Series Preface (Evolutionary Cell Biology)	vii
Preface	ix
Editor	xi
Contributors	xiii

SECTION I *The Diversity of Segmentation*

Chapter 1 Segmentation: A Zoological Concept of Seriality	3
<i>Gerhard Scholtz</i>	
Chapter 2 Diversity in Segmentation Mechanisms	27
<i>Ariel D. Chipman</i>	

SECTION II *Cellular Mechanisms of Segmentation*

Chapter 3 Cell Division, Movement, and Synchronization in Arthropod Segmentation	39
<i>Lisa M. Nagy and Terri A. Williams</i>	
Chapter 4 Cellular and Molecular Mechanisms of Segmentation in Annelida: An Open Question	71
<i>Eduardo E. Zattara and David A. Weisblat</i>	
Chapter 5 Progenitor Cells in Vertebrate Segmentation	99
<i>Benjamin Martin</i>	
Chapter 6 Teloblasts in Crustaceans	125
<i>Gerhard Scholtz</i>	
Chapter 7 Segmentation in Leeches	153
<i>David A. Weisblat and Christopher J. Winchell</i>	

Chapter 8	Segmentation in Motion	183
	<i>Andres F. Sarrazin</i>	

SECTION III *Beyond Segmentation*

Chapter 9	Segmental Traits in Non-Segmented Bilaterians	205
	<i>Bruno C. Vellutini</i>	

Chapter 10	Axial Regeneration in Segmented Animals: A Post-Embryonic Reboot of the Segmentation Process	255
	<i>Eduardo E. Zattara</i>	

Index	293
