
Contents

Preface.....	ix
Acknowledgments.....	xi
Introduction.....	xiii
Chapter 1 The J-Curve and the J Distribution	1
1.1 The Stochastic Species Hypothesis and the J Distribution	2
1.2 First Appearance of the J Distribution	4
1.3 The Community and the Sample	6
1.4 The Need for an Appropriate Theory.....	8
1.5 A Positive Test Using Multisample Data.....	12
1.6 Fluctuating Populations.....	14
1.6.1 The Racetrack Analogy.....	16
Chapter 2 The J Distribution and Its Variations	19
2.1 Properties of the Probability Density Function.....	19
2.1.1 The Capacity Constant	20
2.1.2 The Mean and Variance of the J Distribution	21
2.2 The J Distribution: Species and Individuals.....	22
2.2.1 The Discrete J Distribution	22
2.2.2 The Canonical Sequence	24
2.2.3 An Implicit Formula for Rank Abundance	26
2.2.4 Effect of a Log Transformation on the J Distribution ...	28
Chapter 3 Sampling in Practice and in Theory.....	31
3.1 Randomness and Random Numbers	31
3.1.1 Generating Random Numbers.....	32
3.2 Communities and Samples	34
3.3 The Sampling Process	34
3.3.1 The Variety of Sampling Activity	35
3.3.2 Estimating Sample Intensity	36
3.3.3 How Samples Have Been Used: Calculating Biodiversity	37
3.4 Computer Simulation of Sampling	40
3.4.1 A Sample Simulation Algorithm.....	41
3.5 The General Theory of Sampling.....	42

Chapter 4	Compiling and Analyzing Field Data	45
4.1	Histograms and Distributions.....	45
4.2	Other Representations: Rank Abundance	47
4.3	Other Representations: Logarithmic Abundance	48
4.4	Estimating Parameters of the J Distribution	49
4.4.1	The Chi-Square Test.....	49
4.4.2	The Kolmogorov-Smirnov Test.....	52
4.5	Application Example: Sample Overlap and Similarity	53
Chapter 5	Predictions from Data	57
5.1	Predicting Maximum Abundance	57
5.2	Predicting Species Richness.....	58
5.2.1	Counterexample 1.....	59
5.2.2	Inadequacies in Current Methods of Estimation	61
5.2.2.1	The Fisher-Corbet-Williams Method	61
5.2.2.2	The Goodman Statistic	63
5.2.2.3	The Jackknife Estimator.....	64
5.2.2.4	The Bootstrap Method.....	65
5.2.3	Counterexample 2.....	65
5.3	Parametric versus Nonparametric Approaches	66
5.4	Exact Estimation Methods	67
5.4.1	The Two-Step Method with an Example.....	69
5.5	Experimental Evaluation of Methods.....	71
5.5.1	The Two-Step Method.....	71
5.5.2	The One-Step Method.....	72
5.6	The Behavior of Error Terms	73
5.7	Analysis of the Two Sources of Variance.....	74
5.8	Assessing General Population Declines.....	75
Chapter 6	Extending the Sample.....	79
6.1	The Effect of Sampling on Parameters	79
6.2	Accumulation Curves	81
6.2.1	Accumulation with Replacement	82
6.2.2	Accumulation without Replacement	84
6.2.2.1	Hurlbert's Formula	84
6.2.2.2	The Hyperbolic Formula	85
6.3	The Species–Area Relationship.....	87
6.3.1	Other Species–Area Laws	89
Chapter 7	Stochastic Systems and the Stochastic Community.....	91
7.1	The Stochastic Community and Stochastic Systems.....	91
7.1.1	Probability and Time.....	92
7.1.2	Generalizations of the Multispecies Logistic System ...	93
7.1.3	Stochastic Abundances.....	95

7.2	Stochastic Communities in Nature	97
7.2.1	Stochastic Species Hypotheses for Communities	97
7.2.2	Detecting the J Distribution in Natural Populations....	99
7.2.3	The Stochastic Orbit and Its Variations	102
7.2.4	Long Runs in Stochastic Behavior	104
7.2.5	Cyclic Changes in Abundance	106
Chapter 8	The Meta-Study: A Review	109
8.1	Background: The Chi-Square Theorem and Test.....	109
8.1.1	An Illustration of the Central Methodology.....	111
8.2	Applying Chi-Square Theory to Multiple-Source Histograms	113
8.2.1	The Score Conversion Process.....	114
8.3	The Meta-Study	116
8.3.1	The Data Collection Procedure.....	116
8.3.2	Testing the Data against Two Distributions	117
8.3.3	Converting and Compiling the Scores	117
8.4	Experimental Results of the Meta-Study	118
Chapter 9	Fossil J-Curves	121
9.1	Background of the Problem.....	121
9.2	Presence of the J Distribution in Taxonomic Data.....	123
9.2.1	The Test Method.....	125
9.2.2	Results of the Study.....	126
9.3	Evolutionary Origin of the J Distribution.....	128
9.3.1	Stochastic Genera	129
9.3.2	Episodic Speciation	130
9.4	Extinction and Speciation in Natural and Artificial Communities	132
9.4.1	Extinction Rates in the MSL System	133
9.4.2	Speciation in Stochastic Communities.....	134
Chapter 10	Summary of Theory and Open Problems	137
10.1	Summary of Research	138
10.1.1	Examples and Counterexamples	140
10.2	A Guide to Field Methods and Theory Development	140
10.3	Open Problems and Prospects	141
10.4	Stochastic Systems as Research Tools.....	143
10.4.1	The Stochastic System.....	143
10.4.2	The Weakly Stochastic System	143
10.4.3	The Seasonal Stochastic System	144
10.4.4	The Compartmentalized Trophic System	144
10.5	Concluding Remarks	144

Appendix A: Mathematical Notes and Computer Tools	145
Appendix B: Results of the Meta-Study for the J Distribution	165
Appendix C: Results of the Test for the J Distribution in Taxonomic Data... 	171
Bibliography	175
Endpaper: Global Map of Biosurvey Sites Used in the Meta-Study	189
Index.....	191
