

TABLE OF CONTENTS, VOLUME II

Chapter 1	
Biological Utilization of Basic Amino Acids and Cations	1
L. Lounnon and T. Kiener	
Chapter 2	
Arginine: A Dietary Modifier of Ammonia Detoxification and Pyrimidine Biosynthesis	25
J. A. Milner	
Chapter 3	
Lysine-Carnitine Conversion in Rat and Man	41
L. Khan-Siddiqui	
Chapter 4	
Leucine-Tryptophan-Niacin Interrelationships	59
C. Umezawa	
Chapter 5	
Amino Acid Metabolism in Total Parenteral Nutrition during Development	71
D. K. Rassin	
Chapter 6	
Comparative Utilization from Enteral Formula Diets by Humans of Intact Proteins	87
C. Kies	
Chapter 7	
Amino Acid Derivatives as a Source of Amino Acids in Parenteral Nutrition	97
M. Neuhauser-Berthold	
Chapter 8	
Methionine Derivatives as a Nutritional Source of Methionine	117
M. Friedman and M. R. Gumbmann	
Chapter 9	
Enzyme Digestion and Biological Utilization of Poly-L-Methionyl Proteins	133
H. F. Gaertner, P. Brachet, and A. J. Puigserver	
Chapter 10	
Availability of Amino Acids in Some Tripeptides and Derivatives Present in Dietary Proteins	147
G. Sarwar and A. Paquet	
Chapter 11	
Species and Isomeric Variation in the Utilization of Amino Acids	155
B. S. Borg and R. C. Wahlstrom	
Chapter 12	
Dietary Significance of D-Amino Acids	173
M. Friedman and M. R. Gumbmann	

Chapter 13	
Effect of Dietary Protein Value on Lactation.....	191
G. R. Jansen	
Chapter 14	
Influence of Protein Type in Nutritionally Adequate Diets on the Development of Immunity.....	219
G. Bounous and P. A. L. Kongshavn	
Chapter 15	
Dietary Protein in Atherosclerosis.....	235
D. A. Kritchevsky	
Chapter 16	
Dietary Protein Modulation in Serum Cholesterol: The Amino Acid Connection.....	247
A. Sanchez and R. W. Hubbard	
Chapter 17	
Endogenous Hypercholesterolemia and Dietary Amino Acids: Sulfur Amino Acids and Glycine.....	275
K. Yagasaki	
Index.....	289
