Preface vii

Prologue: Reminiscences 1

Richard L. Solomon

1. SOP: A Model of Automatic Memory Processing in Animal Behavior 5

Allan R. Wagner

General Assumptions 9

The SOP Model 16

An Empirical Application 24

Other Applications 30

Concluding Comments 42

References 44

2. Differences in Adaptiveness Between Classically Conditioned Responses and Instrumentally Acquired Responses 49

Ralph R. Miller and Mary Ann Balaz

Some Possible Distinctions Between Classical Conditioning and Instrumental Learning 50

Considerations Concerning the Adaptiveness of Classical Conditioning 54

Preference for Signaled Shock 56

Conditioned Tail Flexion: CR-Contingent Modification of Tailshock Intensity 64

Changes in Affective Value of the US as a Function of Signaling 68

Discussion 75

Summary 76

References 77

3. Within-Event Learning in Pavlovian Conditioning 81

Robert A. Rescorla and Paula J. Durlach

Demonstrations of Within-Event Learning	82
Involvement in Pavlovian Paradigms	86
Rules Governing Within-Event Learning	95
Theoretical Interpretations	106
Conclusions	109
References	110

**4. Long-Delay Conditioning and Instrumental Learning:
Some New Findings 113**

M. R. D'Amato, William R. Safarjan, and David Salmon

One-Trial, Long-Delay Conditioned Attractions in Monkeys and Rats	114
Differential Effect of Reinforcement Delay on Affective and Instrumental Responses	123
Instrumental Learning with Long Delays	128
Interpretations and Conclusions	135
Summary	140
References	141

**5. Actions and Habits: Variations in Associative
Representations During Instrumental Learning 143**

Christopher Adams and Anthony Dickinson

Associative Representations	143
The Integration of Knowledge	144
Behavioral Autonomy—Failures of Integration	146
The Transition from Action to Habit	152
The Representational Basis of Action	157
Summary	163
References	164

6. Working Memory and the Temporal Map 167

Werner K. Honig

The Temporal Map	167
The Temporal Field	169
Analysis of Working Memory Processes	179
Trial Outcomes and Memory Processes	188
Concluding Remarks	193
Summary	194
References	195

7. Directed Forgetting in Animals 199*William S. Maki*

- Characteristics of Rehearsal 200
- Stimulus Control of Mnemonic Processes 202
- Studies of Directed Forgetting 207
- Future Directions of Directed Forgetting 221
- Summary and Conclusions 222
- References 223

8. Short-Term Memory in the Pigeon 227*Douglas S. Grant*

- The Trace Strength Conception 227
- Active Versus Passive Information Processing 229
- Nature of the Memorial Representation 236
- Theoretical Perspective 249
- Summary 253
- References 255

9. Studies of Long-Term Memory in the Pigeon 257*David R. Thomas*

- General Procedure 259
- Studies of Simple Forgetting 261
- Forgetting as a Consequence of Conflicting Memories 263
- Forgetting of "Attentional Sets" 267
- The Role of Contextual Retrieval Cues in Retention and Forgetting 271
- Memorial Effects in Successive Reversal Performance 283
- General Summary 288
- References 289

10. Postacquisition Modification of Memory 291*David C. Riccio and Debbie L. Ebner*

- Malleability of Old and New Memories 292
- Hormonal Redintegration of Memory 298
- Ovarian Hormones and Memory 302
- Contextual Cues, Stimulus Generalization, and the Retention Interval 307
- Summary and Conclusions 312
- References 313

11. Mechanisms of Cue-Induced Retention Enhancement 319

William C. Gordon

The Cuing Phenomenon 319

Cuing Hypotheses 320

Summary 337

References 337

12. Extending the Domain of Memory Retrieval 341

Norman E. Spear

The Relationship Between Memory Storage
and Memory Retrieval 344

Studying Memory Retrieval Through Manipulations
of Contemporary Context 350

Prior Cuing: Implications for the Relationship Between
Memory Storage and Memory Retrieval 356

Summary, Principles, Predictions and Tests 368

General Summary 373

References 374
