

Short contents

Full contents	vii
Preface	xi
Acknowledgments	xiii
1 The vocabulary of transcription	1
2 RNA polymerases and the transcription cycle	16
3 The eukaryotic basal machinery	49
4 Mechanisms of transcriptional activation	72
5 Transcriptional control through the modification of chromatin structure	101
6 Epigenetic control of transcription	133
7 Combinatorial control in development and signal transduction	167
Answers to problems	194
Glossary	199
Index	220

Color plate section between pp. 82 and 83
