Note from Author v
Digital Tools for Your Success vi
Orientation to the Laboratory vii
Guided Tour Through a Lab Exercise viii
What's New in the Tenth Edition xi

PART ONE

Microscopic Techniques

- 1. Bright-Field Light Microscope (Dark Image, Brighter Background) and Microscopic Measurement of Organisms 3
- 2. The Hanging Drop Slide and Bacterial Motility 15
- 3. Dark-Field Light Microscope: Bright Image, Darker Background 19
- 4. Phase-Contrast Light Microscope 23
- 5. Fluorescence Microscope 29

PART TWO

Bacterial Morphology and Staining

- 6. Negative Staining 37
- 7. Smear Preparation and Simple Staining 43
- 8. Gram Stain 51
- 9. Acid-Fast Staining (Ziehl-Neelsen and Kinyoun) Procedures 59
- 10. Endospore Staining (Schaeffer-Fulton or Wirtz-Conklin) 65
- 11. Capsule Staining 71
- 12. Flagella Staining: West and Difco's SpotTest Methods 77

PART THREE

Basic Laboratory and Culture Techniques

- 13. Sterilization and Microbiological Culture Media Preparation 85
- 14. Culture Transfer Instruments, Techniques, and Isolation and Maintenance of Pure Cultures 93
- 15. Spread-Plate Technique 105
- 16. The Streak-Plate Technique: Selective and Differential Media 111

- 17. Pour-Plate Technique 119
- 18. Cultivation of Anaerobic Bacteria 125
- 19. Determination of Bacterial Numbers 135

PART FOUR

Biochemical Activities of Bacteria

- 20. Carbohydrates I: Fermentation and β -Galactosidase Activity 147
- 21. Carbohydrates II: Triple Sugar Iron Agar Test 155
- 22. Carbohydrates III: Starch Hydrolysis 163
- 23. Lipids: Lipid Hydrolysis 167
- 24. Proteins, Amino Acids, and Enzymes I: Hydrogen Sulfide Production and Motility 173
- 25. Proteins, Amino Acids, and Enzymes II: The IMViC Tests 179
- 26. Proteins, Amino Acids, and Enzymes III: Casein Hydrolysis 187
- 27. Proteins, Amino Acids, and Enzymes IV: Gelatin Hydrolysis 191
- 28. Proteins, Amino Acids, and Enzymes V: Catalase Activity 197
- 29. Proteins, Amino Acids, and Enzymes VI: Coagulase and DNase Activity 201
- 30. Proteins, Amino Acids, and Enzymes VII: Oxidase Test and Bioluminescence 207
- 31. Proteins, Amino Acids, and Enzymes VIII: Urease Activity 213
- 32. Proteins, Amino Acids, and Enzymes IX: Lysine and Ornithine Decarboxylase Tests 219
- 33. Proteins, Amino Acids, and Enzymes X: Phenylalanine Deamination 225
- 34. Proteins, Amino Acids, and Enzymes XI: Dissimilatory Nitrate Reduction 231

PART FIVE

Rapid Multitest Systems

- 35. The API[®] 20E System 239
- 36. The Enteropluri-Test System 247

L Indicates a LearnSmart Lab[®] activity is available for all or part of this exercise. For more information, visit www.learnsmartadvantage.com.

PART SIX

Unknown Identification

- 37. Using the First Edition of *Bergey's Manual of Systematic Bacteriology* to Identify Bacteria 257
- 38. General Unknown 263

PART SEVEN

Environmental Factors Affecting Growth of Microorganisms

- 39. Temperature 273
- 40. pH 279
- 41. Osmotic Pressure 285
- 42. The Effects of Chemical Agents on Bacteria I: Disinfectants and Other Antimicrobial Products 291
- 43. The Effects of Chemical Agents on Bacteria II: Antimicrobial Agents (Kirby-Bauer Method) and the Etest® 297
- 44. Hand Washing, Environmental Sampling, and Microbiological Monitoring 305
- 45. Determination of a Bacterial Growth Curve: Classical and Two-Hour Methods 313

PART EIGHT

Environmental and Food Microbiology

- 46. Standard Coliform Most Probable Number (MPN) Test and Colilert®-18 Coliform Test 327
- 47. Membrane Filter Technique for Coliforms and Fecal Streptococci; KONFIRM™ Test for Fecal Coliforms 337
- 48. Isolation of *Escherichia coli* Bacteriophages from Sewage and Determining Bacteriophage Titers 345
- 49. Enumeration of Soil Microorganisms 351
- 50. Bacterial Count of a Food Product 357
- 51. Examination of Milk for Bacteria 363

PART NINE

Medical Microbiology

- 52. Hemagglutination Reactions: Blood Groups 371
- 53. Isolation of Normal Microbiota from the Human Body 379

- 54. Staphylococci 387
- 55. Pneumococci 397
- 56. Streptococci 403
- 57. Neisseriae 411
- 58. Aerobic and Anaerobic Endospore-Forming Bacteria 417

PART TEN

Survey of Selected Eukaryotic Microorganisms

- 59. Fungi (Eumycota) I: Yeasts (*Ascomycota*) 425
- 60. Fungi (Eumycota) II: *Zygomycota* (*Rhizopus*), *Ascomycota* (*Penicillium*), and *Basidiomycota* (*Agaricus*) 433

PART ELEVEN

Microbial Genetics and Genomics

- 61. Bacterial Mutation 443
- 62. Bacterial Transformation 449
- 63. Bacterial Conjugation: The Transfer of Antibiotic-Resistant Plasmids 455
- 64. Isolation of Genomic DNA from Baker's Yeast (*Saccharomyces cerevisiae*) 461
- 65. Isolation and Purification of Genomic DNA from *Escherichia coli* 467

PART TWELVE

Scientific Inquiry

- 66. Independent Group Projects 475
- 67. Case Studies 483

Appendix A Dilutions with Sample Problems A-1

Appendix B Transmission-Absorbance Table for Spectrophotometry A-9

Appendix C Identification Charts A-10

Appendix D Reagents, Solutions, Stains, and Tests A-15

Appendix E Culture Media A-18

Appendix F Sources and Maintenance of Microbiological Stock Cultures A-24

Appendix G Laboratory Skills and Laboratory Thinking Skills A-27

Appendix H Summary of Universal Precautions and Laboratory Safety Procedures A-29

Appendix I Biosafety Level (BSL) A-30

Credits C-1
