
TABLE OF CONTENTS

Introduction	1
I. THE STORAGE OF INFORMATION	
Chapter 1	
Reorganization of the Genome during Aging of Proliferative Cell	
Compartment	21
<i>Alvaro Macieira-Coelho</i>	
Chapter 2	
Genomic Instability during Aging of Postmitotic Mammalian Cells	71
<i>James W. Gaubatz</i>	
Chapter 3	
DNA Repair during Aging	137
<i>Hans Niedermüller</i>	
Chapter 4	
Changes in Gene Expression during Aging of Mammals	183
<i>M. S. Kanungo</i>	
Chapter 5	
Role of Mitochondria in Cell Aging	219
<i>Jaime Miquel</i>	
II. THE FLOW OF INFORMATION	
Chapter 6	
Modifications of the Cell Surface Leading to Cell Elimination	237
<i>Hans U. Lutz</i>	
Chapter 7	
Protein Kinase C Signal Transmission during Aging	269
<i>Fiorenzo Battaini, Stefano Govoni, and Marco Trabucchi</i>	
Chapter 8	
Changes in Transmembrane Signaling Mechanisms during Aging:	
Cellular and Molecular Aspects	293
<i>Atsushi Miyamoto and George S. Roth</i>	

Chapter 9	
Structural Changes Modifying the Intracellular Flow of Information	307
<i>Alvaro Macieiro-Coelho</i>	
Chapter 10	
The Aging of the Neuronal Cytoskeleton	327
<i>Paul J. M. Klosen and Philippe van den Bosch de Aguilar</i>	
Chapter 11	
Transport of mRNA into the Cytoplasm	353
<i>Werner E. G. Müller, Paul S. Agutter, and Heinz C. Schröder</i>	
Chapter 12	
Translational and Post-translational Modifications during Aging	389
<i>Suresh I. S. Rattan</i>	
Chapter 13	
Carbonyl Toxicity Hypothesis of Biological Aging	421
<i>Dazhong Yin and Ulf Brunk</i>	
Chapter 14	
Amyloidosis and Aging	437
<i>Per Westermark and Kenneth H. Johnson</i>	
Chapter 15	
Extracellular Matrix	459
<i>Ladislav Robert and J. Labat-Robert</i>	
Chapter 16	
Brain Metabolism during Aging	493
<i>Siegfried Hoyer</i>	
Chapter 17	
Central Neurotransmission in the Elderly	511
<i>Hervé Allain and Danièle Bentue-Ferrer</i>	
Chapter 18	
Age-Related Changes in Neuropeptidergic Neurons in the Human Hypothalamus	527
<i>J. N. Zhou and D. F. Swaab</i>	
Index	533
