ACKNOWLEDGMENTS	x
-----------------------	---

Chapter 1

BIOLOGIC VARIATION INTRODUCED	1
Biologic Variation	3
Human Genetics — A Review	5
Population Genetics — An Overview	6
References	10

Chapter 2

SURFACE VARIATIONS AND ANATOMIC DIFFERENCES	13
Surface Variation	13
Color	13
Mongolian Spots	13
Sun Protection	13
Other Skin Pigment Differences	14
Iris and Retina Color	15
Pigment Problems	15
Secretions	16
Sweat and Sebum	16
Ear Wax	16
Ear Wax and Sweat Correlations	17
Surface Anatomy	17
Lip Pits	17
Cleft Uvulas	18
Earlobe Creases	18
Pigmentary Demarcation Lines	18
Moles	18
Fingerprints	19
Anatomic Variation	19
Body Proportions	19
Height	19
Weight	20

Muscle Mass	22
Body Proportions	22
Bones	22
Bone Density	22
Bone Variation	23
Pelvic Measurements and Newborn Size	25
Birth Weight	25
Gestation Length	26
Head Size	26
Pelvis Size	26
Pulmonary Function	26
Teeth	26
Soft Tissue	28
Lower Extremity Venous Valves	28
Mammary Venous Plexus	28
Peroneus Tertius Muscle	28
Palmaris Longus Muscle	29
Serratus Anterior Muscle	29
Breast Size	29
Bladder Shape and Ureteric Course	29
Strabismus	30
Exophthalmus	30
Summary	30
References	31
 Chapter 3	
DEVELOPMENTAL VARIATION IN CHILDHOOD	39
Body Size and Proportion Differences	39
Height and Growth Rate	39
Body Fat	40
Birth Weight and Newborn Body Proportions	41
Developmental Maturity Differences	43
Skeletal and Neurologic Maturity	43
Motor Development	45
Puberty	45
Tooth Emergence	46
Environmental Effects	46
Climate	46
Altitude	47
Diet and Disease	47
Surface Features	48
Orofacial Characteristics	48
Ear Wax	49
Birthmarks	49

Common Clinical Measurements	49
Blood Pressure	50
Pulse and Temperature	50
Laboratory Measures	50
Disease Differential	52
Neonatal Jaundice	52
ABO Incompatibility	53
Glucose-6-Phosphate Dehydrogenase (G6PD) Deficiency	53
Cystic Fibrosis	53
Sickle Cell Disease	53
Otitis Media	54
Congenital Abnormalities	54
Other Variations	55
Lactose Intolerance	55
Twinning Rates	56
Summary	56
References	57

Chapter 4

DEVELOPMENTAL VARIATION IN ADULTHOOD	67
Body Size, Shape, and Composition	69
Loss of Height and Bone Density	69
Weight Changes	71
Skull and Facial Changes	71
Brain Changes	72
Surface Manifestations	72
Developmental Changes	73
Menopause	73
Sensory Changes	73
Vision	73
Hearing	74
Taste	74
Smell	75
Touch	75
Gastrointestinal Function	75
Changes in Laboratory Values	76
Hemoglobin and Hematocrit	76
Blood Glucose	76
Cholesterol and Lipoprotein Levels	76
Changes in Clinical Measures	77
Pulse	77
Blood Pressure	77
Disease Susceptibility	78
Osteoarthritis	79

Longevity Prediction and Promotion	80
Summary	82
References	83

Chapter 5

BIOCHEMICAL VARIATION AND DIFFERENTIAL

DISEASE SUSCEPTIBILITY

Biochemical Variants	97
Differential Drug Metabolism	97
Ethanol	102
Isoniazid	102
Phenylthiocarbamide	102
Succinylcholine	103
Antihypertensives	103
Lactose Intolerance	103
Malaria-Related Conditions	104
Sickle Cell Hemoglobin	105
Thalassemia	105
Glucose-6-Phosphate Dehydrogenase (G6PD) Deficiency	106
Duffy Blood Group	106
Differential Disease Susceptibility	107
Cancer	108
Breast Cancer	108
Prostate Cancer	109
Skin Cancer	109
Digestive Track Cancer	110
Gallbladder Cancer	110
Diabetes	110
Gallbladder Disease	112
Glaucoma	113
Heart Disease, Hypertension, and Stroke	113
Coronary Artery Disease	113
Hypertensive Heart Disease	114
Stroke	116
Hereditary Polymorphic Light Eruption	117
Multiple Sclerosis	117
Tooth Decay and Periodontal Disease	118
Summary	118
References	119

Chapter 6

ENVIRONMENTALLY RELATED VARIATION

Climate	134
Heat	134

Heat Adaptation	134
Maladaptation to Heat Stress	135
Climatic Experience and Race	135
Growth and Development	136
Body Build and Physical Fitness	136
Age Differences	136
Sex Differences	137
Cold	137
Cold Adaptation	137
Maladaptation to Cold Stress	139
Climatic Experience and Race	140
Growth and Development	140
Body Build and Physical Fitness	141
Age Differences	141
Sex Differences	141
Altitude	142
Altitude Adaptation	142
Maladaptation to Altitude Stress	143
Altitude Experience and Race	144
Growth and Development	145
Body Build and Physical Fitness	145
Age Differences	145
Sex Differences	145
Diet	146
Dietary Adaptation	146
Maladaptation to Dietary Stress	147
Diet Experience	147
Growth and Development	150
Body Build and Physical Fitness	150
Race Differences	150
Age Differences	150
Sex Differences	151
Summary	151
References	151

Chapter 7

SEXUAL VARIATION	165
Reactions to Stressors	165
Stress during Growth and Development	165
Sex Ratio	165
Disease and Environmental Stress during Childhood	166
Disease and Injury Responses	166
Disease Responses	166
Injury Responses	169

Psychological and Physiological Stress	170
Environmental Stress	170
Brain Differences	171
Physical Performance and Strength	173
Muscles	174
Structural Differences	175
Oxygen Transport	175
Cardiovascular System	176
Metabolism	176
Significance	176
Life Expectancy and Maintenance of Health	177
Life Expectancy	177
Maintenance of Health	178
Sex Differences — An Explanation	178
Summary	181
References	182
 AFTERWORD	 195
 INDEX	 197
