	1
2. Diversity and Ecology of Fungi in Polar Region: Comparisons Between Arctic and Antarctic Plant Remains <i>Takashi Osono, Shunsuke Matsuoka, Satoru Hobara, Dai Hirose and Masaki Uchida</i>	17
3. Snow Molds and Their Antagonistic Microbes in Polar Regions <i>Tamotsu Hoshino, Hisahiro Morita, Yuka Yajima, Masaharu Tsuji, Motoaki Tojo and Oleg B. Tkachev</i>	30
4. Pathogenic Fungi on Vascular Plants in the Arctic: Diversity, Adaptation, Effect on Host and Ecosystem, and Response to Climate Change <i>Shota Masumoto</i>	44
5. DNA Metabarcoding for Fungal Diversity Investigation in Polar Regions <i>Shunsuke Matsuoka, Yoriko Sugiyama and Hideyuki Doi</i>	67
6. Oomycetes in Polar Regions <i>Motoaki Tojo</i>	83
7. Biotechnological Potentials of Arctic Fungi <i>Purnima Singh and R. Kanchana</i>	92
8. Dairy Wastewater Treatment Under Low-Temperature Condition by an Antarctic Basidiomycetous Yeast <i>Masaharu Tsuji, Sakae Kudoh and Tamotsu Hoshino</i>	110
9. Ethanol Fermentation by the Basidiomycetous Yeast <i>Mrakia blollopis</i> Under Low Temperature Conditions <i>Masaharu Tsuji and Tamotsu Hoshino</i>	120
<i>Index</i>	133
<i>Color Plate Section</i>	135
