

Contents

<i>Dedication</i>	iii
<i>Preface</i>	iv
1. Early Microbial Evolution from a Physiological Perspective <i>William F. Martin</i>	1
2. Bioenergetic Function of Gram Negative Bacteria—From Anaerobes to Aerobes <i>Mauro Degli Esposti</i>	26
3. Gram Negative Bacteria Related to Proteobacteria <i>Mauro Degli Esposti</i>	51
4. Proteobacteria: From Anaerobic to Aerobic Organisms <i>Mauro Degli Esposti</i>	69
5. Gammaproteobacteria <i>Mauro Degli Esposti and Esperanza Martínez-Romero</i>	105
6. Betaproteobacteria <i>Mauro Degli Esposti, Paola Bonfante, Mónica Rosenbleuth and Esperanza Martínez-Romero</i>	135
7. From Alphaproteobacteria to Proto-Mitochondria <i>Mauro Degli Esposti, Julio Martínez and Esperanza Martínez-Romero</i>	166
8. From Proto-Mitochondria to the Mitochondrial Organelles of Our Cells <i>Mauro Degli Esposti</i>	204
