

Contents

Preface	iii
1. Transgressing the Norms	1
2. The Manifold of Prebiotic Evolution	7
Preconditions	7
Metabolism First	10
'Replicators'—Code First	19
3. Life from Nonlife: Establishing Rules and Codes	26
Proteins	27
'Universal Cell'	28
Life Is...	30
Pillars and Itinerary of the Biosphere	30
Biospheric Games	33
4. Towards a New Manifold: The Biosphere	48
Dating Life's Appearance	49
Origins: Biosphere LUCA	50
Reconstructing the Past, Making Sense of the Present	57
5. Concepts of Heredity and Theories of Evolution	61
Descent with Modification	61
J.B. Lamarck	64
After Lamarck: Organic Memory	65
Experimental Embryology	70
Units of Heredity	71
Modern Synthesis	73
The Age of DNA	76
Evolutionary Developmental Biology	79
The Rise of Epigenetics	83
Extended Evolutionary Synthesis	84
Philosophical Approaches	90
Philosophical Turnoff on Causality	92
Evolution as History	94

6. New Dimensions of Diversity	96
On Digital	96
Shaping DNA	98
Proteins	99
The Hairball	103
Targeted Epimutations	104
Combing the Shapes of Nucleic Acids	108
Protein Modularity	111
Unrooted in the Norm yet Faithful to It	114
7. Information Boom	117
Quorum Sensing	117
Signal Transduction	119
Chance, Necessity, and Gratitude	124
Processing and Responding	127
Simplexity	130
8. Morphogenesis	133
The Tradition of the New	133
Multicellularity	134
Phylotype Again	141
Transgenerational Epigenetic Inheritance	145
Biased Mutations	148
9. Evolution by Cooperation: Communication between Different Lineages of Life	149
On Lichens, Squids, and Coral Bleaching	153
Protists	153
Intracellular Symbiosis in Multicellular Organisms	155
Mycorrhiza	157
Bacterial Consortia	159
Mimetic Rings	161
10. I, Holobiont	164
Human Holobiont	165
Variation in Microbiome Within Individuals	167
Colonization Determinants	167
Functions of Microbiome	170
Fecal Transplants	174
Holobiont as a Unit of Selection	174
Criticism	177
