

Contents

Preface.....	vii
Editors.....	ix
List of Contributors.....	xi
0. Introduction to Electromagnetic Fields.....	1
<i>Frank Barnes, Charles Polk, and Ben Greenebaum</i>	
1. Environmental and Occupational DC and Low Frequency Electromagnetic Fields.....	29
<i>Ben Greenebaum and Kjell Hansson Mild</i>	
2. Intermediate and Radiofrequency Sources and Exposures in Everyday Environments.....	55
<i>Javier Vila</i>	
3. Endogenous Bioelectric Phenomena and Interfaces for Exogenous Effects.....	73
<i>Richard H. W. Funk</i>	
4. Electric and Magnetic Properties of Biological Materials	101
<i>Camelia Gabriel and Azadeh Peyman</i>	
5. Interaction of Static and Extremely Low-Frequency Electric Fields, with Biological Materials and Systems.....	161
<i>Frank Barnes</i>	
6. Magnetic Field Interactions with Biological Materials	219
<i>Frank Barnes</i>	
7. Mechanisms of Action in Bioelectromagnetics.....	233
<i>Ben Greenebaum</i>	
8. Signals, Noise, and Thresholds	261
<i>Martin Bier and James C. Weaver</i>	
9. Computational Methods for Predicting Electromagnetic Fields and Temperature Increase in Biological Bodies.....	299
<i>James C. Lin</i>	
10. Experimental Dosimetry.....	399
<i>Rodolfo Bruzon and Hakki Gurhan</i>	

11. Overcoming the Irreproducibility Barrier: Considerations to Improve the Quality of Experimental Practice When Investigating the Effects of Low-Level Electric and Magnetic Fields on In Vitro Biological Systems	435
<i>Lucas Portelli</i>	
12. Radio Frequency Exposure Standards	463
<i>K. R. Foster, C.-K. Chou, and R. C. Petersen</i>	
Index	513
