1 Introduction: The Humpback Chub	1
1.1 Intrinsic Value	2
1.2 Are Species Real?	3
1.3 Moving from a Description of Species to the Preservation of Species	4
1.4 Species' Intrinsic Goods and the Need to Move beyond Instrumental Goods	6
1.5 The Contemporary Relevance of Species Preservation	10
1.6 Outline of Book	13
2 Species Concepts and Ontology	20
2.1 Faulty Species Concepts	22
2.2 Phylogenetic Systematics (Cladism) and the Objection to the BSC	27
2.3 Introducing the Hennigian Species Concept	28
2.4 The Two Primary Objections to the HSC	33
3 Rolston's Account: Objective Value	48
3.1 What Are Species, for Rolston?	48
3.2 The Move from Is to Value	51
3.3 The Move (or Lack Thereof) from Value to Ought	52
3.4 Additional Problems with the Ecological and Evolutionary Species Concepts	53
4 Johnson's Account: Well-Being Interests	60
4.1 Intrinsically Valuable Interests and the Intrinsic Value of Humans	60

4.2	The Well-Being Interests of Species	63
4.3	Johnson's Problematic Appeal to the Ecological Species Concept	65
4.4	Why Johnson's Account Is Unsubstantiated	67
5	Callicott's Account: Leopold's Story	69
5.1	How We Come to Intrinsically Value Nature	69
5.2	Why Should We Preserve Species' Intrinsic Value?	73
6	The Intrinsic Goods of Species	77
6.1	Flourishing and Species	81
6.2	The Human Species Being in Danger	83
6.3	A Summation of the Intrinsic Value Account for Sexual Species	86
6.4	Distinguishing Intrinsic Goods	88
6.5	Postscript	91
7	The Role of Humility	98
7.1	The Normative Conception of Humility	99
7.2	"De-Extinction" of Species?	102
8	Problems and Solutions	106
8.1	Regan's Objection	106
8.2	Sandler's Objection	108
8.3	What about the Flourishing of a Hurricane?	110
8.4	What about the Flourishing of a Tractor?	111
8.5	Invasive Species	112
8.6	Darwinian Extinction through Sex Selection	112
8.7	Narrow Focus	115
9	Competing Moral Considerations, Preservation Considerations	117
9.1	Flourishing for Humans	118
9.2	Letting These Mosquito Species Go	119
9.3	Competing Preservation Considerations: Species vs. Individuals of the Species	121
9.4	Competing Preservation Considerations: Limited Resources	123
9.5	A Much More Difficult Case: Nonhuman Organismic Flourishing?	125

10 Preservation of Higher-Order Taxa?	136
10.1 Linnaean Taxa Reality?	137
10.2 Phylogenetic Clades	140
Conclusion	148
