Committed to Excellence v

Preparing Students for the Future ix

Using Connect® and *Biology*, 11th edition xii

Part

The Molecular Basis of Life

1 The Science of Biology 1

- 1.1 The Science of Life 1
- 1.2 The Nature of Science 4
- 1.3 An Example of Scientific Inquiry: Darwin and Evolution 8
- 1.4 Unifying Themes in Biology 12

2 The Nature of Molecules and the Properties of Water 17

- 2.1 The Nature of Atoms 18
- 2.2 Elements Found in Living Systems 22
- 2.3 The Nature of Chemical Bonds 23
- 2.4 Water: A Vital Compound 25
- 2.5 Properties of Water 28
- 2.6 Acids and Bases 29

3 The Chemical Building Blocks of Life 33

- 3.1 Carbon: The Framework of Biological Molecules 34
- 3.2 Carbohydrates: Energy Storage and Structural Molecules 38
- 3.3 Nucleic Acids: Information Molecules 41
- 3.4 Proteins: Molecules with Diverse Structures and Functions 44
- 3.5 Lipids: Hydrophobic Molecules 53

Part

Biology of the Cell

4 Cell Structure 59

- 4.1 Cell Theory 59
- 4.2 Prokaryotic Cells 63
- 4.3 Eukaryotic Cells 65
- 4.4 The Endomembrane System 69
- 4.5 Mitochondria and Chloroplasts: Cellular Generators 73
- 4.6 The Cytoskeleton 75
- 4.7 Extracellular Structures and Cell Movement 79
- 4.8 Cell-to-Cell Interactions 82

5 Membranes 88

- 5.1 The Structure of Membranes 88
- 5.2 Phospholipids: The Membrane's Foundation 92
- 5.3 Proteins: Multifunctional Components 94
- 5.4 Passive Transport Across Membranes 96
- 5.5 Active Transport Across Membranes 99
- 5.6 Bulk Transport by Endocytosis and Exocytosis 102

6 Energy and Metabolism 107

- 6.1 The Flow of Energy in Living Systems 108
- 6.2 The Laws of Thermodynamics and Free Energy 109
- 6.3 ATP: The Energy Currency of Cells 112
- 6.4 Enzymes: Biological Catalysts 113
- 6.5 Metabolism: The Chemical Description of Cell Function 117

7 How Cells Harvest Energy 122

- 7.1 Overview of Respiration 123
- 7.2 Glycolysis: Splitting Glucose 127
- 7.3 The Oxidation of Pyruvate Produces Acetyl-CoA 130
- 7.4 The Krebs Cycle 131
- 7.5 The Electron Transport Chain and Chemiosmosis 134
- 7.6 Energy Yield of Aerobic Respiration 137
- 7.7 Regulation of Aerobic Respiration 138
- 7.8 Oxidation Without O₂ 139
- 7.9 Catabolism of Proteins and Fats 140
- 7.10 Evolution of Metabolism 142

8 Photosynthesis 147

- 8.1 Overview of Photosynthesis 147
- 8.2 The Discovery of Photosynthetic Processes 149
- 8.3 Pigments 151
- 8.4 Photosystem Organization 154
- 8.5 The Light-Dependent Reactions 156
- 8.6 Carbon Fixation: The Calvin Cycle 160
- 8.7 Photorespiration 163

9 Cell Communication 168

- 9.1 Overview of Cell Communication 168
- 9.2 Receptor Types 171
- 9.3 Intracellular Receptors 173

- 9.4 Signal Transduction Through Receptor Kinases 174

- 9.5 Signal Transduction Through G Protein-Coupled Receptors 178

10 How Cells Divide 186

- 10.1 Bacterial Cell Division 187
10.2 Eukaryotic Chromosomes 189
10.3 Overview of the Eukaryotic Cell Cycle 192
10.4 Interphase: Preparation for Mitosis 193
10.5 M Phase: Chromosome Segregation and the Division of Cytoplasmic Contents 194
10.6 Control of the Cell Cycle 198

Part III Genetic and Molecular Biology

11 Sexual Reproduction and Meiosis 207

- 11.1 Sexual Reproduction Requires Meiosis 207
11.2 Features of Meiosis 209
11.3 The Process of Meiosis 210
11.4 Summing Up: Meiosis Versus Mitosis 215

12 Patterns of Inheritance 221

- 12.1 The Mystery of Heredity 221
12.2 Monohybrid Crosses: The Principle of Segregation 224
12.3 Dihybrid Crosses: The Principle of Independent Assortment 228
12.4 Probability: Predicting the Results of Crosses 230
12.5 The Testcross: Revealing Unknown Genotypes 231
12.6 Extensions to Mendel 232

13 Chromosomes, Mapping, and the Meiosis-Inheritance Connection 239

- 13.1 Sex Linkage and the Chromosomal Theory of Inheritance 240
13.2 Sex Chromosomes and Sex Determination 241
13.3 Exceptions to the Chromosomal Theory of Inheritance 244
13.4 Genetic Mapping 244
13.5 Selected Human Genetic Disorders 249

14 DNA: The Genetic Material 256

- 14.1 The Nature of the Genetic Material 256
14.2 DNA Structure 259

- 14.3 Basic Characteristics of DNA Replication 263

- 14.4 Prokaryotic Replication 266

- 14.5 Eukaryotic Replication 271

- 14.6 DNA Repair 273

15 Genes and How They Work 278

- 15.1 The Nature of Genes 278
15.2 The Genetic Code 281
15.3 Prokaryotic Transcription 284
15.4 Eukaryotic Transcription 287
15.5 Eukaryotic pre-mRNA Splicing 289
15.6 The Structure of tRNA and Ribosomes 291
15.7 The Process of Translation 293
15.8 Summarizing Gene Expression 297
15.9 Mutation: Altered Genes 299

16 Control of Gene Expression 304

- 16.1 Control of Gene Expression 304
16.2 Regulatory Proteins 305
16.3 Prokaryotic Regulation 308
16.4 Eukaryotic Regulation 312
16.5 Chromatin Structure and Gene Expression 315
16.6 Eukaryotic Posttranscriptional Regulation 317
16.7 Protein Degradation 322

17 Biotechnology 327

- 17.1 Recombinant DNA 327
17.2 Amplifying DNA Using the Polymerase Chain Reaction 332
17.3 Creating, Correcting, and Analyzing Genetic Variation 335
17.4 Constructing and Using Transgenic Organisms 337
17.5 Environmental Applications 341
17.6 Medical Applications 343
17.7 Agricultural Applications 347

18 Genomics 353

- 18.1 Mapping Genomes 353
18.2 Sequencing Genomes 357
18.3 Genome Projects 360
18.4 Genome Annotation and Databases 361
18.5 Comparative and Functional Genomics 365
18.6 Applications of Genomics 370

19 Cellular Mechanisms of Development 375

- 19.1 The Process of Development 375
19.2 Cell Division 376
19.3 Cell Differentiation 378
19.4 Nuclear Reprogramming 383
19.5 Pattern Formation 386
19.6 Morphogenesis 393

Part

IV Evolution 399

20 Genes Within Populations 399

- 20.1 Genetic Variation and Evolution 399
- 20.2 Changes in Allele Frequency 401
- 20.3 Five Agents of Evolutionary Change 404
- 20.4 Quantifying Natural Selection 408
- 20.5 Natural Selection's Role in Maintaining Variation 409
- 20.6 Selection Acting on Traits Affected by Multiple Genes 411
- 20.7 Experimental Studies of Natural Selection 413
- 20.8 Interactions Among Evolutionary Forces 415
- 20.9 The Limits of Selection 417

21 The Evidence for Evolution 421

- 21.1 The Beaks of Darwin's Finches: Evidence of Natural Selection 422
- 21.2 Peppered Moths and Industrial Melanism: More Evidence of Selection 424
- 21.3 Artificial Selection: Human-Initiated Change 426
- 21.4 Fossil Evidence of Evolution 428
- 21.5 Anatomical Evidence for Evolution 432
- 21.6 Convergent Evolution and the Biogeographical Record 434
- 21.7 Darwin's Critics 436

22 The Origin of Species 440

- 22.1 The Nature of Species and the Biological Species Concept 441
- 22.2 Natural Selection and Reproductive Isolation 445
- 22.3 The Role of Genetic Drift and Natural Selection in Speciation 446
- 22.4 The Geography of Speciation 447
- 22.5 Adaptive Radiation and Biological Diversity 450
- 22.6 The Pace of Evolution 455
- 22.7 Speciation and Extinction Through Time 456

23 Systematics, Phylogenies, and Comparative Biology 460

- 23.1 Systematics 460
- 23.2 Cladistics 462
- 23.3 Systematics and Classification 465
- 23.4 Phylogenetics and Comparative Biology 469
- 23.5 Phylogenetics and Disease Evolution 475

24 Genome Evolution 480

- 24.1 Comparative Genomics 480
- 24.2 Genome Size 483
- 24.3 Evolution Within Genomes 487

24.4 Gene Function and Expression Patterns 491

24.5 Applying Comparative Genomics 492

25 Evolution of Development 497

- 25.1 Evolution of Developmental Patterns 497
- 25.2 Single-Gene Changes and the Alteration of Form and Function 500
- 25.3 Different Ways to Evolve the Same Structure 505
- 25.4 Diversity of Eyes in the Natural World: A Case Study 506

Part

V Diversity of Life on Earth

26 The Origin and Diversity of Life 513

- 26.1 Deep Time 515
- 26.2 Origins of Life 515
- 26.3 Evidence for Early Life 518
- 26.4 Earth's Changing System 520
- 26.5 Ever-Changing Life on Earth 521

27 Viruses 527

- 27.1 The Nature of Viruses 528
- 27.2 Bacteriophage: Bacterial Viruses 532
- 27.3 Human Immunodeficiency Virus (HIV) 534
- 27.4 Other Viral Diseases 538
- 27.5 Prions and Viroids: Subviral Particles 540

28 Prokaryotes 544

- 28.1 Prokaryotic Diversity 544
- 28.2 Prokaryotic Cell Structure 549
- 28.3 Prokaryotic Genetics 552
- 28.4 Prokaryotic Metabolism 557
- 28.5 Human Bacterial Disease 558
- 28.6 Beneficial Prokaryotes 561

29 Protists 565

- 29.1 Eukaryotic Origins and Endosymbiosis 565
- 29.2 Overview of Protists 568
- 29.3 Feeding Groove in Excavata 570
- 29.4 Secondary Endosymbiosis in Chromalveolata 573
- 29.5 Chloroplasts in Archaeplastida 578
- 29.6 Slender Pseudopods in Rhizaria 581
- 29.7 Blunt Pseudopods in Amoebozoa 583
- 29.8 Propulsion via a Single Posterior Flagellum in Opisthokonta 584

30 Seedless Plants 588

- 30.1 Origin of Land Plants 588
- 30.2 Bryophytes: Dominant Gametophyte Generation 591

30.3	Tracheophyte Plants: Dominant Sporophyte Generation	593
30.4	Lycophytes: Divergent from Main Lineage of Vascular Plants	596
30.5	Pterophytes: Ferns and Their Relatives	597
31	Seed Plants	602
31.1	The Evolution of Seed Plants	602
31.2	Gymnosperms: Plants with "Naked Seeds"	603
31.3	Angiosperms: The Flowering Plants	607
31.4	Seeds	613
31.5	Fruits	614
32	Fungi	619
32.1	Defining Fungi	619
32.2	Microsporidia: Unicellular Parasites	623
32.3	Chytridiomycota and Relatives: Fungi with Zoospores	624
32.4	Zygomycota: Fungi That Produce Zygotes	625
32.5	Glomeromycota: Asexual Plant Symbionts	627
32.6	Basidiomycota: The Club (Basidium) Fungi	627
32.7	Ascomycota: The Sac (Ascus) Fungi	628
32.8	Ecology of Fungi	630
32.9	Fungal Parasites and Pathogens	634
33	Animal Diversity and the Evolution of Body Plans	638
33.1	Some General Features of Animals	639
33.2	Evolution of the Animal Body Plan	640
33.3	Animal Phylogeny	644
33.4	Parazoa: Animals That Lack Specialized Tissues	649
33.5	Eumetazoa: Animals with True Tissues	651
33.6	The Bilateria	656
34	Protostomes	660
34.1	The Clades of Protostomes	661
34.2	Platyzoans: Flatworms (Platyhelminthes)	662
34.3	Platyzoans: Rotifers (Rotifera)	665
34.4	Lophotrochozoans: Mollusks (Mollusca)	666
34.5	Lophotrochozoans: Ribbon Worms (Nemertea)	672
34.6	Lophotrochozoans: Annelids (Annelida)	673
34.7	Lophophorates: Bryozoans (Bryozoa) and Brachiopods (Brachiopoda)	676
34.8	Ecdysozoans: Roundworms (Nematoda)	678
34.9	Ecdysozoans: Arthropods (Arthropoda)	680
35	Deuterostomes	692
35.1	Echinoderms	693
35.2	Chordates	696
35.3	Nonvertebrate Chordates	697
35.4	Vertebrate Chordates	698
35.5	Fishes	700

35.6	Amphibians	705
35.7	Reptiles	708
35.8	Birds	714
35.9	Mammals	718
35.10	Evolution of the Primates	723

VI Plant Form and Function

36 Plant Form 732

36.1	Organization of the Plant Body: An Overview	733
36.2	Plant Tissues	736
36.3	Roots: Anchoring and Absorption Structures	742
36.4	Stems: Support for Above-Ground Organs	746
36.5	Leaves: Photosynthetic Organs	751

37 Transport in Plants 757

37.1	Transport Mechanisms	758
37.2	Water and Mineral Absorption	761
37.3	Xylem Transport	764
37.4	Rate of Transpiration	766
37.5	Water-Stress Responses	768
37.6	Phloem Transport	770

38 Plant Nutrition and Soils 775

38.1	Soils: The Substrates on Which Plants Depend	775
38.2	Plant Nutrients	779
38.3	Special Nutritional Strategies	781
38.4	Carbon-Nitrogen Balance and Global Change	784
38.5	Phytoremediation	787

39 Plant Defense Responses 792

39.1	Physical Defenses	792
39.2	Chemical Defenses	794
39.3	Animals That Protect Plants	798
39.4	Systemic Responses to Invaders	799

40 Sensory Systems in Plants 804

40.1	Responses to Light	804
40.2	Responses to Gravity	809
40.3	Responses to Mechanical Stimuli	811
40.4	Responses to Water and Temperature	813
40.5	Hormones and Sensory Systems	815

41 Plant Reproduction 831

41.1	Reproductive Development	832
41.2	Making Flowers	834
41.3	Structure and Evolution of Flowers	839
41.4	Pollination and Fertilization	842

- 41.5 Embryo Development 848
- 41.6 Germination 854
- 41.7 Asexual Reproduction 857
- 41.8 Plant Life Spans 858

VII Animal Form and Function

42 The Animal Body and Principles of Regulation 864

- 42.1 Organization of the Vertebrate Body 865
- 42.2 Epithelial Tissue 866
- 42.3 Connective Tissue 869
- 42.4 Muscle Tissue 871
- 42.5 Nerve Tissue 873
- 42.6 Overview of Vertebrate Organ Systems 874
- 42.7 Homeostasis 877
- 42.8 Regulating Body Temperature 879

43 The Nervous System 888

- 43.1 Nervous System Organization 889
- 43.2 The Mechanism of Nerve Impulse Transmission 891
- 43.3 Synapses: Where Neurons Communicate with Other Cells 897
- 43.4 The Central Nervous System: Brain and Spinal Cord 902
- 43.5 The Peripheral Nervous System: Sensory and Motor Neurons 910

44 Sensory Systems 916

- 44.1 Overview of Sensory Receptors 917
- 44.2 Mechanoreceptors: Touch and Pressure 918
- 44.3 Hearing, Vibration, and Detection of Body Position 921
- 44.4 Chemoreceptors: Taste, Smell, and pH 926
- 44.5 Vision 929
- 44.6 The Diversity of Sensory Experiences 935

45 The Endocrine System 939

- 45.1 Regulation of Body Processes by Chemical Messengers 940
- 45.2 Actions of Lipophilic Versus Hydrophilic Hormones 945
- 45.3 The Pituitary and Hypothalamus: The Body's Control Centers 948
- 45.4 The Major Peripheral Endocrine Glands 953
- 45.5 Other Hormones and Their Effects 957

46 The Musculoskeletal System 963

- 46.1 Types of Skeletal Systems 964
- 46.2 A Closer Look at Bone 965

- 46.3 Joints and Skeletal Movement 969
- 46.4 Muscle Contraction 971
- 46.5 Modes of Animal Locomotion 977

47 The Digestive System 983

- 47.1 Types of Digestive Systems 984
- 47.2 The Mouth and Teeth: Food Capture and Bulk Processing 986
- 47.3 The Esophagus and the Stomach: The Early Stages of Digestion 987
- 47.4 The Intestines: Breakdown, Absorption, and Elimination 989
- 47.5 Variations in Vertebrate Digestive Systems 993
- 47.6 Neural and Hormonal Regulation of the Digestive Tract 995
- 47.7 Accessory Organ Function 996
- 47.8 Food Energy, Energy Expenditure, and Essential Nutrients 997

48 The Respiratory System 1003

- 48.1 Gas Exchange Across Respiratory Surfaces 1004
- 48.2 Gills, Cutaneous Respiration, and Tracheal Systems 1006
- 48.3 Lungs 1008
- 48.4 Structures, Mechanisms, and Control of Ventilation in Mammals 1011
- 48.5 Transport of Gases in Body Fluids 1014

49 The Circulatory System 1020

- 49.1 The Components of Blood 1020
- 49.2 Invertebrate Circulatory Systems 1023
- 49.3 Vertebrate Circulatory Systems 1025
- 49.4 The Four-Chambered Heart and the Blood Vessels 1028
- 49.5 Characteristics of Blood Vessels 1031
- 49.6 Regulation of Blood Flow and Blood Pressure 1035

50 Osmotic Regulation and the Urinary System 1040

- 50.1 Osmolarity and Osmotic Balance 1040
- 50.2 Nitrogenous Wastes: Ammonia, Urea, and Uric Acid 1042
- 50.3 Osmoregulatory Organs 1043
- 50.4 Evolution of the Vertebrate Kidney 1045
- 50.5 The Mammalian Kidney 1047
- 50.6 Hormonal Control of Osmoregulatory Functions 1052

51 The Immune System 1057

- 51.1 Innate Immunity 1057
- 51.2 Adaptive Immunity 1063
- 51.3 Cell-Mediated Immunity 1068
- 51.4 Humoral Immunity and Antibody Production 1070
- 51.5 Autoimmunity and Hypersensitivity 1076
- 51.6 Antibodies in Medical Treatment and Diagnosis 1078
- 51.7 Pathogens That Evade the Immune System 1081

52 The Reproductive System 1086

- 52.1 Animal Reproductive Strategies 1086
- 52.2 Vertebrate Fertilization and Development 1089
- 52.3 Structure and Function of the Human Male Reproductive System 1092
- 52.4 Structure and Function of the Human Female Reproductive System 1096
- 52.5 Contraception and Infertility Treatments 1100

53 Animal Development 1107

- 53.1 Fertilization 1108
- 53.2 Cleavage and the Blastula Stage 1112
- 53.3 Gastrulation 1114
- 53.4 Organogenesis 1118
- 53.5 Vertebrate Axis Formation 1124
- 53.6 Human Development 1127

VIII Ecology and Behavior

54 Behavioral Biology 1134

- 54.1 The Natural History of Behavior 1135
- 54.2 Nerve Cells, Neurotransmitters, Hormones, and Behavior 1136
- 54.3 Behavioral Genetics 1137
- 54.4 Learning 1139
- 54.5 The Development of Behavior 1140
- 54.6 Animal Cognition 1143
- 54.7 Orientation and Migratory Behavior 1144
- 54.8 Animal Communication 1146
- 54.9 Behavioral Ecology 1149
- 54.10 Reproductive Strategies and Sexual Selection 1151
- 54.11 Altruism 1156
- 54.12 The Evolution of Group Living and Animal Societies 1159

55 Ecology of Individuals and Populations 1164

- 55.1 The Environmental Challenges 1164
- 55.2 Populations: Groups of a Single Species in One Place 1166

- 55.3 Population Demography and Dynamics 1170
- 55.4 Life History and the Cost of Reproduction 1173
- 55.5 Environmental Limits to Population Growth 1175
- 55.6 Factors That Regulate Populations 1177
- 55.7 Human Population Growth 1180

56 Community Ecology 1187

- 56.1 Biological Communities: Species Living Together 1188
- 56.2 The Ecological Niche Concept 1189
- 56.3 Predator-Prey Relationships 1194
- 56.4 The Many Types of Species Interactions 1198
- 56.5 Ecological Succession, Disturbance, and Species Richness 1204

57 Dynamics of Ecosystems 1209

- 57.1 Biogeochemical Cycles 1210
- 57.2 The Flow of Energy in Ecosystems 1216
- 57.3 Trophic-Level Interactions 1221
- 57.4 Biodiversity and Ecosystem Stability 1225
- 57.5 Island Biogeography 1228

58 The Biosphere 1232

- 58.1 Ecosystem Effects of Sun, Wind, and Water 1232
- 58.2 Earth's Biomes 1237
- 58.3 Freshwater Habitats 1240
- 58.4 Marine Habitats 1243
- 58.5 Human Impacts on the Biosphere: Pollution and Resource Depletion 1247
- 58.6 Human Impacts on the Biosphere: Climate Change 1253

59 Conservation Biology 1259

- 59.1 Overview of the Biodiversity Crisis 1259
- 59.2 The Value of Biodiversity 1264
- 59.3 Factors Responsible for Extinction 1266
- 59.4 Approaches for Preserving Endangered Species and Ecosystems 1278

Appendix A: Answer Key A-1
