CHAPTER 1

Introduction to Physical Anthropology 3

Introduction	3
The Human Connection	5
Biocultural Evolution	6
What Is Anthropology?	10

Cultural Anthropology	11
Archaeology	11
Linguistic Anthropology	11
Physical Anthropology	12
Applied Anthropology	18
Physical Anthropology and the Scientific Method	19
A Closer Look Forensic Anthropology in Practice	21
The Anthropological Perspective	22
Summary of Main Topics	23
Critical Thinking Questions	23

Heredity and Evolution

CHAPTER 2

The Development of Evolutionary Theory 25

A Brief History of Evolutionary Thought	26
The Scientific Revolution	27
Precursors of the Theory of Evolution	29
The Discovery of Natural Selection	33
In Darwin's Shadow	37
Natural Selection	38
Natural Selection in Action	39
Constraints on Nineteenth-Century Evolutionary Theory	42
Opposition to Evolution Today	42
A Brief History of Opposition to Evolution in the United States	43
At a Glance The Mechanism of Natural Selection	45
How Do We Know?	46
Summary of Main Topics	46
Critical Thinking Questions	47
Media Resources	47

CHAPTER 3**The Biological Basis of Life 49**

Cells 50

The Structure of DNA 51

A Closer Look Rosalind Franklin: The Fourth (but Invisible) Member of the Double Helix Team 52

DNA Replication 52

Protein Synthesis 53

What Is a Gene? 57

Regulatory Genes 58

A Closer Look Noncoding DNA—Not Junk After All 59**At a Glance** Coding and Noncoding DNA 61

Mutation: When Genes Change 61

Chromosomes 63

Karyotyping Chromosomes 66

Cell Division 67

Mitosis 67

Meiosis 68

New Frontiers 71

How Do We Know? 74

Summary of Main Topics 75

Critical Thinking Questions 75

Media Resources 75

CHAPTER 4**Heredity and Evolution 77**

The Genetic Principles Discovered by Mendel 78

Segregation 78

Dominance and Recessiveness 79

Mendelian Inheritance in Humans 83

Misconceptions about Dominance and Recessiveness 83

Patterns of Mendelian Inheritance 85

Non-Mendelian Inheritance 89

Polygenic Inheritance 89

At a Glance Mendelian vs. Polygenic Traits 92

Mitochondrial Inheritance 92

Pleiotropy 93

Genetic and Environmental Factors 93

Modern Evolutionary Theory 94

The Modern Synthesis 94

A Current Definition of Evolution 94

Factors That Produce and Redistribute Variation 95

Mutation 95

Gene Flow 96

Genetic Drift and Founder Effect 97

Natural Selection Is Directional and Acts on Variation 100

Review of Genetics and Evolutionary Factors 102

How Do We Know? 104

Summary of Main Topics 105

Critical Thinking Questions 105

CHAPTER 5**Macroevolution: Processes of Vertebrate and Mammalian Evolution 107**

How We Connect: Discovering the Human Place in the Organic World 108

Principles of Classification 108

Making Connections: Constructing Classifications and Interpreting Evolutionary Relationships 110

Comparing Evolutionary Systematics with Cladistics 111

A Closer Look Evo-Devo: The Evolution Revolution 112–113

An Example of Cladistic Analysis: The Evolutionary History of Cars and Trucks 114

Using Cladistics to Interpret Real Organisms 114

At a Glance Comparing Two Approaches to Interpretation of Evolutionary Relationships 117

Definition of Species 117

Interpreting Species and Other Groups in the Fossil Record 119

Recognition of Fossil Species 120

Recognition of Fossil Genera 121

What Are Fossils and How Do They Form? 122

Humans Are Vertebrates: Distant Connections 124

A Closer Look Deep Time 126–127

Humans Are Also Mammals: Closer Connections 128

The Emergence of Major Mammalian Groups 130

Processes of Macroevolution 130

Adaptive Radiation 130

Generalized and Specialized Characteristics 131

Working Together: Microevolution and Macroevolution 132

How Do We Know? 133

Summary of Main Topics 133

Critical Thinking Questions 133

Primates

Richard Mitterman/Corbis/Getty Images

CHAPTER 6

Survey of the Living Primates 135

Primate Characteristics 136

Primate Adaptations 139

Evolutionary Factors 139

A Closer Look Primate Cranial Anatomy 140–141

Geographical Distribution and Habitats 141

Diet and Teeth 144

Locomotion 145

Primate Classification 146

A Survey of the Living Primates 148

Lemurs and Lorises 148

Tarsiers 150

Anthropoids: Monkeys, Apes, and Humans 151

Hominoids: Apes and Humans 158

Endangered Primates 166

A Closer Look Aye-Ayes: Victims of Derived

Traits and Superstition 168

The Bushmeat Trade 169

How Do We Know? 172

Summary of Main Topics 172

Critical Thinking Questions 173

CHAPTER 7

Primate Behavior 175

The Evolution of Behavior 176

Some Factors That Influence Social Structure 178

A Closer Look Types of Nonhuman Primate Social Groups 180

Why Be Social? 181

Primate Social Behavior 182

Dominance 182

At a Glance Primate Social Strategies 183

Communication 184

Aggressive and Affiliative Behaviors within Groups 186

Aggression 186

Affiliative Behaviors 187

Reproduction and Reproductive Behaviors 188

Reproductive Strategies 189

Sexual Selection 189

Infanticide as a Reproductive Strategy? 190

Mothers, Fathers, and Infants 192

Nonhuman Primate Models for the Evolution of Human Behavior 194

Brain and Body Size 195

Language 197

The Evolution of Language 200

Primate Cultural Behavior 202

At a Glance Evolution of Human Language 203

Conflict between Groups 207

Prosocial Behaviors: Affiliation, Altruism, and Cooperation 210

Altruism 210

The Primate Continuum 212

How Do We Know? 213

Summary of Main Topics 214

Critical Thinking Questions 215

CHAPTER 8**Overview of the Fossil Primates 217**

Background to Primate Evolution: Late Mesozoic 218

Primate Origins 218

A Closer Look Building Family Trees from Genes 220

Made to Order: Archaic Primates 221

Eocene Euprimates 222

Lemur Connections? The Adapoids 223

At a Glance Key Early Primate Names 226

Closer Connections to Living Primates: The Evolution of True Lemurs and Lorises 226

Tarsier Connections? The Omomyoids 228

Evolution of True Tarsiers 229

Eocene and Oligocene Early Anthropoids 229

Oligocene Primates 231

A Closer Look Primate Diversity in the Fayum 232

True Anthropoids 233

Early Platyrrhines: New World Anthropoids 234

A Closer Look Island Hopping and Primate Evolution 236

Miocene Primates 237

Monkeying Around 237

At a Glance Key Early Anthropoid Names 239

Aping Monkeys 240

True Apes 244

At a Glance Key Fossil Ape Names 244

Evolution of Extant Hominoids 250

How Do We Know? 252

Summary of Main Topics 253

Critical Thinking Questions 253

Hominin Evolution

CHAPTER 9**Paleoanthropology: Reconstructing Early Hominin Behavior and Ecology 255**

Understanding Our Direct Evolutionary Connections:

What's a Hominin? 256

What's in a Name? 256

Biocultural Evolution: The Human Capacity for Culture 257

Discovering Human Evolution: The Science of Paleoanthropology 259

A Closer Look What Were Early Hominins Doing, and How Do We Know? 260–261

Connecting the Dots through Time:

Paleoanthropological Dating Methods 264

A Closer Look Chronometric Dating Estimates 267

Experimental Archaeology 268

Stone Tool (Lithic) Technology 268

Analysis of Bone 270

Reconstruction of Early Hominin Environments and Behavior 270

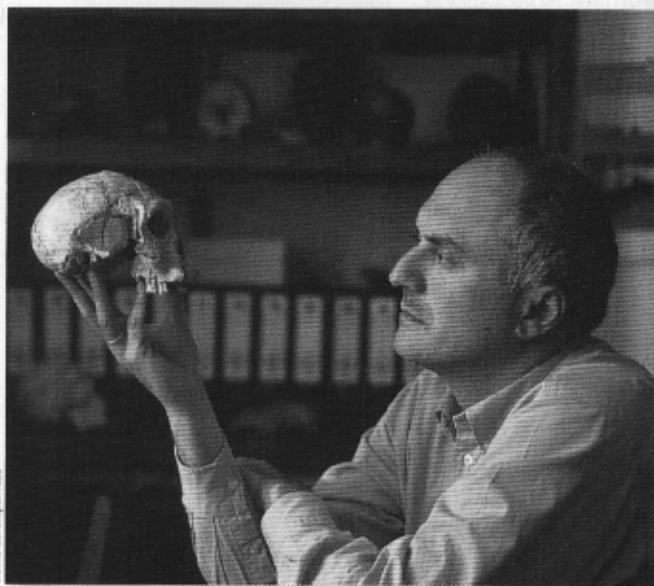

Why Did Hominins Become Bipedal? 271

How Do We Know? 275

Summary of Main Topics 275

Critical Thinking Questions 275

Media Resources 275

David Lordkipanidze

CHAPTER 10**Hominin Origins in Africa 277**

Walking the Walk: The Bipedal Adaptation 278

The Mechanics of Walking on Two Legs 278

A Closer Look Major Features of Bipedal Locomotion 280–281

Digging for Connections: Early Hominins from Africa 282

Pre-Australopiths (6.0+ to 4.4 mya) 283

At a Glance Key Pre-Australopith Discoveries 288

Australopiths (4.2 to 1.2 mya) 288

Australopithecus afarensis 289**A Closer Look** Cranial Capacity 293

A Contemporaneous and Very Different Kind of Hominin 293

Later More Derived Australopiths (3.0 to 1.2 mya) 294

New Connections: A Transitional Australopith? 297

Closer Connections: Early *Homo* (2.0 to 1.4 mya) 299

Interpretations: What Does It All Mean? 301

Seeing the Big Picture: Adaptive Patterns of Early African Hominins 304

How Do We Know? 305

Summary of Main Topics 305

Critical Thinking Questions 305

Media Resources 305

CHAPTER 11**The First Dispersal of the Genus *Homo*: *Homo erectus* and Contemporaries 307**

A New Kind of Hominin 310

The Morphology of *Homo erectus* 310

Body Size 311

Brain Size 311

Cranial Shape 311

The First *Homo erectus*: *Homo erectus* from Africa 311**At a Glance** Key *Homo erectus* Discoveries from Africa 315

Who Were the Earliest African Emigrants? 315

Homo erectus from Indonesia 317**A Closer Look** In Search of Ancient Human Ancestors—and a Little Shade 318–319*Homo erectus* from China 319Zhoukoudian *Homo erectus* 319

Cultural Remains from Zhoukoudian 320

Other Chinese Sites 321

A Closer Look Dragon Bone Hill: Cave Home or Hyena Den? 322–323Asian and African *Homo erectus*: A Comparison 323**At a Glance** Key *Homo erectus* Discoveries from Asia 324Later *Homo erectus* from Europe 325**At a Glance** Key *Homo erectus* and Contemporaneous Discoveries from Europe 326Technological Trends During *Homo erectus* Times 327Seeing the Connections: Interpretations of *Homo erectus* 328

How Do We Know? 329

Summary of Main Topics 329

Critical Thinking Questions 329

CHAPTER 12**Premodern Humans 331**

When, Where, and What 332

The Pleistocene 332

Dispersal of Middle Pleistocene Hominins 333

Middle Pleistocene Hominins: Terminology 333

Premodern Humans of the Middle Pleistocene 334

Africa 334

Europe 335

At a Glance Key Premodern Human (*H. heidelbergensis*) Fossils from Africa 335**At a Glance** Key Premodern Human (*H. heidelbergensis*) Fossils from Europe 336
Asia 337**At a Glance** Key Premodern Human (*H. heidelbergensis*) Fossils from Asia 337

A Review of Middle Pleistocene Evolution 340

Middle Pleistocene Culture 340

Neandertals: Premodern Humans of the Late Pleistocene 341

Western Europe 345

Central Europe 346

Western Asia 347

Central Asia 349

At a Glance Key Neandertal Fossil Discoveries 350

Culture of Neandertals 350

Technology 350

Subsistence 351

Speech and Symbolic Behavior 351

A Closer Look The Evolution of Language 352–353
Burials 354

Molecular Connections: The Genetic Evidence 354

A Closer Look Are They Human? 356–357

Seeing Close Human Connections: Understanding Premodern Humans 357

How Do We Know? 360

Summary of Main Topics 361

Critical Thinking Questions 361

CHAPTER 13**The Origin and Dispersal of Modern Humans 363**

Approaches to Understanding Modern Human Origins 364

The Regional Continuity Model: Multiregional Evolution 364

Replacement Models 365

The Earliest Discoveries of Modern Humans 368

Africa 368

The Near East 371

At a Glance Key Early Modern *Homo sapiens*

Discoveries from Africa and the Near East 373

Asia 373

Australia 375

Central Europe 375

Western Europe 377

Something New and Different: The "Little People" 378

At a Glance Key Early Modern *Homo sapiens*

Discoveries from Europe and Asia 378

Technology and Art in the Upper Paleolithic 380

Europe 380

A Closer Look Maybe You Can Take It with You 384

Africa 384

Summary of Upper Paleolithic Culture 385

How Do We Know? 387

Summary of Main Topics 387

Critical Thinking Questions 387

Contemporary Human Evolution

CHAPTER 14**Modern Human Biology: Patterns of Variation 389**

Historical Views of Human Variation 390

The Concept of Race 391

A Closer Look Racial Purity: A False and Dangerous Ideology 392–393

Contemporary Interpretations of Human Variation 396

Human Polymorphisms 397

Polymorphisms at the DNA Level 398

At a Glance Genetic Polymorphisms Used to Study Human Variation 399

A Closer Look What DNA Tells Us about Ancient Human Migrations 400–401

Population Genetics 402

Calculating Allele Frequencies 404

At a Glance Population Genetics Research 405

A Closer Look Calculating Allele Frequencies: PTC Tasting in a Hypothetical Population 406

Evolution in Action: Modern Human Populations 407

Nonrandom Mating 407

Human Biocultural Evolution 408

How Do We Know? 411

Summary of Main Topics 411

Critical Thinking Questions 411

Media Resources 411

CHAPTER 15**Modern Human Biology: Patterns of Adaptation 413**

The Adaptive Significance of Human Variation 413

Solar Radiation and Skin Color 415

The Thermal Environment 419

A Closer Look Skin Cancer and UV Radiation 422–423

High Altitude 425

Infectious Disease 427

The Continuing Impact of Infectious Disease 430

At a Glance Zoonoses and Human Infectious Disease 431

Human Skeletal Biology: What Bones Can Tell Us about Ancient Diseases, Trauma, and Lifestyles 433

Evidence of Prehistoric Diseases 433

Reconstruction of Prehistoric Behavioral Patterns 436

How Do We Know? 438

Summary of Main Topics 439

Critical Thinking Questions 439

Media Resources 439

CHAPTER 16**Legacies of Human Evolutionary History and the Human Life Course 441**

Evolved Biology, and Contemporary Lifestyles—Is There a Mismatch? 442

Biocultural Evolution and the Life Course 442

From Embryo to Adult: Human Growth and Development Today and in the Past 443

Nutritional Effects on Growth, Development, and Later-Life Health 444

A Closer Look Diabetes 448**At a Glance** Diet, Lifestyle, and Consequences 449

Other Factors Affecting Growth and Development: Genes, Environment, and Hormones 450

Life History Theory and the Human Life Course 453

Pregnancy, Birth, Infancy, and Childhood 454

Onset of Reproductive Functioning in Humans 458

Mothers and Grandmothers 459

Aging and Longevity 461

Effects of Technology on the Brain 464

Are We Still Evolving? 465

How Do We Know? 466

Summary of Main Topics 467

Critical Thinking Questions 467

Media Resources 467

CHAPTER 17**The Human Disconnection 469**

Human Impacts on the Planet and Other Life-Forms 470

Humans and the Impact of Culture 470

Global Climate Change 472

Impact on Biodiversity 476

Acceleration of Evolutionary Processes 479

Looking for Solutions 480

Is There Any Good News? 481

How Do We Know? 482

Summary of Main Topics 483

Critical Thinking Questions 483

APPENDIX A**Atlas of Primate Skeletal Anatomy 484****APPENDIX B****Sexing and Aging the Skeleton 492**

Glossary 497
