CHAPTER I

THE PROBLEMS AND METHODS OF EXPERIMENTAL EMBRYOLOGY

I. THE SUBJECT OF INVESTIGATION	19
1. CLASSIFICATION OF DEVELOPMENTAL PROCESSES	19
2. THE EXPERIMENTAL METHOD IN THE STUDY OF DEVELOPMENT	22
II. SPECIAL PROBLEMS	25
1. PRELIMINARY	25
2. THE MAJOR PROBLEMS OF ANALYTICAL EMBRYOLOGY	28
III. METHODS OF ANALYSIS	32
1. GENERAL OBSERVATIONS ON METHOD	32
2. THE PRINCIPLES OF CERTAIN SPECIFIC PROCEDURES	35
(a) Regeneration	35
(b) Transplantation, explantation, and interplantation	38

CHAPTER II

FERTILIZATION AND THE STIMULUS TO DEVELOPMENT

I. INSEMINATION	45
II. THE FACTORS WHICH EXCITE DEVELOPMENT	49
1. ARTIFICIAL PARTHENOGENESIS	49
2. ANALYSIS OF THE PROCESS OF CLEAVAGE	53
III. THE RELATIONS BETWEEN THE TWO GAMETES AND THE NATURE OF FERTILIZATION	58

CHAPTER III

PRESUMPTIVE ORGAN-REGIONS AND THE KINEMATICS OF EARLY DEVELOPMENT

I. FORMATIVE MOVEMENTS AS A FUNCTION OF THE WHOLE GERM	63
--	----

12 EXPERIMENTAL ANALYSIS OF DEVELOPMENT

	PAGE
II. PRESUMPTIVE ORGAN-REGIONS	67
1. GENERAL CHARACTERS OF A PRESUMPTIVE ORGAN-REGION	67
2. PRESUMPTIVE ORGAN-REGIONS IN MOSAIC EGGS	69
3. PRESUMPTIVE ORGAN-REGIONS IN REGULATIVE EGGS	75
III. EGG AXIS AND CLEAVAGE PLANE IN RELATION TO THE DEVELOPED ORGANISM	79

CHAPTER IV

THE POTENCY PROBLEM

I. THE POTENCY OF THE PARTS OF THE GERM	82
1. REGULATIVE EGGS	82
(a) Analysis of potency by redistribution of materials	82
(b) Determination of potency by isolation of blastomeres	88
2. MOSAIC EGGS	91
II. POTENCY IN REGENERATIVE PROCESSES	98
1. REGENERATION AS A SUPPLEMENTARY DEVELOPMENTAL PERFORMANCE	98
2. ORIGIN OF THE MATERIAL OF THE REGENERATED PART. METAPLASIA	103
3. HETEROMORPHOSIS	108
III. A NON-PREFORMISTIC CHARACTERIZATION OF DEVELOPMENT	111
1. THE CONCEPTIONS OF PREFORMATION AND EVOLUTION	111
2. INFERENCES FROM THE FACTS OF EXPERIMENTAL EMBRYOLOGY	115
3. THE SAME CONCLUSIONS AS THEY AFFECT MOSAIC EGGS	116

CHAPTER V

THE PROBLEM OF DETERMINATION

I. THE CHRONOLOGY OF THE PROCESS OF DETERMINATION	120
1. GENERAL SIGNIFICANCE OF DETERMINATION	120
2. DETERMINATION AND CLEAVAGE	122
3. DETERMINATION IN THE EGG AFTER CLEAVAGE	125
II. SUBORDINATE ORGANIZATIONS OF THE EARLY EMBRYO AND THEIR RELATION TO DETERMINATION	131
1. POLARITY OF THE EGG	131
2. POLE PLASMS	133
3. ORGANIZERS IN THE EGG AFTER CLEAVAGE	137

CONTENTS

13

	PAGE
III. DETERMINATION AS A DEPENDENT PHENOMENON IN LATER STAGES OF DEVELOPMENT AND IN REGENERATION	147
1. ORGAN-RUDIMENTS AS ORGANIZERS	147
2. ORGANIZING ACTION IN REGENERATED PARTS	153
IV. THE EPIGENETIC CHARACTER OF DEVELOPMENT	158

CHAPTER VI

THE INFLUENCE OF THE ENVIRONMENT ON THE PROCESSES OF DEVELOPMENT

I. THE ACTION OF EXTERNAL FACTORS ON THE INDIVIDUAL	165
1. GENERAL ACTION OF THE ENVIRONMENT	165
2. FACTORS OF THE ENVIRONMENT SEPARATELY CONSIDERED	167
(a) Gravity and centrifugal force	167
(b) Temperature	170
(c) Light	173
(d) Chemical composition of the medium	178
(e) Nutrition and metabolism	182
(f) Functional requirements	183
II. THE TRANS-INDIVIDUAL ACTION OF EXTERNAL FACTORS	185
1. THE REACTION-BASIS, THE REACTION-NORM, AND THE COURSE OF THE REACTION	185
2. THE VARIOUS POSSIBLE FORMS OF INDUCTION	186
3. THE RESULTS OF INDUCTION	193
(a) Pre-induced modification	194
(b) Persistent modification	196
(c) Mutation	202
(d) The "inheritance of acquired characters"	205

CHAPTER VIII

THE VARIOUS INTERRELATIONS CONCERNED IN DEVELOPMENT, THEIR FUNCTIONS AND THE AGENCIES UPON WHICH THEY DEPEND

I. INTERRELATIONS CONNECTED WITH DETERMINATION	208
1. THE SUBORDINATION OF SEPARATE INTERRELATIONS WITHIN THE WHOLE	208
2. AGENCIES CONCERNED IN THE DETERMINATIVE ACTION OF THE PARTS	210

14 EXPERIMENTAL ANALYSIS OF DEVELOPMENT

	PAGE
II. INTERRELATIONS CONNECTED WITH REALIZATION	217
1. THE AUGMENTATIVE-TROPHIC RELATION	219
2. THE FORMATIVE-TROPHIC RELATION	220
(a) Interrelations conditioned by stimuli	220
(b) Interrelations conditioned by hormones	227
(c) Interrelations due to physico-chemical agency	236
III. INDEPENDENCE OF THE PARTS	237

CHAPTER VIII

THE GERM-CELL AS REACTION-BASIS

I. THE REACTION-BASIS FROM THE POINT OF VIEW OF GENETICS	239
1. THE REACTION-BASIS AND THE THEORY OF FACTORS	239
2. THE REACTION-BASIS AND THE CHROMOSOME THEORY	242
3. DEDUCTIONS CONCERNING THE NATURE OF DEVELOPMENT AND OF THE ORGANISM	246
II. THE REACTION-BASIS IN THE LIGHT OF ANALYTICAL EMBRYOLOGY	250
1. THE THEORY OF THE UNITY OF THE ORGANISM	250
2. THE UNITY OF THE REACTION-BASIS	253
III. RECONCILIATION OF THE OPPOSING THEORIES	255
1. THE QUESTION OF THE CONCRETE EXISTENCE OF THE GENE	256
(a) The continuity of the chromosomes	256
(b) The basis of the individual genes	258
(c) The chromosomes and the active nucleus ("resting" nucleus)	261
2. ARE THE CHROMOSOMES SOLELY RESPONSIBLE FOR DETERMINATION?	264
(a) Non-chromosomal sex-determination	264
(b) The part played by the cytoplasm in determination	268
3. THE EPIGENETIC CHARACTER OF THE GENES AND THE UNITY OF THE REACTION-BASIS	273
BIBLIOGRAPHY	281
INDEX	283
