

# Contents

## Magazine: Hot Topics in Biochemistry

- The Genetics of Breast Cancer HT3
- Stem Cells: Science and Politics HT6
- The Science of Happiness and Depression HT11
- Humans versus Flu HT16
- Malaria HT20
- Aging—Looking for the Biochemical Fountain of Youth HT24
- Proteins and Magnets: Nuclear Magnetic Resonance in Biochemistry HT28
- G-Protein-Coupled Receptors HT32

## 1 Biochemistry and the Organization of Cells 1

- 1-1 Basic Themes 1
- 1-2 Chemical Foundations of Biochemistry 3
- 1-3 The Beginnings of Biology: Origin of Life 4
  - The Earth and Its Age 4
  - Biomolecules 8
  - Molecules to Cells 11
- 1-4 The Biggest Biological Distinction—Prokaryotes and Eukaryotes 14
- 1-5 Prokaryotic Cells 16
- 1-6 Eukaryotic Cells 17
- 1-7 How We Classify Eukaryotes and Prokaryotes 21
  - 1.1 BIOCHEMICAL CONNECTIONS | Extremophiles: The Toast of the Industry 22
- 1-8 Biochemical Energetics 24
- 1-9 Energy and Change 25
- 1-10 Spontaneity in Biochemical Reactions 26
- 1-11 Life and Thermodynamics 26
  - 1.2 BIOCHEMICAL CONNECTIONS | Predicting Reactions 28

- Summary 28
- Review Exercises 29
- Annotated Bibliography 31

## 2 Water: The Solvent for Biochemical Reactions 33

- 2-1 Water and Polarity 33
  - Solvent Properties of Water 34
  - Ionic Bonds 34
  - Salt Bridges 34
  - Ion-Dipole Interactions 34
  - van der Waals Interactions 34
  - Dipole-Dipole Interactions 35
  - Dipole-Induced Dipole Interactions 35
  - Induced Dipole-Induced Dipole Interactions 36
- 2-2 Hydrogen Bonds 38
  - 2.1 BIOCHEMICAL CONNECTIONS | How Basic Chemistry Affects Life: The Importance of the Hydrogen Bond 41
  - Other Biologically Important Hydrogen Bonds 41
- 2-3 Acids, Bases, and pH 41
- 2-4 Titration Curves 45
- 2-5 Buffers 48
  - 2.2 BIOCHEMICAL CONNECTIONS | Buffer Selection 52
  - 2.3 BIOCHEMICAL CONNECTIONS | Some Physiological Consequences of Blood Buffering 54
  - 2.4 BIOCHEMICAL CONNECTIONS | Lactic Acid—Not Always the Bad Guy 55

- Summary 55
- Review Exercises 56
- Annotated Bibliography 58

## 3 Amino Acids and Peptides 59

- 3-1 Amino Acids Exist in a Three-Dimensional World 59
- 3-2 Individual Amino Acids: Their Structures and Properties 60
  - Uncommon Amino Acids 65

- 11-2 Transcription in Prokaryotes** 280  
 RNA Polymerase in *Escherichia coli* 280  
 Promoter Structure 281  
 Chain Initiation 283  
 Chain Elongation 284  
 Chain Termination 285
- 11-3 Transcription Regulation in Prokaryotes** 287  
 Alternative  $\sigma$  Factors 287  
 Enhancers 287  
 Operons 288  
 Transcription Attenuation 293  
**11.1 BIOCHEMICAL CONNECTIONS** | Riboswitches  
 Provide Another Weapon Against Pathogens 294
- 11-4 Transcription in Eukaryotes** 295  
 Structure of RNA Polymerase II 296  
 Pol II Promoters 297  
 Initiation of Transcription 298  
 Elongation and Termination 300
- 11-5 Transcription Regulation in Eukaryotes** 301  
 The Role of Mediator in Transcription Activation and Repression 301  
 Chromatin Remodeling Complexes 302  
 Covalent Modification of Histones 303  
 Response Elements 304  
**11.2 BIOCHEMICAL CONNECTIONS** | CREB—The  
 Most Important Protein You Have Never Heard  
 Of? 307
- 11-6 Non-Coding RNAs** 307  
**11.3 BIOCHEMICAL CONNECTIONS** | A Micro RNA  
 Helps Regenerate Nerve Synapses After  
 Injury 310
- 11-7 Structural Motifs in DNA-Binding Proteins** 310  
 DNA-Binding Domains 310  
 Helix–Turn–Helix Motifs 311  
 Zinc Fingers 311  
 Basic-Region Leucine Zipper Motif 312  
 Transcription-Activation Domains 312
- 11-8 Posttranscriptional RNA Modification** 313  
 Transfer RNA and Ribosomal RNA 314  
 Messenger RNA 315  
 The Splicing Reaction: Lariats and Snurps 316  
 Alternative RNA Splicing 318
- 11-9 Ribozymes** 318  
**11.4 BIOCHEMICAL CONNECTIONS** | Epigenetics  
 Revisited—How Cancer and Aging are Related to  
 Epigenetic States 320  
**Summary** 320  
**Review Exercises** 322  
**Annotated Bibliography** 323
- 12 Protein Synthesis: Translation of the Genetic Message** 325
- 12-1 Translating the Genetic Message** 325
- 12-2 The Genetic Code** 326  
 Codon–Anticodon Pairing and Wobble 328  
**12.1 BIOCHEMICAL CONNECTIONS** | Influenza A  
 Virus Alters the Reading Frame to Lower Its  
 Morbidity 331
- 12-3 Amino Acid Activation** 332
- 12-4 Prokaryotic Translation** 334  
 Ribosomal Architecture 334  
 Chain Initiation 334  
 Chain Elongation 336  
 Chain Termination 340  
 The 21st Amino Acid 340  
 The Ribosome Is a Ribozyme 340  
 Polysomes 343
- 12-5 Eukaryotic Translation** 344  
 Chain Initiation 345  
**12.2 BIOCHEMICAL CONNECTIONS** | Protein Synthesis  
 Makes Memories 347  
 Chain Elongation 348  
 Chain Termination 348  
 Coupled Transcription and Translation in Eukaryotes? 348  
 More Dogma Falls by the Wayside 348
- 12-6 Posttranslational Modification of Proteins** 349  
**12.3 BIOCHEMICAL CONNECTIONS** | Silent Mutations  
 Are Not Always Silent 350  
**12.4 BIOCHEMICAL CONNECTIONS** | Chaperones:  
 Preventing Unsuitable Associations 352  
 Ribosomes Are Involved in Protein Folding 353
- 12-7 Protein Degradation** 353  
**12.5 BIOCHEMICAL CONNECTIONS** | How Do We  
 Adapt to High Altitude? 354  
**Summary** 356  
**Review Exercises** 356  
**Annotated Bibliography** 358
- 13 Nucleic Acid Biotechnology Techniques** 359
- 13-1 Purification and Detection of Nucleic Acids** 359  
 Separation Techniques 359  
 Detection Methods 360
- 13-2 Restriction Endonucleases** 361  
 Many Restriction Endonucleases Produce Sticky Ends 362
- 13-3 Cloning** 364  
 Using Sticky Ends to Construct Recombinant DNA 364

- 13-4 Genetic Engineering** 370  
DNA Recombination Occurs in Nature 371
- 13.1 BIOCHEMICAL CONNECTIONS** | Genetic Engineering in Agriculture 372  
Bacteria as "Protein Factories" 373  
Protein Expression Vectors 373
- 13.2 BIOCHEMICAL CONNECTIONS** | Human Proteins through Genetic Recombination Techniques 375  
Genetic Engineering in Eukaryotes 376
- 13-5 DNA Libraries** 377
- 13.3 BIOCHEMICAL CONNECTIONS** | Fusion Proteins and Fast Purifications 378  
Finding an Individual Clone in a DNA Library 379
- 13-6 The Polymerase Chain Reaction** 380  
Quantitative PCR allows sensitive measurement of DNA samples 382
- 13-7 DNA Fingerprinting** 383  
Restriction-Fragment Length Polymorphisms: A Powerful Method for Forensic Analysis 383
- 13.4 BIOCHEMICAL CONNECTIONS** | CSI: Biochemistry—Forensic Uses of DNA Testing 387
- 13-8 Sequencing DNA** 387
- 13-9 Genomics and Proteomics** 389  
The Power of Microarrays—Robotic Technology Meets Biochemistry 391  
Protein Arrays 393  
Summary 393  
Review Exercises 394  
Annotated Bibliography 396
- 14 Viruses, Cancer, and Immunology** 397
- 14-1 Viruses** 397  
Families of Viruses 398  
Virus Life Cycles 398
- 14-2 Retroviruses** 402
- 14.1 BIOCHEMICAL CONNECTIONS** | Viruses Are Used for Gene Therapy 403
- 14-3 The Immune System** 404
- 14.2 BIOCHEMICAL CONNECTIONS** | The First Vaccine—Bad Science Gone Good 405  
Innate Immunity—The Front Lines of Defense 406  
Acquired Immunity: Cellular Aspects 407  
T-Cell Functions 407  
T-Cell Memory 411  
The Immune System: Molecular Aspects 413  
Distinguishing Self from Nonself 415

- 14.3 BIOCHEMICAL CONNECTIONS** | Viral RNAs Outwit the Immune System 417
- 14-4 Cancer** 417
- 14.4 BIOCHEMICAL CONNECTIONS** | Cancer: The Dark Side of the Human Genome 418  
Oncogenes 419  
Tumor Suppressors 421  
Viruses and Cancer 422  
Viruses Helping Cure Cancer 423
- 14.5 BIOCHEMICAL CONNECTIONS** | Nanotech Tackles Cancer 425
- 14.6 BIOCHEMICAL CONNECTIONS** | Attacking the Symptoms instead of the Disease? 426
- 14-5 AIDS** 427  
The Search for a Vaccine 430  
Antiviral Therapy 430  
Hope for a Cure 430  
Summary 432  
Review Exercises 433  
Annotated Bibliography 434
- 15 The Importance of Energy Changes and Electron Transfer in Metabolism** 435
- 15-1 Standard States for Free-Energy Changes** 435  
Spontaneity and Reversibility 436  
Driving Endergonic Reactions 437  
Energy Balance 437
- 15-2 A Modified Standard State for Biochemical Applications** 438
- 15-3 The Nature of Metabolism** 439
- 15.1 BIOCHEMICAL CONNECTIONS** | Living Things Are Unique Thermodynamic Systems 439
- 15-4 The Role of Oxidation and Reduction in Metabolism** 440
- 15-5 Coenzymes in Biologically Important Oxidation–Reduction Reactions** 441
- 15-6 Coupling of Production and Use of Energy** 445
- 15.2 BIOCHEMICAL CONNECTIONS** | ATP in Cell Signaling 448
- 15-7 Coenzyme A in Activation of Metabolic Pathways** 451  
Summary 454  
Review Exercises 455  
Annotated Bibliography 457
- 16 Carbohydrates** 459
- 16-1 Sugars: Their Structures and Stereochemistry** 459

- 16.1 BIOCHEMICAL CONNECTIONS** | Low-Carbohydrate Diets 464
- 16-2 Reactions of Monosaccharides** 467
- 16.2 BIOCHEMICAL CONNECTIONS** | Vitamin C Is Related to Sugars 468
- 16-3 Some Important Oligosaccharides** 473
- 16.3 BIOCHEMICAL CONNECTIONS** | Lactose Intolerance: Why Do So Many People Not Want to Drink Milk? 475
- 16-4 Structures and Functions of Polysaccharides** 476
- 16.4 BIOCHEMICAL CONNECTIONS** | Why Is Dietary Fiber So Good for You? 477
- 16-5 Glycoproteins** 483
- 16.5 BIOCHEMICAL CONNECTIONS** | Glycoproteins and Blood Transfusions 484
- Summary** 485
- Review Exercises** 486
- Annotated Bibliography** 488
- 17 Glycolysis** 489
- 17-1 The Overall Pathway of Glycolysis** 489
- 17.1 BIOCHEMICAL CONNECTIONS** | Biofuels from Fermentation 491
- 17-2 Conversion of Six-Carbon Glucose to Three-Carbon Glyceraldehyde-3-Phosphate** 493
- 17.2 BIOCHEMICAL CONNECTIONS** | Dolphins as a Model for Humans with Diabetes 497
- 17-3 Glyceraldehyde-3-Phosphate Is Converted to Pyruvate** 500
- 17-4 Anaerobic Metabolism of Pyruvate** 507
- 17.3 BIOCHEMICAL CONNECTIONS** | What Is the Connection between Anaerobic Metabolism and Dental Plaque? 508
- 17.4 BIOCHEMICAL CONNECTIONS** | Fetal Alcohol Syndrome 511
- 17.5 BIOCHEMICAL CONNECTIONS** | Using Pyruvate Kinase Isozymes to Treat Cancer 512
- 17-5 Energy Production in Glycolysis** 513
- 17-6 Control of Glycolysis** 514
- Summary** 516
- Review Exercises** 517
- Annotated Bibliography** 518
- 18 Storage Mechanisms and Control in Carbohydrate Metabolism** 519
- 18-1 How Glycogen Is Produced and Degraded** 519
- 18.1 BIOCHEMICAL CONNECTIONS** | Why Do Athletes Go In for Glycogen Loading? 522
- 18-2 Gluconeogenesis Produces Glucose from Pyruvate** 527
- 18-3 Control of Carbohydrate Metabolism** 531
- 18-4 Glucose Is Sometimes Diverted through the Pentose Phosphate Pathway** 539
- 18.2 BIOCHEMICAL CONNECTIONS** | The Pentose, Phosphate Pathway and Hemolytic Anemia 543
- Summary** 544
- Review Exercises** 545
- Annotated Bibliography** 546
- 19 The Citric Acid Cycle** 547
- 19-1 The Central Role of the Citric Acid Cycle in Metabolism** 547
- 19-2 The Overall Pathway of the Citric Acid Cycle** 548
- 19-3 How Pyruvate Is Converted to Acetyl-CoA** 551
- 19-4 The Individual Reactions of the Citric Acid Cycle** 553
- 19.1 BIOCHEMICAL CONNECTIONS** | Fluorine Compounds and Carbohydrate Metabolism 555
- 19.2 BIOCHEMICAL CONNECTIONS** | What Is the Origin of the CO<sub>2</sub> Released by the Citric Acid Cycle? 557
- 19-5 Energetics and Control of the Citric Acid Cycle** 562
- 19-6 The Glyoxylate Cycle: A Related Pathway** 565
- 19-7 The Citric Acid Cycle in Catabolism** 566
- 19-8 The Citric Acid Cycle in Anabolism** 567
- 19.3 BIOCHEMICAL CONNECTIONS** | Why Can't Animals Use All the Same Energy Sources as Plants and Bacteria? 568
- 19.4 BIOCHEMICAL CONNECTIONS** | Why Is It So Hard to Lose Weight? 571
- 19-9 The Link to Oxygen** 574
- Summary** 574
- Review Exercises** 575
- Annotated Bibliography** 576
- 20 Electron Transport and Oxidative Phosphorylation** 577
- 20-1 The Role of Electron Transport in Metabolism** 577
- 20-2 Reduction Potentials in the Electron Transport Chain** 578
- 20-3 Organization of Electron Transport Complexes** 581
- 20-4 The Connection between Electron Transport and Phosphorylation** 588
- 20-5 The Mechanism of Coupling in Oxidative Phosphorylation** 590

- 20.1 **BIOCHEMICAL CONNECTIONS** | What Does Brown Adipose Tissue Have to Do with Obesity? 593
- 20-6 **Shuttle Mechanisms** 594
- 20.2 **BIOCHEMICAL CONNECTIONS** | Sports and Metabolism 596
- 20-7 **The ATP Yield from Complete Oxidation of Glucose** 596
- Summary 597
- Review Exercises 598
- Annotated Bibliography 600
- 21 Lipid Metabolism** 601
- 21-1 **Lipids Are Involved in the Generation and Storage of Energy** 601
- 21-2 **Catabolism of Lipids** 601
- 21-3 **The Energy Yield from the Oxidation of Fatty Acids** 607
- 21-4 **Catabolism of Unsaturated Fatty Acids and Odd-Carbon Fatty Acids** 609
- 21-5 **Ketone Bodies** 610
- 21-6 **Fatty-Acid Biosynthesis** 612
- 21.1 **BIOCHEMICAL CONNECTIONS** | Transcription Activators in Lipid Biosynthesis 613
- 21.2 **BIOCHEMICAL CONNECTIONS** | Acetyl-CoA Carboxylase—A New Target in the Fight against Obesity? 614
- 21.3 **BIOCHEMICAL CONNECTIONS** | A Gene for Obesity 620
- 21-7 **Synthesis of Acylglycerols and Compound Lipids** 621
- Triacylglycerols 621
- 21-8 **Cholesterol Biosynthesis** 623
- 21.4 **BIOCHEMICAL CONNECTIONS** | Atherosclerosis 632
- 21-9 **Hormonal Control of Appetite** 635
- Summary 636
- Review Exercises 637
- Annotated Bibliography 638
- 22 Photosynthesis** 639
- 22-1 **Chloroplasts Are the Site of Photosynthesis** 639
- 22.1 **BIOCHEMICAL CONNECTIONS** | The Relationship between Wavelength and Energy of Light 643
- 22-2 **Photosystems I and II and the Light Reactions of Photosynthesis** 643
- Cyclic Electron Transport in Photosystem I 647
- 22-3 **Photosynthesis and ATP Production** 649
- 22-4 **Evolutionary Implications of Photosynthesis with and without Oxygen** 650
- 22.2 **BIOCHEMICAL CONNECTIONS** | Improving the Yield of Anti-Malarial Plants 652
- 22-5 **Dark Reactions of Photosynthesis Fix CO<sub>2</sub>** 653
- 22.3 **BIOCHEMICAL CONNECTIONS** | Plants Feed Animals—Plants Need Energy—Plants Can Produce Energy 653
- 22.4 **BIOCHEMICAL CONNECTIONS** | Chloroplast Genes 659
- 22-6 **CO<sub>2</sub> Fixation in Tropical Plants** 660
- Summary 662
- Review Exercises 663
- Annotated Bibliography 664
- 23 The Metabolism of Nitrogen** 665
- 23-1 **Nitrogen Metabolism: An Overview** 665
- 23-2 **Nitrogen Fixation** 667
- 23.1 **BIOCHEMICAL CONNECTIONS** | Why Is the Nitrogen Content of Fertilizers So Important? 668
- 23-3 **Feedback Inhibition in Nitrogen Metabolism** 669
- 23-4 **Amino Acid Biosynthesis** 670
- 23-5 **Essential Amino Acids** 677
- 23-6 **Amino Acid Catabolism** 678
- Excretion of Excess Nitrogen 679
- 23.2 **BIOCHEMICAL CONNECTIONS** | Water and the Disposal of Nitrogen Wastes 680
- 23-7 **Purine Biosynthesis** 684
- Anabolism of Inosine Monophosphate 684
- 23-8 **Purine Catabolism** 686
- 23-9 **Pyrimidine Biosynthesis and Catabolism** 688
- The Anabolism of Pyrimidine Nucleotides 688
- Pyrimidine Catabolism 689
- 23-10 **Conversion of Ribonucleotides to Deoxyribonucleotides** 690
- 23-11 **Conversion of dUDP to dTTP** 693
- 23.3 **BIOCHEMICAL CONNECTIONS** | Chemotherapy and Antibiotics—Taking Advantage of the Need for Folic Acid 694
- Summary 694
- Review Exercises 695
- Annotated Bibliography 696
- 24 Integration of Metabolism: Cellular Signaling** 697
- 24-1 **Connections between Metabolic Pathways** 697
