Introduction.....	xvii
Acknowledgments.....	xix

SECTION I *Beginnings*

Chapter 1 Hugo de Vries (1848–1935).....	5
Introduction.....	5
Early Research.....	5
The Mutation Theory.....	6
Theory of Pangenesis.....	7
Evolutionary Theory in the Late Nineteenth Century.....	8
Toward the Rediscovery.....	9
Birth of Genetics.....	11
Reception of the Mutation Theory.....	12
De Vries vs. Darwin.....	14
Rediscovery of Mendel's Work.....	15
De Vries's Position in the Genetics Community.....	16
References.....	17
Chapter 2 Eugenics and Francis Galton (1822–1911).....	19
Early Life.....	19
Fingerprints.....	20
Anthropometrics.....	21
Empirical Test of Pangenesis and Lamarckism.....	22
Hereditary Genius.....	22
Eugenics.....	22
Actuaries.....	24
Noteworthy Families.....	24
Heredity.....	25
Race Improvement or Eugenics.....	25
Galton: A Summary.....	27
Endnote.....	27
References.....	27
Chapter 3 William Bateson (1861–1926).....	29
Early Work.....	29
Balanoglossus.....	30
Discontinuous Variation.....	31

Materials for the Study of Variation (1894).....	31
Symmetry and Meristic Repetition	32
Least Size of Particular Teeth	33
Problem of Intercrossing	33
Linkage.....	35
Meristic Variation.....	35
Research on Indian Species.....	36
Subodh Kumar Roy	36
Founding the Discipline of Genetics.....	37
Human Genetics	38
Bateson's Interests and Character	39
Endnote.....	40
References	40
Chapter 4 Thomas Hunt Morgan (1866–1945)	43
E.B. Wilson	45
Fly Room.....	46
J.B.S. Haldane	48
Bateson's Visit	48
Training Ground.....	49
1925–1945 Period.....	50
Morgan's Methods.....	51
Nobel Prize.....	53
Nobel Lecture.....	53
The California Institute of Technology	53
References	54

SECTION II Population Genetics

Chapter 5 J.B.S. Haldane (1892–1964)	59
John Scott Haldane.....	59
Father–Son Collaboration	60
Haldane's Rule.....	61
Origins of Life.....	62
Physiology	62
Population Genetics.....	63
Natural Selection.....	64
Demographic Structures.....	66
Roles of Selection and Mutation in Evolution.....	66
Gene Fixation.....	67
Metastable Populations.....	67
Types of Selection	68
Measurement of Natural Selection in Man	69
Strange Case of Peppared Moth: Industrial Melanism	69
Haldane on Industrial Melanism.....	70

Beanbag Genetics.....	71
Human Genetics.....	72
Genetic Loads and the Impact of Mutation.....	73
Disease and Selection.....	73
Eugenics.....	74
Sterilization.....	75
Address to the XI International Congress of Human Genetics, 1963....	75
Prospects for Eugenics.....	76
Eugenic Views of Haldane and Muller.....	77
Science and Ethics.....	79
Scientific Predictions in 1964.....	80
Biological Possibilities for the Next Ten Thousand Years.....	81
One Thousand Years.....	82
Cloning.....	82
Division of Human Species.....	83
Haldane's "Firsts".....	84
Biochemistry.....	84
Animal Behavior.....	85
Popularization of Science.....	86
India.....	87
Personal Aspects.....	88
Endnote.....	88
References.....	88
Chapter 6 Ronald Aylmer Fisher (1890–1962).....	91
Education.....	92
First Genetical Paper.....	92
University College London.....	93
Cambridge University.....	94
Personal Aspects.....	95
Negative Qualities.....	96
Smoking and Lung Cancer Controversy.....	96
Fisher's Arguments Concerning Lung Cancer.....	96
Genetics.....	97
First Genetical Paper.....	97
Neo-Darwinism.....	99
Genetical Theory of Natural Selection.....	99
Gene Fixation.....	100
Galton Chair.....	100
Blood Groups.....	101
Eugenics.....	102
Selected Publications by R.A. Fisher.....	102
Books.....	102
Other Publications.....	103
Publications by Others.....	106

Chapter 7	Sewall Wright (1889–1988)	107
	Childhood and Education	107
	Genetics	108
	U.S. Department of Agriculture	108
	University of Chicago	109
	Wright's Scientific Work	109
	Wright's Contributions to Genetics	109
	Haldane and Wright's Third Phase	110
	Wright's Last Paper	111
	Mammalian Genetics	112
	Statistics	112
	Wright's Influence	113
	Animal Breeding	114
	Wright and Haldane	115
	Wright and Fisher	115
	Conflict between Wright and Fisher	115
	Random Genetic Drift and Inbreeding	116
	Effective Population Number	117
	Who Was Right?	117
	Wright's Impact	117
	Personal Aspects	117
	Acknowledgment	118
	References	118
	Wright's Publications	118
Chapter 8	Motoo Kimura (1924–1994)	125
	Early Career	127
	National Institute of Genetics	127
	Cold Spring Harbor Symposium	127
	Population Genetics	128
	Neutral Theory	129
	“Neutral” versus “Nonneutral”	130
	Last Years	131
	Conclusion	132
	References	132

SECTION III *Biochemical Genetics*

Chapter 9	Archibald E. Garrod (1857–1936)	137
	Intellectual Background	137
	Biochemistry of Diseases	138
	Role of Consanguinity	139

Inborn Errors of Metabolism	140
Garrod's Influence	141
Weatherall's Evaluation	142
References	143
Chapter 10 George Wells Beadle (1903–1981)	145
Childhood and Education	145
Research at Cornell	146
Research at Caltech	148
Beadle's Controversy with Darlington	148
Collaboration with Boris Ephrussi	148
Collaboration with Tatum	149
Research during Wartime	150
Life in Oxford	151
Nobel Prize and Controversy	152
President of the University of Chicago	153
One Last Controversy: The Corn Wars	154
Death	155
References	155
Chapter 11 Joshua Lederberg (1925–2008)	157
Columbia University	158
Discovery of Genetic Exchange in Bacteria	159
Yale University	160
University of Wisconsin	160
Young Professor	161
Zinder and Transduction	161
India and Australia	162
Medical Genetics	164
Stanford University	164
Other Activities	164
Exobiology	165
New York Again	167
Retirement	167
Public Policy	169
Death	171
Brief Chronology	171
References	173
Other Publications	174

SECTION IV *Molecular Biology*

Chapter 12	Oswald Theodore Avery (1877–1955)	179
	Early Life	180
	Hoagland Laboratory	180
	The Rockefeller Institute	181
	Genetics	181
	Avery, MacLeod, and McCarty	183
	Avery's Personality and Research Methods	184
	Private Thoughts of Avery	184
	Other Developments in Genetics	185
	Reaction to the Discovery	185
	Recollections of Avery	187
	Scientific Philosophy	188
	References	189
Chapter 13	Erwin Schrödinger (1887–1961)	191
	Introduction	191
	Early Life and Education	192
	<i>What Is Life?</i> The Physical Aspect of the Living Cell	195
	Reviews of <i>What Is Life?</i>	197
	The Place of <i>What Is Life?</i> in Biology	197
	Negative Entropy	197
	Code and Entropy	198
	Schrödinger and Indian Philosophy	201
	Schrödinger on Ethical Lacunae of Science	202
	Schrödinger's Holistic Style in Theoretical Physics	202
	My View of the World	202
	Endnote	204
	References	204
Chapter 14	Max Delbruck (1906–1981)	207
	Family Background and Early life	207
	Childhood	208
	Early Career in Physics	208
	Copenhagen	208
	Biology	210
	Berlin Years (1932–1937)	210
	Early Days at Caltech	211
	Vanderbilt University	211
	Phage Group	212
	Phage Treaty	212
	Cold Spring Harbor	212

Phage Courses	212
Phage Meetings	213
Caltech Again	213
What Is Life?	213
DNA as Genetic Material	214
Oswald Avery and DNA	215
Failure to Appreciate the Importance of Avery's Experiment	215
Phycomyces Period (1953–1981)	216
Cologne (1961–1963)	216
Personality	216
Gandhi of Biology	217
Correspondence with J.B.S. Haldane	217
Nobel Prize	218
Evolutionary Epistemology	218
Last Days	219
Further Reading	219
Selected Publications of Max Delbruck	220
Chapter 15 Francis Crick (1916–2008) and James Watson (1928–)	223
Crick–Watson Collaboration	223
Francis Crick	223
Genetics	224
Meeting Max Perutz	225
Early Steps	226
1951–1953: DNA Structure	226
First Meeting with Watson	227
Conflict between Francis Crick and Lawrence Bragg	228
Jim Watson	228
Watson's First Visit to Cold Spring Harbor Laboratory:	
The Phage Group	229
Cambridge University	230
1951–1953: Watson–Crick Collaboration	230
X-Ray Diffraction Study	232
Watson–Crick Paper of 1953	232
Central Dogma	233
Watson's List of Lessons Drawn from DNA Work	233
Harvard University	235
The Double Helix	236
Crick's Reaction	236
Cold Spring Harbor Again	238
Human Genome Project	238
Sociopolitical Activities	239
Further Reading	239
References	240

SECTION V *Radiation Genetics*

Chapter 16 Hermann J. Muller (1890–1967)	243
Radiation Research	245
Personal Difficulties	246
Political Activities	246
Edinburgh Period	247
Muller's Career after Returning to the United States	247
Muller's Post-Nobel Years	248
Russell–Einstein Manifesto	248
Muller and Julian Huxley	249
Germinal Choice and Eugenics	249
Early Interest	249
Who Will Choose the Values?	250
Endnotes	250
References	250

SECTION VI *Transposons*

Chapter 17 Barbara McClintock (1902–1992)	255
Cornell University	255
Early Work	255
Cytogenetics of Maize	256
Mutations	256
Jumping Genes	257
Cold Spring Harbor	258
Discovery of Controlling Elements	258
McClintock's Visits to Madison	258
1956 Cold Spring Harbor Symposium	260
Evolutionary Origins of Maize	260
Further Reading	261
Archives and Research Collections	261

SECTION VII *Applications of Genetics*

Chapter 18 Norman Ernest Borlaug (1914–2009), M.S. Swaminathan (1925–), and Green Revolution	265
Population Monster	265
Early Life and Education	266
Research Career	267

CIMMYT	267
Wheat Research.....	268
Two Seasons	268
Multiline Varieties.....	269
Backcrossing.....	269
Dwarfing.....	269
Green Revolution in India	270
M.S. Swaminathan	270
Early Life and Education.....	270
Early Career.....	271
Professional Achievements	271
Books by M.S. Swaminathan	273
Recommended for Further Reading	273
Norman Borlaug International Symposium	273
Green Revolution in India	273
Wheat Yields in India since 1961	274
World Food Prize	274
Nobel Peace Prize	275
Borlaug Hypothesis	275
Criticisms	275
Later Years	276
Africa.....	276
Global Food Situation.....	277
Death	277
Further Reading	278
 Chapter 19 Victor McKusick (1921–2008)—Father of Medical Genetics.....	 279
Early Life and Education.....	279
Johns Hopkins University	280
Division of Medical Genetics.....	281
Pleiotropism.....	282
Marfan's Syndrome	282
Amish Populations	283
Inbreeding in the Amish.....	283
Bar Harbor Course	284
Nova Scotia House	285
McKusick's Publications	285
Misconceptions in Human Genetics	286
Genetic Nosology: On Lumpers and Splitters.....	288
Gene Mapping	288
Genomics.....	289
Founder President of HUGO.....	289
Celera Advisory Board.....	290

MIM and OMIM.....	290
Human Genome Project.....	291
Brief Chronology.....	292
References	293

Index.....	295
