Foreword I.....	xv
Foreword II.....	xvii
Foreword III.....	xix
Preface.....	xxi
Acknowledgments.....	xxiii
Authors.....	xxv
1. Introduction to Optimization Problems.....	1
1.1 Introduction.....	1
1.1.1 Artificial Intelligence.....	2
1.1.2 Soft Computing.....	3
1.1.3 Intelligent Systems.....	3
1.1.4 Expert Systems.....	4
1.1.5 Inference Systems.....	4
1.1.6 Machine Learning.....	5
1.1.7 Adaptive Learning.....	5
1.1.8 Related Work Done.....	6
1.1.8.1 Heuristics.....	6
1.1.8.2 Meta-Heuristics.....	6
1.1.8.3 Hyper-Heuristics.....	7
1.1.8.4 Nature-Inspired Computation.....	7
1.1.8.5 Multiagent System.....	9
1.1.8.6 Multiagent Coordination.....	9
1.1.8.7 Multiagent Learning.....	10
1.1.8.8 Learning in Uncertainty.....	10
1.1.8.9 Knowledge Acquisition in Graph-Based Problems Knowledge.....	10 10
1.2 Combinatorial Optimization Problems.....	11
1.2.1 Traveling Salesman Problem.....	12
1.2.2 Assignment Problem.....	12
1.2.3 Quadratic Assignment Problem.....	13
1.2.4 Quadratic Bottleneck Assignment Problem.....	14
1.2.5 0/1 Knapsack Problem.....	14
1.2.6 Bounded Knapsack Problem.....	15
1.2.7 Unbounded Knapsack Problem.....	15
1.2.8 Multichoice Multidimensional Knapsack Problem.....	16
1.2.9 Multidemand Multidimensional Knapsack Problem.....	16
1.2.10 Quadratic Knapsack Problem.....	16
1.2.11 Sharing Knapsack Problem.....	17
1.2.12 Corporate Structuring.....	17
1.2.13 Sequential Ordering Problem.....	18
1.2.14 Vehicle Routing Problem.....	18
1.2.15 Constrained Vehicle Routing Problem.....	18
1.2.16 Fixed Charge Transportation Problem.....	19

1.2.17	Job Scheduling	19
1.2.18	One-Dimensional Bin Packing Problem	20
1.2.19	Two-Dimensional Bin Packing Problem	20
1.3	Graph-Based Problems	21
1.3.1	Graph Coloring Problem	21
1.3.2	Path Planning Problem	21
1.3.3	Resource Constraint Shortest Path Problem	22
1.4	Aim of This Book	22
1.5	Summary	22
	Solved Examples	23
	Exercises	25
	References	26
2.	Particle Swarm Optimization	29
2.1	Introduction	29
2.2	Traditional Particle Swarm Optimization Algorithm	30
2.3	Variants of Particle Swarm Optimization Algorithm	31
2.3.1	Sequential Particle Swarm Optimization Algorithm	32
2.3.1.1	Random Propagation	32
2.3.1.2	Adaptive Schema for Sequential Particle Swarm Optimization Algorithm	33
2.3.1.3	Convergence Criterion	33
2.3.2	Inertia Weight Strategies in Particle Swarm Optimization Algorithm	34
2.3.2.1	Constant Inertia Weight	34
2.3.2.2	Random Inertia Weight	34
2.3.2.3	Adaptive Inertia Weight	34
2.3.2.4	Sigmoid Increasing Inertia Weight	35
2.3.2.5	Sigmoid Decreasing Inertia Weight	35
2.3.2.6	Linear Decreasing Inertia Weight	35
2.3.2.7	The Chaotic Inertia Weight	35
2.3.2.8	Chaotic Random Inertia Weight	36
2.3.2.9	Oscillating Inertia Weight	36
2.3.2.10	Global-Local Best Inertia Weight	36
2.3.2.11	Simulated Annealing Inertia Weight	36
2.3.2.12	Logarithm Decreasing Inertia Weight	37
2.3.2.13	Exponent Decreasing Inertia Weight	37
2.3.3	Fine Grained Inertia Weight Particle Swarm Optimization Algorithm	37
2.3.4	Double Exponential Self-Adaptive Inertia Weight Particle Swarm Optimization Algorithm	38
2.3.5	Double Exponential Dynamic Inertia Weight Particle Swarm Optimization Algorithm	39
2.3.6	Adaptive Inertia Weight Particle Swarm Optimization Algorithm	40
2.3.7	Chaotic Inertia Weight Approach in Particle Swarm Optimization Algorithm	41
2.3.7.1	Application of Chaotic Sequences in Particle Swarm Optimization Algorithm	41
2.3.7.2	Crossover Operation	42

2.3.8	Distance-Based Locally Informed Particle Swarm Optimization Algorithm	42
2.3.8.1	Fitness Euclidean-Distance Ratio Particle Swarm Optimization	42
2.3.9	Speciation-Based Particle Swarm Optimization	43
2.3.10	Ring Topology Particle Swarm Optimization	43
2.3.11	Distance-Based Locally Informed Particle Swarm	43
2.3.12	Inertia-Adaptive Particle Swarm Optimization Algorithm with Particle Mobility Factor	45
2.3.13	Discrete Particle Swarm Optimization Algorithm	46
2.3.14	Particle Swarm Optimization Algorithm for Continuous Applications	47
2.4	Convergence Analysis of Particle Swarm Optimization Algorithm	48
2.5	Search Capability of Particle Swarm Optimization Algorithm	49
2.6	Summary	49
	Solved Examples	50
	Exercises	55
	References	56
3.	Genetic Algorithms	57
3.1	Introduction	57
3.2	Encoding Schemes	59
3.2.1	Continuous Value Encoding	59
3.2.2	Binary Encoding	60
3.2.3	Integer Encoding	60
3.2.4	Value Encoding or Real Encoding	61
3.2.5	Tree Encoding	61
3.2.6	Permutation Encoding	61
3.3	Selection	62
3.3.1	Roulette Wheel Selection	63
3.3.2	Rank Selection	63
3.3.3	Tournament Selection	64
3.3.4	Steady-State Selection	64
3.3.5	Random Selection	64
3.4	Crossover	64
3.4.1	Single Point Crossover	64
3.4.2	N Point Crossover	65
3.4.3	Uniform Crossover	65
3.4.4	Arithmetic Crossover	65
3.4.5	Tree Crossover	66
3.4.6	Order Changing Crossover	66
3.4.7	Shuffle Crossover	66
3.5	Mutation	66
3.5.1	Inversion Mutation	67
3.5.2	Insertion Mutation	67
3.5.3	Displacement Mutation	67

3.5.4	Reciprocal Exchange Mutation (Swap Mutation).....	68
3.5.5	Shift Mutation	68
3.6	Similarity Template.....	68
3.7	Building Blocks	69
3.8	Control Parameters	70
3.9	Nontraditional Techniques in GAs.....	70
3.9.1	Genetic Programming.....	71
3.9.2	Discrete Genetic Algorithms.....	71
3.9.3	Genetic Algorithms for Continuous Applications.....	72
3.10	Convergence Analysis of Genetic Algorithms.....	72
3.11	Limitations and Drawbacks of Genetic Algorithms	72
3.12	Summary	73
	Solved Examples	73
	Exercises	78
	References	78
4.	Ant Colony Optimization	81
4.1	Introduction.....	81
4.2	Biological Inspiration	81
4.2.1	Competition.....	82
4.2.2	High Availability	82
4.2.3	Brownian Motion.....	82
4.2.4	Pheromones and Foraging	83
4.3	Basic Process and Flowchart	84
4.4	Variants of Ant Colony Optimization	85
4.4.1	Ant System	85
4.4.2	Ant Colony Optimization.....	85
4.4.3	Best-Worst Ant System.....	86
4.4.4	MAX-MIN Ant System	87
4.4.5	Rank-Based Ant System	87
4.4.6	Ant-Q.....	87
4.4.7	Hyper Cube Ant System.....	88
4.4.8	Mean-Minded Ant Colony Optimization Algorithm.....	88
4.4.8.1	Mathematical Formulations for Mean-Minded Ant Colony Optimization Algorithm.....	89
4.5	Applications.....	90
4.6	Summary	91
	Solved Examples	91
	Exercises	93
	References	93
5.	Bat Algorithm	95
5.1	Biological Inspiration	95
5.2	Algorithm.....	95
5.3	Related Work	96
	Solved Examples	105
	Exercises	106
	References	107

6. Cuckoo Search Algorithm	109
6.1 Introduction	109
6.2 Traditional Cuckoo Search Optimization Algorithm	110
6.3 Variants of Cuckoo Search Algorithm	112
6.3.1 Modified Cuckoo Search	113
6.3.2 Improved Cuckoo Search Algorithm with Adaptive Method	113
6.3.3 Multiobjective Cuckoo Search Algorithm for Design Optimization	115
6.3.3.1 Pareto Front	116
6.3.4 Gradient-Based Cuckoo Search for Global Optimization	117
6.4 Applications	118
6.4.1 Recognition of Parkinson Disease	118
6.4.2 Practical Design of Steel Structures	118
6.4.3 Manufacturing Optimization Problems	119
6.4.4 Business Optimization	119
6.4.5 Optimized Design for Reliable Embedded System	119
6.4.6 Face Recognition	120
6.5 Summary and Concluding Remarks	121
Solved Examples	122
Exercises	123
References	124
7. Artificial Bee Colony	127
7.1 Introduction	127
7.2 Biological Inspiration	127
7.3 Swarm Behavior	128
7.3.1 ABC Algorithm	130
7.4 Various Stages of Artificial Bee Colony Algorithm	131
7.5 Related Work	132
Solved Examples	141
Exercises	142
References	143
8. Shuffled Frog Leap Algorithm	145
8.1 Introduction	145
8.2 Related Work Done	146
8.2.1 Discrete Shuffled Frog Leaping Algorithm	150
8.2.2 Quantum Shuffled Frog Leaping Algorithm	151
Solved Questions	157
Unsolved Questions	158
References	159
9. Brain Storm Swarm Optimization Algorithm	161
9.1 Introduction	161
9.2 Brain Storm Optimization	161
9.2.1 Brain Storm Optimization Algorithm	162
9.3 Related Work in Brain Storm Optimization and Other Contemporary Algorithms	164

9.4	Hybridization of Brain Storm Optimization with Probabilistic Roadmap Method Algorithm.....	166
9.5	Conclusion.....	174
9.6	Future Scope.....	174
	Solved Examples.....	174
	Exercises.....	175
	References.....	175
10.	Intelligent Water Drop Algorithm.....	179
10.1	Intelligent Water Drop Algorithm.....	179
10.1.1	Inspiration and Traditional Intelligent Water Drop Algorithm.....	179
10.2	Intelligent Water Drop Algorithm for Discrete Applications.....	181
10.2.1	Intelligent Water Drop Algorithm for an Optimized Route Search.....	182
10.2.2	Intelligent Water Drop Algorithm Convergence and Exploration.....	185
10.3	Variants of Intelligent Water Drop Algorithm.....	186
10.3.1	Adaptive Intelligent Water Drop Algorithm.....	186
10.3.2	Same Sand for Both Parameters (SC1).....	187
10.3.3	Different Sand for Parameters Same Intelligent Water Drop Can Carry Both (SC2).....	188
10.3.4	Different Sand for Parameters Same Intelligent Water Drop Cannot Carry Both (SC3).....	189
10.4	Scope of Intelligent Water Drop Algorithm for Numerical Analysis.....	190
10.5	Intelligent Water Drop Algorithm Exploration and Deterministic Randomness.....	190
10.6	Related Applications.....	190
10.7	Summary.....	193
	Solved Question.....	194
	Unsolved Questions.....	194
	References.....	195
11.	Egyptian Vulture Algorithm.....	197
11.1	Introduction.....	197
11.2	Motivation.....	197
11.3	History and Life Style of Egyptian Vulture.....	198
11.4	Egyptian Vulture Optimization Algorithm.....	199
11.4.1	Pebble Tossing.....	200
11.4.2	Rolling with Twigs.....	202
11.4.3	Change of Angle.....	203
11.4.4	Brief Description of the Fitness Function.....	204
11.4.5	Adaptiveness of the Egyptian Vulture Optimization Algorithm.....	204
11.5	Applications of the Egyptian Vulture Optimization Algorithm.....	204
11.5.1	Results of Simulation of Egyptian Vulture Optimization Algorithm over Speech and Gait Set.....	204
	Exercises.....	207
	Solved Questions.....	207
	References.....	211

12. Biogeography-Based Optimization	213
12.1 Introduction.....	213
12.2 Biogeography.....	214
12.3 Biogeography Based Optimization.....	216
12.3.1 Migration.....	216
12.3.2 Mutation.....	217
12.4 Biogeography-Based Optimization Algorithm.....	218
12.5 Differences between Biogeography-Based Optimization and Other Population-Based Optimization Algorithm.....	219
12.6 Pseudocode of the Biogeography-Based Optimization Algorithm.....	221
12.6.1 Some Modified Biogeography-Based Optimization Approaches.....	221
12.6.1.1 Blended Biogeography-Based Optimization.....	221
12.6.1.2 Biogeography-Based Optimization with Techniques Borrowed from Evolutionary Strategies.....	222
12.6.1.3 Biogeography-Based Optimization with Immigration Refusal.....	222
12.6.1.4 Differential Evolution Combined with Biogeography-Based Optimization.....	222
12.7 Applications of Biogeography-Based Optimization.....	223
12.7.1 Biogeography-Based Optimization for the Traveling Salesman Problem.....	223
12.7.2 Biogeography-Based Optimization for the Flexible Job Scheduling Problem.....	224
12.7.3 Biogeography-Based Optimization of Neuro-Fuzzy System; Parameters for the Diagnosis of Cardiac Disease.....	224
12.7.4 Biogeography-Based Optimization Technique for Block-Based Motion Estimation in Video Coding.....	225
12.7.5 A Simplified Biogeography-Based Optimization Using a Ring Topology.....	225
12.7.6 Satellite Image Classification.....	225
12.7.7 Feature Selection.....	225
12.8 Convergence of Biogeography-Based Optimization for Binary Problems.....	226
Solved Questions.....	226
Unsolved Questions.....	228
References.....	229
13. Invasive Weed Optimization	231
13.1 Invasive Weed Optimization.....	231
13.1.1 Invasive Weed Optimization Algorithm in General.....	232
13.1.2 Modified Invasive Weed Optimization Algorithm.....	233
13.2 Variants of Invasive Weed Optimization.....	233
13.2.1 Modified Invasive Weed Optimization Algorithm with Normal Distribution for Spatial Dispersion.....	234
13.2.2 Discrete Invasive Weed Optimization in General.....	237

13.3	Invasive Weed Optimization Algorithm for Continuous Application	237
13.3.1	Invasive Weed Optimization for Mathematical Equations	237
13.3.2	Discrete Invasive Weed Optimization Algorithm for Discrete Applications.....	238
13.3.2.1	Invasive Weed Optimization Algorithm Dynamics and Search	238
13.3.2.2	Hybrid of IWO and Particle Swarm Optimization for Mathematical Equations.....	238
13.4	Related Work	239
13.5	Summary	242
	Solved Questions	243
	Unsolved Questions	243
	References	244
14.	Glowworm Swarm Optimization	245
14.1	Introduction.....	245
14.1.1	The Algorithm Description.....	246
14.2	Variants of Glowworm Swarm Optimization Algorithm	249
14.2.1	Hybrid Coevolutionary Glowworm Swarm Optimization (HCGSO).....	249
14.2.1.1	Transformation of the Problem	250
14.2.1.2	The Process of HCGSO.....	250
14.2.2	Glowworm Swarm Optimization with Random Disturbance Factor	251
14.2.3	Glowworm Swarm Optimization Algorithm Based on Hierarchical Multisubgroup	251
14.2.3.1	Improved Logistic Map	252
14.2.3.2	Adaptive Step Size	252
14.2.3.3	Selection and Crossover	252
14.2.3.4	Hybrid Artificial Glowworm Swarm Optimization Algorithm	253
14.2.4	Particle Glowworm Swarm Optimization.....	253
14.2.4.1	Parallel Hybrid Mutation.....	254
14.2.4.2	Local Searching Strategy	254
14.2.4.3	Particle Glowworm Swarm Optimization Algorithm	255
14.2.5	Glowworm Swarm Optimization Algorithm-Based Tribes	256
14.2.5.1	Tribal Structure	256
14.2.5.2	The Glowworm Swarm Optimization Algorithm-Based Tribes.....	256
14.2.6	Adaptive Neighborhood Search's Discrete Glowworm Swarm Optimization Algorithm.....	258
14.2.6.1	Adaptive Neighborhood Search's Discrete Glowworm Swarm Optimization Algorithm and Its Application to Travelling Salesman Problem	258
14.2.6.2	Some Other Features of the Algorithm	260
14.2.6.3	Adaptive Neighborhood Search's Discrete Glowworm Swarm Optimization Algorithm Steps	260

14.3	Convergence Analysis of Glowworm Swarm Optimization Algorithm	261
14.4	Applications of Glowworm Swarm Optimization Algorithms	261
14.4.1	Hybrid Artificial Glowworm Swarm Optimization for Solving Multidimensional 0/1 Knapsack Problem.....	262
14.4.2	Glowworm Swarm Optimization Algorithm for K-Means Clustering	262
14.4.3	Discrete Glowworm Swarm Optimization Algorithm for Finding Shortest Paths Using Dijkstra Algorithm and Genetic Operators	263
14.4.3.1	Labeling Method	263
14.4.3.2	Roulette Selection Strategy	263
14.4.3.3	Single-Point Crossover Strategy.....	264
14.4.3.4	Mutation Strategy.....	264
14.4.3.5	Procedure of Glowworm Swarm Optimization Algorithm for Finding Shortest Paths	264
14.5	Search Capability of Glowworm Swarm Optimization Algorithm	265
14.6	Summary	265
	Solved Examples	266
	Exercises	268
	References	269
15.	Bacteria Foraging Optimization Algorithm.....	271
15.1	Introduction.....	271
15.2	Biological Inspiration	271
15.3	Bacterial Foraging Optimization Algorithm.....	272
15.3.1	Chemotaxis.....	274
15.3.2	Swarming	274
15.3.3	Reproduction	275
15.3.4	Elimination and Dispersal	275
15.4	Variants of Bacterial Foraging Optimization Algorithm with Applications.....	276
	Solved Questions	279
	Unsolved Questions	281
	References	281
16.	Flower Pollination Algorithm	283
16.1	Introduction.....	283
16.2	Flower Pollination	283
16.2.1	Pollination	283
16.2.2	Self-Pollination	284
16.2.3	Cross-Pollination	284
16.3	Characteristics of Flower Pollination.....	285
16.4	Flower Pollination Algorithm.....	285
16.5	Multiobjective Flower Pollination Algorithm	287

16.6	Variants of Flower Pollination Algorithm.....	288
16.6.1	Modified Flower Pollination Algorithm for Global Optimization.....	288
16.6.2	Elite Opposition-Based Flower Pollination Algorithm.....	292
16.6.2.1	Global Elite Opposition-Based Learning Strategy	292
16.6.2.2	Local Self-Adaptive Greedy Strategy	292
16.6.2.3	Dynamic Switching Probability Strategy.....	292
16.7	Application of Flower Pollination Algorithm	292
16.7.1	The Single-Objective Flower Pollination Algorithm.....	292
16.7.2	The Multiobjective Flower Pollination Algorithm	293
16.7.3	The Hybrid Flower Pollination Algorithm.....	293
16.8	Conclusion.....	294
	Solved Questions	294
	Unsolved Questions	295
	References	296
